

APPLICATION FOR AMENDED REGISTRATION

Proposed New Use

<u>FMC Label</u>	<u>EPA Reg. No.</u>
FURADAN 4 Flowable	279-2876

<u>Crop</u>	<u>To Control</u>	<u>Remarks</u>
Pine Seedlings	Pales Weevil and Pitch-eating Weevil in pine plantations	Apply a 1% (W/W) active FURADAN clay slurry (see below for preparation) to the roots of pine seedlings prior to transplanting. Treat seedlings by dipping roots or use any other suitable means which allows thorough coating. Keep roots moist until transplanted. Prepare the slurry as follows Add 1.6 ounces (2- $\frac{1}{2}$ table- spoons) of FURADAN 4 Flowable to one-half (0.5) gallons of water. Mix thoroughly. Add 2 pounds of pulverized kaolin clay (pH 4.5) to this suspen- sion. Mix thoroughly. This is sufficient to treat the roots of 150-200 seedlings. Adequate ventilation is re- quired for indoor treatment.

ACCEPTED
279-2876
JUL 19 1974

UNDER THE FEDERAL INSECURE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTERED
ED UNDER NO. SUBJECT
TO ATTACHED COMMENTS.

Note: The following information supporting this proposed new use is included in the attached document:

- 1) worker safety
- 2) efficacy data
- 3) plant safety data
- 4) wildlife
