

[279-2991]

Directions For Use

Shake well before using. Remove protective cap, hold container upright, nozzle pointing away from you. With nozzle 10 to 12 inches from dog, spray evenly over the animal until the entire coat is lightly moisturized. Rub gently into coat. On long-haired dogs, ruffle the coat and spray against the lay of hair, spraying directly behind hand so that spray reaches skin. Dry dog with towel. After 10 minutes comb or brush coat. Repeat application if necessary. Spray bedding regularly.

For best results in controlling tick infestations, locate ticks and spray directly on them.

NOTE: Avoid spraying face and other sensitive areas. Do not treat or cause exposure of puppies less than four weeks old.

CAUTION: Harmful if swallowed or inhaled. Avoid breathing of spray mist. Avoid contact with skin; wash thoroughly after use. Avoid contamination of feed or foodstuffs.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130° F may cause bursting. Never throw container into fire or incinerator.

**CANINE
AEROSOL
INSECTICIDE**

A specially designed formulation that kills Fleas, Ticks, and Lice.

EPA Reg. No. 279-2991
EPA Est., 279-NY-1
