RESTRICTED USE PESTICIDE
Due To Avian Toxicity
For retail sale to and use only by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator's certification.

Furadan® 10 G
Insecticide—Nematicide
For Agricultural or Commercial Use Only
EPA REG. NO. 279-2712 AA  EPA Est. 279-

Active Ingredient                          By Wt.
Carbofuran                        10.0%
Inert Ingredients                   90.0%
                                      100.0%

*2,3-Dihydro-2,2-dimethyl-7-benzofuranyl methylcarbamate
U S Patent No 3,474,171

KEEP OUT OF REACH OF CHILDREN
WARNING

STATEMENT OF PRACTICAL TREATMENT

If swallowed: Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting if give anything by mouth to an unconscious person. Get medical attention.

If in eyes: Flush with water for at least 15 minutes. Get medical attention.

If on skin: Wash with soap and water. Remove contaminated clothing and shoes. Wash hands before reuse.

Antidote

Note to Physician: Carbofuran is a reversible cholinesterase inhibitor. Do not use oximes such as 2-PAM. Start by giving 2 mg atropine intramuscularly. According to clinical response continue until signs of atropinization occur (dry mouth or dilated pupils). If in eyes, instill one drop of homatropine.

For Emergency Assistance Call (800) 331-3148.
See other panels for additional precautionary information.

PRECAUTIONARY STATEMENTS

Hazard to Humans (and Domestic Animals)

Warning

Poisonous if swallowed. May be fatal or harmful as a result of skin or eye contact or by breathing dust. Causes cholinesterase inhibition. Warning symptoms of poisoning include perspiration, headache, sneezing, vomiting, diarrhea, agitation, twitching, pinpoint eye pupils, abnormal flow of saliva, muscle tremors, and unconsciousness. Atropine sulfate is an antidote.

Wear long-sleeved clothing and protective gloves when handling. Wash hands and face before eating or smoking. Bathe at the end of the work day. Change clothing daily and wash before reuse.

Environmental Hazards

This pesticide is toxic to fish and other wildlife. Birds feeding on treated areas may be killed. Birds killed by carbofuran pose a hazard to hawks and other birds-of-prey. Bury or otherwise dispose of dead birds to prevent poisoning of other wildlife. Cover or incorporate granules in spill areas. Runoff from treated areas may be hazardous to fish in neighboring areas. Do not apply directly to water. Do not contaminate wells, wetlands or any body of water by cleaning of equipment or disposal of waste.

Notice: It is a Federal offense to use any pesticide in a manner that results in the death of a member of an endangered species.

The use of Furadan 10 G may pose a hazard to the following Federally designated endangered/threatened species known to be found in certain areas within the named locations:

- Attwater’s Prairie Chicken—Texas counties including Aransas, Austin, Brazoria, Colorado, Galveston, Goliad, Harris, Refugio and Victoria.
- Aleutian Canada Goose—California counties including Colusa, Merced, Stanislaus and Sutter.
- Kern Primrose Sphinx Moth—Walker Basin of Kern County California.

This product may not be used in areas where prior impact on the Federally designated endangered/threatened species noted above is likely. Prior to making applications, the user of this product must determine that no such species are located or immediately adjacent to the area to be treated. If the user is in doubt whether or not the above named endangered species may be affected, he should contact either the appropriate U.S. Fish and Wildlife Service office (Endangered Species Specialist) or personnel of the State Fish and Game office.

Carbofuran is a chemical which can travel (seep & leach) through soil and can contaminate groundwater which may be used as drinking water. Carbofuran has been found in groundwater as a result of agricultural use. Users are advised not to apply carbofuran where the water table (ground water) is close to the surface and where the soils are very permeable (e.g. well-drained soils such as loamy sands). Your local agricultural agencies can provide further information on the type of soil in your area and the location of groundwater.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not use this product on Long Island, NY.

FMC

APPLICATION WITHOUT WEARING PROPER PROTECTING CLOTHING.

STORAGE AND DISPOSAL
Pesticide Storage
Do not store in or around the home.

Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use, fold and roll back bags, clamp and close tightly. Do not put concentrated or diluted material into food or drink containers. Do not contaminate other pesticides, fertilizers, water, food or feed by storage or disposal.

In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Contain spills. Call FMC (800) 331-3148.

To contain spill, place surrounding area with absorbent sand, cat litter or commercial clay. If dry material, cover to prevent dispersal. Place damaged package in a holding container. Identify contents.

Pesticide Disposal
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or waste is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal
Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

GENERAL INSTRUCTIONS
If prolonged intimate contact with corn and sorghum foliage will result do not enter treated fields within 14 days of application without wearing proper protective clothing. For all other solutions, do not enter treated fields within 7 days of application. Cover or incorporate granules in spill areas.

Do not plant with any crop for which carbaryl treatment is not registered for at least 10 months.

Field Corn, Popcorn, Sweet Corn—Conventional, Minimum and No Tillage

- Insects Controlled
- Rate of Application
- Method of Application
- Corn Rootworms (Northern, Southern and Western)
- 12 ounces/acre
- Apply at planting by directing 1000 granules to row to form a linear foot of seed furrow.
- OR
- Wireworms
- White Grubs (in control)
- 1st generation European Corn Borer (in control)
- Armyworms
- Cutworms (suppression)
- Lesion Nematode (Northeast and Midwest corn states including Colorado and Wyoming)
- Seed Corn Maggots

Field Corn, Popcorn—Post Planting

- Insects Controlled
- Rate of Application
- Method of Application
- Corn Rootworms (Northern and Western)
- 12 ounces/acre
- Apply by side dressing both per 1000 sides of the row and cultivate linear feet into the soil.

Field Corn—Foliar Application

- Insects Controlled
- Rate of Application
- Method of Application
- Southwestern Corn Borer
- 10 pounds/acre
- Apply by aircraft by broadcasting over the corn plants or with ground equipment by directing the granules into the corn whorls. Apply when eggs begins to hatch.

Do not make more than two foliar applications per season.

Corn Insecticide Applicator Settings
This product is a dense, free-flowing insecticide requiring accurate equipment calibration to apply the recommended amount per acre. Always calibrate your planter at the speed which you plan to travel during the planting operation. The following are approximate settings for guidance in calibration:

- Application Rate
- Planting Speed (MPH)
- Equipment
- Allis Chalmers
- Gandy
- IH Cyclo Planter
- Gates
- Dial
- John Deere
- Max Emerge
- Seed
- Noble
- Round Opening
- Rectangular Opening

- Injury Spots
- Insect wounds
- Corn stalks
- Do not feed cotton foliage

Cranberries—Washington Only

- Insects Controlled
- Rate of Application
- Method of Application
- Black Vine Weevil
- 20 pounds/acre
- Spread granules uniformly over soil surface using a rotary spreader. Make one application about June 15 to 25 and repeat one month later. Incorporate granules by following each application with sprinkler irrigation.

- For use only on cranberry beds that are sprinkler irrigated and are not flooded for purposes of irrigation or harvest.

Cucurbits (Cucumber, Melons, Squash, Pumpkins)—Southeastern States Only

- Insects Controlled
- Rate of Application
- Method of Application
- Nematodes (Dagger Lesion and Root Knot)
- 2 + pounds/acre
- Apply in a 12 to 15 inch band and incorporate into the top 3 linear feet of soil.

</tbody>
</table>

Use only on grain sorghum or sorghum grown for forage.

Do not graze or harvest sorghum grown for forage within 75 days of application.

Where a rate range is indicated, use the higher rate when heavier pest infestations are anticipated.

### Soybeans

<table>
<thead>
<tr>
<th>Insects Controlled</th>
<th>Rate of Application</th>

</tr>
<tr>
<td>Sunflower Bettle</td>
<td>12 oz. per 1,000 linear feet of row</td>
<td>Apply at planting by directing the granules to flow into the seed furrow</td>
</tr>
</tbody>
</table>

Place the delivery tube behind the opening disk and in front of the furrow closure wheels (disks or knives) so that the granules drop into the furrow, and mix with the covering soil.

Apply in a T-band by positioning the bander in front of the presswheel or furrow closing wheels, such that granules are deposited in a band over the open seed furrow and then covered with soil by the presswheel, closing wheels and/or other closing devices. Incorporate into the top 1 inch of soil by use of special covering devices or by dragging a short length of chain.

### Pine Seedlings in Pine Plantations

<td>Nantucket Pine Tip Moth</td>
<td>1 teaspoon per 1,000 linear feet of row</td>
<td>Apply at transplanting</td>
</tr>
<tr>
<td>Pitch Pine Tip Moth</td>
<td>1 teaspoon per 1,000 linear feet of row</td>
<td>Apply at transplanting</td>
</tr>
</tbody>
</table>

Do not use at transplanting if seedlings were treated with Furadan 4E slurry root dip.

### Dealers Should Sell in Original Packages Only.

**Terms of Sale or Use:** On purchase of this product, buyer and user agree to the following conditions.

**Warranty:** FMC makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Except as so warranted, the product is sold as is. Buyer and user assume all risk of use and/or handling and/or storage of this material when such use and/or handling and/or storage is contrary to label instructions.

**Directions and Recommendations:** Follow directions carefully. Timing and method of application, weather and crop conditions, mixture with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller and are assumed by the buyer at his own risk.

**Use of Product:** FMC's recommendations for the use of this product are based upon tests believed to be typical. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such or the results to be obtained if not used in accordance with directions and recommendations of the practice.

**Damages:** Buyer's or user's exclusive remedy for damages for breach of warranty or negligence shall be limited to direct damages not exceeding the purchase price paid and shall exclude incidental or consequential damages.
