NEMAGON* 10 GRANULAR

NEMATOCIDE

DIRECTIONS FOR USE

FOR MANUFACTURING USE ONLY

THIS MATERIAL REQUIRES FURTHER MIXING BEFORE USE.

Niagara Nemagon 10 Granular is specially prepared for mixing with fertilizers for soil applications to control certain nematodes. In this way a fertilizer and nematocide may be applied in a single application.

Manufacturers of fertilizers containing this material should use mineral type fertilizers and those found to be stable with Nemagon as long as the product remains in the channels of trade. Observe all cautions in handling or formulating. Formulated products should be used only for those purposes for which Nemagon-fertilizer mixtures have been found suitable. They should be applied to soils for food crops only when the purposed use has been found to leave no objectionable residues at harvest.

CAUTION: Store in a cool place. Preserve unused portions of material in original container with polyethylene liner and lid tightly closed.
