1/1

Code 3212, THIODAN 3 EC, EPA Reg. No. 279-2924

Request the pear psylla use on pears to be amended to read as follows:

Pears	Pear Psylla	Apply at the rate of 3 1/3 qts. actual in sufficient water to treat one acre. Use a minimum of 10 gallons/acre for serial application, 40 gallons/acre for semi-concentrate, and 300 gallons/acre for dilute. Apply when adults are first observed or nymphs are small and repeat to maintain control. Do not apply more than 5 times during the fruiting period or within 21 days of harvest. If no more than two applications are made during the fruiting period, may be applied within 7 days of harvest.
-------	-------------	---

Reference: The above use pattern was registered for Thiodan Miscible, EPA Reg. No. 279-1569 in September 1972.
