COMMAND 4 EC Herbicide
EPA Reg. No. 279-3053

SUPPLEMENTAL LABEL

Directions For Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

SUCCULENT PEAS

GENERAL INFORMATION

Command 4 EC selective herbicide must be utilized as a soil incorporated treatment for the control of annual grass and broadleaf weeds in peas.

Command 4 EC herbicide may be tank mixed with other herbicides registered for use in peas to broaden the weed control spectrum compared to the products applied alone. When applying mixtures of Command 4 EC plus other succulent pea herbicides, observe all cautions and limitations appearing on the labels of each product. Observe all Application Precautions, Rotational Guidelines and Replanting Instructions of each product's label when using tank mixes. Water or liquid fertilizer may be used as a carrier for Command 4 EC when applied alone, or when tank mixed with other succulent pea herbicides unless use directions specifically state otherwise.

REPLANTING INSTRUCTIONS

If initial seeding of peas fails to produce a stand, peas may be replanted in fields treated with Command 4 EC alone (or with recommended tank mixtures). Do not retreat field with a second application of Command 4 EC. When tank mixing with a labeled product refer to the replant instructions for that product. Do not replant treated fields with any crop (except peas, pumpkins or soybeans) at intervals which are inconsistent with the Rotational Guidelines on the product booklet.

Continued on reverse side.

IMPORTANT

This supplemental labeling contains directions for use of this product which do not appear on the package label. Follow instructions carefully. Read and carefully observe the precautionary statements and all other information appearing on the product label. This label must be in the possession of the user at the time of application.
