For Use On Horses and Ponies

Kills and Repels Horse Flies, Deer Flies, Stable Flies, Mosquitoes, Face Flies, Horn Flies, House Flies, Gnats, and Ticks

DIRECTIONS FOR USE

- Brush the animal thoroughly to remove loose dirt and dust.
- Prepare the appropriate dilution of Pyrenone Stabilene Horse Insecticide in the amount required for immediate use (about one quart per horse). Diluted Pyrenone Stabilene Horse Insecticide should be used within 24 hours.

To Kill and Repel House Flies, Horn Flies, Gnats and Mosquitoes:

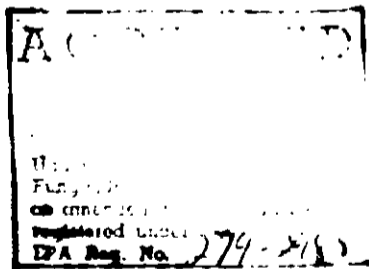

- Dilute 1 part Pyrenone Stabilene Horse Insecticide with 9 parts water or oil.

First, brush animal to remove excess dirt and dust. Moisten (but do not wet to the point of dripping) a soft cloth and rub over the hair. It is best to apply by rubbing against the hair growth. Give special attention to the legs, shoulders, shanks, neck and facial areas where flies most often are seen.

Only a light application is required. Avoid using an excessive amount on your horses. Do not wet skin.

After application, brush out thoroughly to bring out bright sheen on the coat.

Repeat daily or as required.

Net Contents - 1 quart

Horse

To Kill and Repel Horse Flies, Stable Flies, Deer Flies and Face Flies:

- Dilute 1 part Pyrenone Stabilene Horse Insecticide with 5 parts water or oil.
- Moisten (do not soak) a folded 12" square piece of turkish toweling with the dilution.
- Rub against, then with hair growth. Give special attention to facial areas, neck, legs, shoulders, and shanks where flies are most often seen. Avoid contact with eyes or nostrils. Apply to thoroughly moisten hair.
- If desired, the sheen of the coat may be enhanced by light brushing following application. For best results, apply Pyrenone Stabilene Horse Insecticide daily.

To Kill Attached Ticks:

- Using a dilution of 1 part Pyrenone Stabilene Horse Insecticide with 5 parts water or oil, daub directly on tick with a saturated cloth. Avoid contact with eyes or nostrils.

In HORSE BARN, STABLE AND TACK ROOMS:

To control flies, mosquitoes and gnats, dilute at the rate of 1 part concentrate to 4 parts water or oil and apply as a fog or fine mist, directing spray toward the ceiling and upper corners until the area is filled with mist using about 2 ounces per 1000 cubic feet of space. For best results, close doors and windows before spraying and keep them closed for ten to fifteen minutes. Vacate the area and ventilate before reoccupying. Repeat application as necessary.

Terms of sale or use: On purchase, use of this product by buyer and user agree to the following conditions:

Warranty: FMC warrants that this product, as of the time of sale by FMC, (1) conforms to the ingredient statement on the label and (2) is reasonably fit for the purposes set forth in the Directions for Use. Except as so warranted the product is sold as is. FMC makes no other warranty, express or implied.
