### PRECAUTIONARY STATEMENTS

#### Hazards to Humans (& Domestic Animals)

**Caution**  
Avoid inhalation of spray mist. Harmful if swallowed. Do not induce vomiting. Call a Physician immediately.

See Other Panels for Additional Precautionary Information.

### Environmental Hazards

Fish and other aquatic life may be killed by this product. Keep out of lakes, streams, ponds, tidal marshes and estuaries. Do not apply when weather conditions favor drift from the areas treated. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### Storage and Disposal

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Pesticide, spray mixture or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. To dispose of container, triple rinse (or equivalent) and offer for recycling, reconditioning or disposal in approved landfill, or bury in a safe place. Do not cut or weld this container. Do not reuse 28 gallon drum. Return to drum reconditioner. Consult Federal, State or local disposal authorities for approved alternative procedures.

ACCEPTED

OCT 16 1980

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under  
EPA Reg. No. 279-2900

**Caution**

Use efficient equipment of the proper type. Avoid spraying during or immediately prior to hot or freezing weather (over 90° F or under 32° F), hot dry winds, rain or other unsuitable conditions; avoid over-spraying or double spraying. Plants should be sprayed only when in vigorous condition and when their moisture condition is suitable.

On deciduous trees do not mix with captan, phaltan, or sulfur or apply 30 days prior to or after a sulfur treatment.

**Mixing Directions**

Use only in equipment with sufficient agitation to keep spray thoroughly mixed. Be sure spray tank is clean. With agitator running; start filling tank with water; add oil when tank is about 1/2 full. Pump this mixture through the overflow and back into tank for about two minutes. If this mixture turns white, it indicates good emulsification. Fill the tank with water, adding other desired materials as tank is filling. If wetttable powders are used, add and thoroughly mix before adding oil. Observe all cautions and limitations on labeling of all products used in mixtures. Keep agitator running at all times. If an injector is used, first add 25 to 50 gallons of water to tank with engine running to provide good pressure. Put injector suction tube into the measured amount of spray oil, opening injector valve to allow the oil to be sucked into the tank, then fill the tank with water.

Do not use this material if it does not emulsify.

**Directions for Use**

Apply when pests are present and as recommended below. Do not use in undiluted form. Sensitive foliage may be injured.
