AUTHORIZED APPLICATIONS

Insecticides should be applied in accordance with local regulations and guidelines.
NIAGARA PYREXONE CROP SPRAY

LIVESTOCK SPRAY

Niagara Pyrexone Crop Spray can be used to cattle and other livestock to protect against lice, flies, horn flies, stable flies, house flies, and other insects that infest the cattle. Use for the control of Mycosporiella novicola and Hyposmodion brevicornis.

EQUIPMENT FOR USE

PROTECTION OF DAIRY ANIMALS

Hay Feed: 1 pound of concentrate, 1/2 gallon of water. Apply spray before or after milk feeding.

Stock Feed: 1/2 pound of concentrate, 1/2 gallon of water. Apply spray before or after milk feeding.

Killing Stock: 1/4 pound of concentrate, 1/4 gallon of water. Apply spray before or after milk feeding.

CATTLE: 1 quart of concentrate with the gallons of water (1 tablespoonful per gallon) in the active form of the insecticide. Apply for thorough and all purpose of the body.

PROTECTION OF OTHER LIVESTOCK

Horse, Sheep, Goat and Mule: 1/2 quart of concentrate in 1 gallon of water. Apply for thorough and all purpose of the body.

Sheep "Pyrexone" (or Pyrexone) 1 quart of concentrate in 1 gallon of water. Apply for thorough and all purpose of the body.

PROTECTION OF FARM ANIMALS

Hay Feed: 1 pound of concentrate, 1/2 gallon of water. Apply spray before or after milk feeding.

Stock Feed: 1/2 pound of concentrate, 1/2 gallon of water. Apply spray before or after milk feeding.

Killing Stock: 1/4 pound of concentrate, 1/4 gallon of water. Apply spray before or after milk feeding.

CATTLE: 1 quart of concentrate with the gallons of water (1 tablespoonful per gallon) in the active form of the insecticide. Apply for thorough and all purpose of the body.

PROTECTION OF GRAIN

Niagara Pyrexone Crop Spray is an excellent insecticide that when applied with water and sprayed directly on plants will effectively get rid of the lice, flies, horn flies, stable flies, house flies, and other insects that infest the cattle. Use for thorough and all purpose of the body.
