RESTRICTED USE PESTICIDE Code 2834

Due To Avian Toxicity

For retail sale to and use only by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator's certification

Furadan, 10 G Insecticide-Nematicide

For Agricultural or Commercial Use Only

EPA REG. NO. 279-2712 AA

EPA Est. 279-

Active Ingredient	By Wt.
*Carbofuran	10.0°,0
Inert Ingredients:	90.0%
	100.0°°

*2.3-Dihydro-2, 2-dimethyl-7-benzofuranyl methylcarbamate U.S. Patent No. 3,474,171

KEEP OUT OF REACH OF CHILDREN WARNING

STATEMENT OF PRACTICAL TREATME

If swallowed: Drink 1 or 2 glasses of walf and introd watering by touching back of throat with linger Deviation of the control of the second attention If in eyes: Flush with plent of watering at least the minutes Get medical attention If on skin: Wash mention with soap and water Remove contami-nated clothing and wash bicograeuse Antidote

441111

t

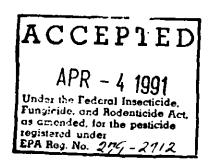

Note to Physician: Carbofuran is a reversible cholinesterase inhibitor Do not use oximes such as 2-PAM Start by giving 2 mg atropine intramuscularly According to clinical response, continue until signs of atropinization occur (dry mouth or dilated pupils). If in eye, instill one drop of homatropine

For Emergency Assistance Call (800) 331-3148.

See other panels for additional precautionary information.

FMC Corporation Agricultural Chemical Group Philadelphia PA 19103 1190

PRECAUTIONARY STATEMENTS Hazards to Humans (and Domestic Animals)

Warning

Warning Poisonous if swallowed May be fatal or harmful as a result of skin or eye contact or by breathing dust Causes profinesterase inhibition. Warning symptoms of poisoning include watchess peadache, sweating, nausea, vomiting diarrhea, tightnesson, distributed vision, pinpoint eye pupils abnormal flow of salivation of the salivation of the salivation of salivation of the salivation of the salivation of salivation of the salivation of the salivation of saliv

Two pesticide is toxic to fish birds and other wildlife. Birds feeding on treated areas may be killed. Birds killed by carbofuran pose a hazard to hawks and other birds-of-prey, bury or otherwise dispose of dead birds to prevent poisoning of other wildlife. Cover or incorporate granules in spill areas. Runoff from treated areas may be hazardous to fish in neigh-by boring areas Do not apply directly to water Do not contaminate wells, wetlands or any body of water by cleaning of equipment or disposal of waste

> Notice: It is a Federal offense to use any pesticide in a manner that results in the death of a member of an endangered species

> The use of Furadan 10 G may pose a hazard to the following Federally designated endangered/threatened species known to be found in certain areas within the named locations

> Attwater's Greater Prairie Chicken - Texas counties including Aransas, Austin, Brazoria, Colorado, Galveston, Goliad, Harris, Refugio and Victoria

> Aleutian Canada Goose-California counties including. Colusa Merced, Stanislaus and Sutter

> Kern Primrose Sphinx Moth -- Walker Basin of Kern County California

This product may not be used in areas where adverse impact on the Federally designated endangered/threatened species noted above is likely Prior to making applications, the user of this product must determine that no such species are leased in or immediately adjacent to the area to be treated. If the user is it, doubt whether or not the above named endangered species may be affected, he should contact either the regional U.S. Fish and Wildlife Service office (Endangered Species Spe-cialist) or personnel of the State Fish and Game effice

Carbofuran is a chemical which can travel (seepfor jeach) through soil and can contaminate groundwater which may be used as drinking water Carbofuran has been found in groundwater as a result of agricultural use Users are advised not to apply cated uraf where the water table (ground-water) is close to the surface and where the sorts and very permeable i.e. well-drained soits such as loarny sands. Your local agricultural agencies can provide further information on the type of soil in your area and the location of groundwater

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

Do not use this product on Long Island: N Y

STORAGE AND DISPOSAL

Pesticide Storage

Do not store in or around the home

Keep out of reach of children and animals. Store in original containers only Store in a cool, dry place and avoid excess heat Carefully open containers. After partial use, fold and roll back bags clamp and close tightly. Do not put concentrate or dilute material into food or drink containers. Do not containinate other pesticides, fertilizers, water, food or feed by storage or disposal

In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spills. Call FMC (800) 331-3148

To confine spill. If liquid, dike surrounding area or absorb with sand, cat litter or commercial clay. If dry material, cover to prevent dispersal. Place damaged package in a holding container. Identify contents

Pesticide Disposal

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance

Container Disposal

Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke

GENERAL INSTRUCTIONS

If protonged intimate contact with corn and or sorghum foliage will result do not reenter treated fields within 14 days of application without wearing proper protective clothing. For all other 55 than 24 hours following application

Cover or incorporate granules in spill areas.

Do not plant with any crop for which carbofuran treatment is not registered for at least 10 months

Field Corn, Popcorn, Sweet Corn - Conventional, Minimum and No Tillage

Insects Rate of Method of Controlled Application Application 12 ounces Apply at planting by directing per 1 000 the granules to flow into the Corn Rootworms (Northern Southern and Western) linear feet seed furrow Flea Beetles ofrow OR Wireworms Place the delivery tube behind. White Grubs (aid in the op ling disks and in front controls 1st generation European of the furrow closure (wheels, I Corn Borer (aid in disks or knives) so that the granules drop into the furrow control) and mix with the covering soil Armyworm* Cutworms (suppression) OR Lesion Nematode Apply in a T-band by position-(Northeast and Midwest ing bander in front of presscornistates including wheel or furrow closing wheels Colorado and Wyoming: Seed Corn Maggot such that granules are deposited in a band over the openseed furrow and then covered with soil by presswheel, closing wheels and or other closing devices. Incorporate into the top 1 inch of soil by use of special covering devices or by dragging a short length of. chain . *Control of armyworm for approximately 4 to 6 weeks after planting

This treatment will reduce the losses due to Stalk Rot by reducing the uncidence of insect wounds which permit entry by the Stalk Rot fungi

Field Corn, Popcont-Post Plant

Insects Controlled	Rate of Application	Method of Application
Corn Rootworm (Northern and Western)	12 ounces per 1 000 linear feet of row	Apply by side dressing both sides of the row and cultivate into the soil

Field Corn -- Folier Application

Insects Controlled	Rate of Application	Method of Application
Southwestern Corn Borers European Corn Borers	per acre	Apply by aircraft by broadcast- ing over the corn plants or with ground equipment by directing the granules into the corn whorts Apply when eggs begin to hatch

Do not make more than two foliar applications per season

Corn Insecticide Applicator Settings

This product is a dense, free-flowing insecticide requiring accurate equipment calibration to apply the recommended amount per acre Always calibrate your planter at the speed which you plan to travel during the planting operation. The following are approximate settings for guidance in calibration.

Applicator Gauge Settir	ng		
Application Rate 10 pounds acre			cre
