28 Gallons Net Contents

PAR F 70 SOLUBLE OIL

DIRECTIONS FOR USE

Apply when insects first appear and repeat as necessary. Use the following recommended rates in sufficient water to cover one acre. (With ground application equipment on Apples and Pears use a minimum of 300 gallons; on Stone Fruits and Nuts use a minimum of 200 gallons.)

ON PEACH and PLUM: Summer Use—to control Spider Mites use 1-1½ gallons per 100 gallons of water. Certain varieties of plums may be injured by oil sprays, check tolerance prior to treatment.

ON APPLE and PEAR: Summer Use - to control Spider Mites use 1-1½ gallons per 100 gallons of water.

ON PRUNES: Summer Use - to control Spider Mites use 1-1½ gallons per 100 gallons of water. Certain varieties of prunes may be injured by oil spray, check tolerance prior to treatment.

ON ALMONDS and CHERRIES: Summer Use - to control Red Spider Mite use 2-4 quarts per 100 gallons of water. Summer stages of Brown Apricot Scale, San Jose Scale use 4-6 quarts per 100 gallons of water.

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTERED
E. UNDER NO. 219-2637 SUBJECT
TO ATTACHED COMMENTS.

PESTICIDE

ACTIVE INGREDIENT	BY WT.
Petroleum Oil - - - - -	99.00%
INERT INGREDIENTS - - - - -	1.00%
	<hr/> 100.00%

Classification - Unclassified
Unsulphonated Residue - 96% Minimum

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not induce vomiting.
DO NOT USE THIS MATERIAL IF IT DOES NOT EMULSIFY.
DO NOT USE IN UNDILUTED FORM.

MIXING DIRECTIONS

Before using this product, be sure the spray tank is clean and contains just enough water to cover the agitator shaft.

If an injector is used, first add 25 to 50 gallons of water to tank with engine running to provide good pressure. Then put injector suction tube into the measured amount of spray oil, opening injector valve to allow the oil to be sucked into the tank. Then fill the tank with water.

With enough water in tank to cover agitator shaft and with shaft in motion, add desired amount of this material for full tank. Pump this mixture through the overflow and back into tank for about two minutes to insure proper emulsification. Fill with water, adding other desired materials as tank is filling. Keep agitator running at all times. Sufficient agitation must be present to insure the proper emulsification at all time.

USAGE CAUTION

Use efficient equipment of the proper type; avoid spraying during or immediately prior to hot or freezing weather, hot dry winds, rain or other unsuitable conditions; avoid overspraying or double spraying. Plants should be sprayed only when in vigorous condition and when their moisture condition is suitable. THIS IS AN EMULSIVE TYPE OIL AND REQUIRES MECHANICAL (OR EQUIVALENT) AGITATION.

On Deciduous trees do not mix with sulphur or apply within 10 days to 2 weeks prior to or after a sulphur treatment.

Do not mix with pesticides incompatible with oil.

USAGE CAUTION: Do not allow this material to drift onto neighboring crop or non-crop areas or use in a manner or at a time other than in accordance with directions, because plant injury, excessive residues or other undesirable results may occur.

Dealers Should Sell in Original Packages Only.
