### First Aid

**If Swallowed** Drink 2-4 glasses of water. Do not induce vomiting. If vomiting occurs, vomit into a plastic bag. Do not use charcoal. Do not give anything by mouth to anyone who is unconscious or who is having difficulty breathing. Get medical attention. If breathing has stopped, start artificial respiration immediately and maintain artificial respiration.

**If in Eye** Flush eye for 15 minutes with plenty of water. Call a physician immediately.

**If Inhaled** If not breathing, give artificial respiration. Get medical attention.

**If On Skin or Clothing** In case of contact immediately flush skin or eyes with water for at least 15 minutes while removing contaminated clothing and shoes.

### Antidote

**Note to Physician** Active ingredient is a cholinesterase inhibitor. Patient should be kept under observation for 48 hours. Atropine is antidotal. Give 4 mg atropine sulfate intramuscularly or intravenously. Repeat every 15 minutes until patient is fully atropinized. Do not give morphine.
