Directions for Use

To control oaks, manzanita and chamise in the Western United States, in non-crop land areas, such as utility and railroad rights-of-way, apply 2 1/2 to 5 ounces (5 to 10 tablespoonfuls) of Tandex 10 Granules per tree, shrub or brush clump.

For small tree or brush, spread the granules under the foliar canopy or place near the base of the tree. For larger trees and brush, spread granules in several spots under the outer foliar canopy. On hillsides, apply to the uphill side of the plant.

Sufficient rainfall is necessary after the application to carry the chemical into the root zone.

Use Limitations Do not apply on or near desirable trees or other plants, or on areas where their roots may extend, or in other locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts or similar areas. Do not contaminate domestic or irrigation waters.

Thoroughly clean spreading equipment before using for other purposes (do not use same spreading equipment for other purposes)

Disposal Warning Dispose of empty bags by burning
