For more information

FUNDAL 4 EC is a systemic
insecticide for control of
many of the most important
insect pests of fruit trees.

This dosage of FUNDAL 4 EC is based on
sprays from conventional sprayers applying 400
gallons of spray per acre. When lower spray volumes are applied
from a concentrate sprayer or by aircraft, increase the
concentration of FUNDAL 4 EC in the spray mixture to obtain the
amount per acre equivalent to a milite spray.

Most orchards of bearing standard size trees will require at
least 4 pint (2 lbs. active ingredient) of FUNDAL 4 EC per
acre for satisfactory results.

CROP	PEST	TIME OF APPLICATION
Apple Pear	European red mite Apple rust mite Pear yellow mite Pear rust mite (Pacific coast only)	<u>Pre-Bloom:</u> For control of mites and early bud break apply at any time up to 1000 according to local recommendations. <u>Post-Bloom:</u> Apply when mites appear. Repeat ap- plications when necessary.
	Two-spotted mite McDaniel mite	<u>Post-Bloom:</u> Apply when mites appear. Repeat ap- plications when necessary.
	Codling moth	Apply in water sprays starting at bud break and continuing.
Apple	European red mite	<u>Pre-Bloom:</u> Apply to fully opened leaves when mites appear. <u>Post-Bloom:</u> Apply to newly opened leaves. Repeat when mites appear.
*New Zealand Apple	European red mite European mite New Zealand mite	Apply in water sprays starting at bud break and continuing.
Pear	European red mite European mite	Apply in water sprays starting at bud break and continuing.
