# Command 4 EC Herbicide

For Agricultural or Commercial Use Only  
NOT FOR SALE OR USE IN CALIFORNIA

EPA Reg. No. 279-3053

EPA Est. 279-

<b>Active Ingredient:</b>	<b>By Wt.</b>
2-(2-Chlorophenyl)methyl-4,4-dimethyl-3-isoxazolidinone	47.1%
<b>Inert Ingredients:</b>	52.9%
	100.0%

Contains xylene range aromatic solvents  
Contains 4 pounds of active ingredient per gallon  
U.S. Patent No. 4,405,357

## KEEP OUT OF REACH OF CHILDREN WARNING

### FIRST AID

**If in eyes:** Flush immediately with plenty of water. Get medical attention as soon as possible.

**If swallowed:** Drink promptly large quantities of milk or water. Avoid alcohol. Do not induce vomiting. Call a physician.

**If inhaled:** Remove to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention as soon as possible.

**If on skin:** Remove contaminated clothing. Wash skin with plenty of soap and water.

For Emergency Assistance Call Collect: (716) 735-3765

### PRECAUTIONARY STATEMENTS Hazards to Humans (and Domestic Animals)

**Warning**  
Causes eye injury (corneal opacity) that is temporary. Do not get in eyes or on clothing. Harmful if swallowed, inhaled, or absorbed through skin. Avoid breathing vapor or spray mist. Wear goggles or face shield when measuring, mixing or loading. Avoid contact with skin. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

**BEST AVAILABLE COPY**

### Environmental Hazards

Do not apply directly to water or wetlands. Do not apply when weather conditions favor drift from the area treated. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

See other panels for additional precautionary information.

**SPECIAL PRECAUTION**

Off-site movement of spray drift or vapor of this herbicide can cause leaf whitening or yellowing of sensitive plants. Prior to making applications, read and strictly follow all precautions and application instructions on this label.

### Physical/Chemical Hazards

### DIRECTIONS FOR USE

Read label of all herbicides used in combination with this herbicide. Do not apply this product to the same crop as specified on this label.

## STORAGE AND DISPOSAL

### Pesticide Storage

Do not freeze. Do not store below 40°F. If solid crystals are observed, warm the material to 60°F by placing container in warm location. Stir or rotate container periodically to redissolve solids.

Keep out of reach of children and animals. Store in original containers only. Store in a dry place. Carefully open containers. After partial use, replace lids and close tightly. Do not put concentrate or dilute material into food or drink containers. Do not contaminate other pesticide, fertilizer, water, food or feed by storage or disposal.

In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spills. Call FMC Collect (716) 735-3765.

To confine spill: Dike surrounding area or absorb with sand, cat litter or commercial clay. Place damaged package in a holding container. Identify contents.

### Pesticide Disposal

Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

### Container Disposal

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

### Returnable Refillable Sealed Containers

Do not rinse container. Do not empty remaining formulated product. Do not break seals. Return intact to point of purchase.

## IMPORTANT

### FAILURE TO OBSERVE THE APPLICATION PRECAUTIONS SECTION OF THIS LABEL MAY RESULT IN INJURY TO DESIRABLE VEGETATION

- Desirable plants including some species of trees, shrubs, flowers, agronomic crops, and fruits and vegetables are sensitive to Command 4 EC herbicide.
- Foliar contact with spray, drift or vapors may cause whitening of sensitive plants. Symptoms are generally temporary in nature but may persist on some plants.

## SPRAYER CLEANUP

Do not drain or flush equipment or container into water bodies or other plants, or in areas where their runoff may extend or in locations where the chemical may be washed or move into contact with their roots. Do not contaminate any body of water including irrigation water that may be used on other crops. Carefully follow sprayer clean up instructions noted below to prevent spray tank residues from damaging other crops.

Sprayer equipment should be thoroughly rinsed to remove residues of herbicide that may have been in the spray mixture. The steps below should be followed in the following order for sprayer equipment following application of Command 4 EC herbicide or tank mixes of Command 4 EC with other labeled products:

1. Drain any remaining spray solution from tank, pump, hoses and manifold and discard in an approved manner. (See Note that follows.)
2. Rinse in tank and filling line.
  - Thoroughly hose down with the inside walls of the spray tank with a quantity of water equal to 1/3 of the total tank capacity and operating the pump to circulate product through the sprayer system for 15 minutes.
  - Wash down with the outside surfaces of equipment.
  - Remaining residue will be removed from end nozzle or wand, hose section and a low pressure section of rinsate should be flushed complete through the nozzle or rinsate while flushing.
3. Thoroughly drain remaining rinsate solution from tank, pump and hoses. Combine with beam flushings and dispose of all rinsates from the final rinsing in an approved manner. (See Note that follows.)
  - When switching from water to herbicide application or from crop or liquid fertilizer to an agronomic spray, water or liquid fertilizer should be flushed through the tank, pump, hoses and beam prior to the next use. In preparation for a liquid fertilizer application in an agronomic situation, use the following steps as a final cleanup procedure:
    1. Remove the remaining liquid fertilizer and flush with the water tank and wash the pump, hoses and wand with the water tank and fertilizer.
4. Remove the remaining liquid fertilizer and flush with the water tank and wash the pump, hoses and wand with the water tank and fertilizer.

to the water tank and wash with the spray tank at second rinsing. (See Note that follows.)

If the next use of the sprayer will be for applying a herbicide other than Command 4 EC, or any crop for which Command 4 EC is registered, rinsate from the second rinsing may be utilized by diluting with the water for the first pesticide load.

### HOWEVER

If the next use of the sprayer will be a postemergence applied pre-herbicide on any crop, dilute rinsate solution from this second rinsing. Before rinsate solution for use only with a soil incorporated pesticide to be applied on a crop for which Command 4 EC is registered, flush tank (after draining second rinsate solution) in accordance with post-emergence product label directions.

**NOTE:** Dispose of excess spray mixture and/or rinsate from first tank rinsing by application and incorporation to cropland as described on the label. If excess spray mixture and/or rinsate from first rinsing cannot be disposed of according to label instructions, dispose of in compliance with local, state and Federal guidelines. Contact your state pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA regional office for guidance.

## GENERAL MIXING INSTRUCTIONS

Care must be taken when mixing Command 4 EC herbicide. Avoid mixing in areas adjacent to desirable plants. (See Section headed "IMPORTANT")

**Command 4 EC Alone:** Mix Command 4 EC with water or liquid fertilizer in the following manner. Fill the spray tank one-half to three-fourths full with water or liquid fertilizer, add the proper amount of Command 4 EC, then add the rest of the water or liquid fertilizer. Provide sufficient agitation during mixing and application to maintain a uniform spray mixture.

**Tank Mixtures:** Fill spray tank one-fourth to one-third full with water with agitator operating, add the recommended amount of ingredients using the following order: dry formulations (e.g., wettable powders, dry flowables) first; liquid suspensions (e.g., flowables) next and finally, liquids (e.g., EC's). Mix thoroughly and fill tank one-half full; continue agitation. Add Command 4 EC herbicide to tank while maintaining agitation. Complete filling the sprayer tank with water. Where use of a surfactant is recommended, add as the last ingredient to the spray tank. Maintain agitation during filling, mixing and application. When using drift-reducing agents, follow specific product label instructions for order of addition to spray tank.

**Fertilizer Spray Mixtures:** Applications of Command 4 EC alone or with recommended tank mixtures in conjunction with fertilizer solutions may be used unless use directions specifically state otherwise. Spray quantities should be tested for compatibility by the following procedure before a large tankful is mixed:

1. Fill a pint of water with the recommended amount of Command 4 EC.
2. Add the appropriate amount of herbicide based on the table below. If more than one product is to be used, add each separately using the following sequence: dry formulations (e.g., wettable powders, dry flowables) first; liquid suspensions (e.g., flowables) next and finally, liquids (e.g., EC's).

Herbicide	Rate Acre	Amount To Be Added Per Pint of Fluid Fertilizer
Wettable Powders	1.0 - 2.0	1 level teaspoon
Flowables	1.0 - 2.0	1 1/2 level teaspoons
Dry Flowables	3.0 - 4.0	2 level teaspoons
Dry Granules	3.0 - 4.0	4 level teaspoons
Emulsifiable Concentrates	1.0 - 2.0	1 level teaspoon
Liquids	1.0 - 2.0	2 level teaspoons
Flowables	1.0 - 2.0	3 level teaspoons

13. Mix in a spray volume of 20 GPM for lower or higher spray volume adjust to 10 GPM or more as required.

3. Close lid and shake well.
4. Watch mixture for separation. Allow agitate for 5 minutes and apply after 30 minutes. If test mixture contains water, rain or other moisture can be removed and used for 24 hours. If test mixture separates, do not use. It may become unusable if the mixture is allowed to settle and be used in the volume and spray.

If the mixture is completely separated, do not apply to a field. Drain the tank and hose and wash the pump and wand.

1. **Command 4 EC Alone:** Fill with 2 1/2 pints of water or fertilizer. Spray tank of 100 gals. with agitator running. Maintain agitation during application.

- 2) **Command 4 EC plus Tank Mixtures:** Dilute individual products with two (2) parts of water, then add to the spray tank of fertilizer, while maintaining agitation, using the following order—slurry of dry formulations (wettable powders, dry flowables) first, diluted liquid formulations (ECs, flowables) second. Continue agitation during application.

## APPLICATION PRECAUTIONS

**Geographic Restrictions:** Command 4 EC must be applied *only* as a soil incorporated treatment in the following states, unless there is an approved SLN (24C) for counties within these states:

Connecticut	Maryland	Ohio
Delaware	Massachusetts	Pennsylvania
Illinois	Michigan	Rhode Island
Indiana	Minnesota	Vermont
Iowa	New Hampshire	Virginia
Kentucky	New Jersey	West Virginia
Maine	New York	Wisconsin

\*Does Not Apply to Fallow Land Applications or Counties for which an Approved SLN (24C) is on File

**For Soil Incorporated Applications:**  
See Geographic Restrictions above

Do not apply Command 4 EC within 1,000 feet of the areas listed below:

- Towns and Subdivisions
- Commercial Vegetable Production\*
- Commercial Fruit Production
- Commercial Nurseries
- Commercial Greenhouses

\*except sweet corn

Plants such as the following may show symptoms of foliar whitening or yellowing if contacted by Command 4 EC herbicide. It is recommended that, prior to application, adjacent properties be checked and that spraying within 100 feet of such desirable plants be avoided.

<b>Trees (Deciduous)</b>	<b>Trees (Evergreen)</b>
Apple (inc. fruit & ornamental types)	Fir species
Ash (Green, White Mountain)	Spruce species
Basswood	<b>Shrubs &amp; Vines:</b>
Boxelder	Azalea
Cataipa	Burningbush
Cherry (inc. fruit & ornamental types)	(Winged Eucalyptus)
Colonwood	Grape
Elm	Honeysuckle
Ginkgo	Roses
Hackberry	Yew
Mulberry	<b>Agronomic Crops:</b>
Peach	alfalfa
Pear (inc. fruit & ornamental types)	Oats
Pecan	<b>Vegetable and Flower plants</b>
Poplar	<b>Others:</b>
Russian olive	Ferns
Tree of Heaven	Herbs
Tulip tree	Strawberry
Walnut trees	Raspberry
Willow species	Blackberry

Apply Command 4 EC herbicide only to soil that will be soil incorporated. Do not apply Command 4 EC herbicide to bare soil areas including lawns, walks, driveways, etc. Do not apply to

**For Preemergent Applications:** See Geographic Restrictions above

Except as restricted above (see Geographic Restrictions), Command may be used as a preemergent soil applied treatment without incorporation, however, additional precautions, beyond those required for a soil incorporated treatment, must be taken as follows:

Do not apply Command 4 EC within 1,500 feet of the following areas: Towns and Subdivisions, Commercial Fruit or Vegetable Production, Commercial Greenhouses or Nurseries

Prior to application, adjacent properties must be checked and spraying within 1,500 feet of desirable plants must be avoided

\*except sweet corn

## SPRAY DRIFT PRECAUTIONS

Non-target spray drift of Command 4 EC herbicide should be avoided to prevent whitening of desirable vegetation. Drift is influenced by many factors which include wind speed, spray pressure, particle size, nozzle type, and boom height.

- Do not apply when weather conditions favor drift. If wind speeds exceed 10 miles per hour, a drift reducing additive must be used.
- A minimum spray volume of 10 gallons per acre is recommended with appropriate nozzle types and sizes that produce coarser sprays.
- The use of agriculturally approved drift reducing additives is recommended for application volumes of 15 to 40 gallons per acre when spraying in the proximity of desirable plants (see list above).
- The use of an agriculturally approved drift reducing additive is required at finished spray volumes of 10 to 15 gallons per acre.
- Use minimum nozzle pressure and boom height while maintaining uniform spray pattern.
- Do not exceed 40 psi spray pressure.
- Selection and proper use of spray equipment is critical in minimizing spray drift. The following table suggests pressures, flow rates, and nozzle sizes for drift reduction using various nozzle types.

## Suggested Nozzle Types, Minimum Size and Recommended Pressure Ranges for Minimizing Drift

Nozzle	Pressure Range (PSI)	Minimum Flow Rate Within Pressure Range (GPM)	Minimum Nozzle Size
Flat-fan	15-30	0.3	#41
LP-Flat-fan	10-25	0.3	#3
Even flat-fan*	15-30	0.3	#4
Flood	10-25	0.3	#2.5†
Whirl chamber	5-20	0.3	#1
Raindrop	15-40	0.15	#2
Wide angle full cone	15-40	0.3	#1

\*Refers to tip numbers 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

†Recommended for banded application.

**ROTATIONAL CROPPING PRECAUTIONS:** Temporary whitening or yellowing of leaves may occur on approved rotational crops where undesirable soil residues of Command 4 EC herbicide exist. The following conditions may result in undesirable soil residues and greater potential for injury to rotational crops:

- Exceeding label recommended rates.
- Overapplication resulting from use of worn nozzles, excessive overlapping of spray swaths, failure to shut off spray boom when turning round row areas, or use of a stepping sprayer.

Refer to Rotational Guidelines and replanting instructions of specific crops for additional crop planting information.

## SPECIAL PRECAUTION

Off-site movement of spray drift is possible. Do not apply Command 4 EC herbicide in areas where wind direction is likely to carry spray drift to adjacent properties. Prior to making application, check for wind direction, wind speed, and apply downwind of adjacent properties.

## GENERAL APPLICATION INSTRUCTIONS

Do not apply aerially or through irrigation equipment

### Ground Applications

**Broadcast or Banded Applications:** Apply Command 4 EC herbicide to soil that will be soil incorporated. Do not apply Command 4 EC herbicide to bare soil areas including lawns, walks, driveways, etc. Do not apply to

**BEST AVAILABLE COPY**

agriculturally approved drift reducing additive is required at finished spray volumes of 10 to 15 gallons per acre. Use nozzles suitable for broadcast or banded application of herbicide. Control spray rates for spray drift out of the target area than the spray rate. See ABBE, ABBE, and ABBE, Section for specific information on drift reduction spray drift. For Command 4 EC tank mixtures with wettable powder or dry fertilizer formulations, nozzle diameter and diameter should be no more than 1/8 inch.

Banded Application: Use the rates and volume in table 11 by using the following formula:

Band width inches	Broadcast Rate Per Acre	Band rate per acre
Band width inches	Broadcast Volume Per Acre	Band volume per acre

Follow broadcast minimum gallonage requirements adjusted to band width. Do not exceed 40 psi spray pressure.

Refer to Spray Drift Precautions for suggested pressures, flow rates and nozzle sizes for drift reduction using various nozzle types. For banded applications an even flat-fan nozzle is recommended.

**Soil Incorporated Application:** Apply Command 4 EC to the soil surface and uniformly incorporate. Select equipment suited for proper incorporation. **Shallow incorporation normally results in better weed control than a deeper incorporation.**

In states where soil incorporation is required (see Geographic Restrictions) application and immediate incorporation to a maximum depth of 3 inches is required unless the soil is dry. On dry soils, incorporation to a maximum depth of 3 inches must be completed within 6 hours of Command 4 EC herbicide application.

Soil must be in good till to allow for thorough mixing of the soil. Application to wet soils will increase the potential for off-site movement of Command 4 EC herbicide vapors and may result in poor soil incorporation and unsatisfactory weed control.

## INCORPORATION EQUIPMENT

### ONE PASS INCORPORATION

#### Suggested Implements

For one pass incorporation use C or S shank field cultivators equipped with a leveling device such as a spike or coil line harrow or rolling basket attachment. Field cultivator must have 3 or 4 rows of sweeps spaced at intervals of 7 inches or less and staggered so that no soil is left undisturbed. Equipment design, including any drag attachments, must be adequate to avoid soil clumps which may result in stressed or reduced weed control. The implement should be operated at a depth of 2 to 3 inches and a minimum speed of 4 mph.

Command 4 EC equipment may use a more large device in place and used as a single tool should be operated at a depth of 2 to 4 inches and a minimum speed of 6 mph.

PTO drive sled bed preparation equipment should be set to cut 2 inches deep and operated at 4 mph or less.

### TWO PASS INCORPORATION

#### Suggested Implements

When using two pass incorporation, the second pass should be at an angle to the first pass.

Disc set to cut 3 to 4 inches deep at 4 to 6 mph. Blade should be less than 20 inches in diameter and spaced 9 inches or less apart.

Rolling cultivator set to cut 2 to 3 inches deep at 6 to 8 mph, use on coarse or medium textured soils only.

Field cultivator with 3 to 4 rows of sweeps spaced at 7 inches or less and set to cut 3 inches deep at 5 mph or greater.

#### Cultivation After Planting

Soil treated with Command 4 EC may be shallow cultivated in any field or hand held without reducing the weed control activity of Command 4 EC. Do not cultivate deeper than the Command 4 EC treated layer of soil since this may bring untreated soil to the surface and poor weed control may result.

## COMMERCIAL IMPREGNATION AND APPLICATION OF COMMAND 4 EC ON DRY BULK FERTILIZERS

Command 4 EC herbicide may be impregnated on dry bulk fertilizers. When applied as directed, Command 4 EC dry bulk fertilizer mixtures provide weed control equivalent to that provided by the same rates of Command 4 EC in water.

The Command 4 EC fertilizer mixture must be stored in a dry, well-ventilated area listed under Geographic Restrictions of the Application Precautions section of the label.

**Impregnation:** Apply using a minimum of 200 pounds of dry bulk fertilizer per acre and up to a maximum of 450 pounds per acre with the recommended amount of Command 4 EC herbicide per acre. Use a good rotary drum mixer or a similar type of covered blender equipped with suitable spray equipment. The spray nozzle(s) should be positioned to provide a uniform line spray pattern over the tumbling fertilizer to thorough coverage. The physical properties of fertilizers vary particularly in liquid absorptive capacity. When absorptivity is sufficient, simple spray impregnation of the fertilizer with Command 4 EC provides a satisfactory dry mixture. If the absorptive capacity is inadequate, use of a highly absorptive powder is required to provide a dry flowable mixture. Murex Co. (Johns-Manville Product Corporation) is a recommended absorptive powder. Generally less than 2% by weight of Murex E is required. **DO NOT** impregnate Command 4 EC onto straight coated ammonium nitrate or straight limestone because these materials will not absorb the herbicide. Dry fertilizer blends containing mixtures of ammonium nitrate or limestone may be impregnated with Command 4 EC.

The amount of Command 4 EC actually required in the preparation of individual fertilizer mixtures should be determined carefully for each production operation. This is necessary to ensure that the amount of pesticide actually contained in the mixture applied to the soil represents the correct rate of use. Bulk fertilizer impregnated with Command 4 EC herbicide should be applied immediately, not stored. Care should be taken to ensure spreading procedures in the field do not place fertilizer treated with Command 4 EC in areas which cannot be incorporated, if incorporation is required within the Geographic Restrictions of this label.

Ar state regulations, labeling, etc., of the mixtures are the responsibility of the seller.

For those rates not listed in the following table, calculate the amount of Command 4 EC to be impregnated on a ton of dry bulk fertilizer using the following formula:

$$\frac{\text{2000}}{\text{pounds dry fertilizer per acre}} \times \frac{\text{PINTS of Command per acre (recommended rate for soil texture)}}{\text{PINTS of Command per ton of fertilizer}}$$

2000	PINTS of Command	PINTS of
pounds dry	per acre	Command per ton
fertilizer	(recommended rate	of fertilizer
per acre	for soil texture)	

## RATE CHART FOR IMPREGNATION OF DRY BULK FERTILIZERS WITH COMMAND 4 EC HERBICIDE

### PINTS OF COMMAND 4 EC PER TON OF FERTILIZER

Fertilizer Rate lbs. Acre	Command 4 EC Rate Per Acre		
	1 1/2 pts (75 lbs A.I.)	2 pt (1 lb A.I.)	2 1/2 pts (125 lbs A.I.)
200	15	20	25
250	12	16	20
300	10	13	16
350	8	11	14
400	7	10	12
450	6	9	11

If fertilizer materials are excessively dusty, use diesel oil or other suitable additive to reduce dust prior to impregnation. As dusty fertilizers will result in poor distribution during application. Crop injury and/or poor weed control may occur where the impregnated fertilizer is not uniformly applied.

## SPECIAL PRECAUTIONS FOR DRY BULK FERTILIZER IMPREGNATION AND APPLICATION WITH COMMAND 4 EC

- All equipment used to apply Command 4 EC should be thoroughly cleaned immediately after use to ensure the containment of results which could cause injury to non-target species or desirable vegetation. Refer to Sprayer Cleaning section for additional details and disposal instructions.
- Equipment used to physically transport Command 4 EC treated fertilizers including boot loaders, conveyors, bins, etc., should be covered to prevent loss of fine particles and subjected to clean-up procedures previously described.
- Mixing of Command 4 EC herbicide and dry fertilizer should be conducted in a blender which will ensure that a sterile particle is not present in the final mixture.
- Bulk containers should be tightly covered when the product is being transported and applied to reduce chances of formation of a dust cloud in product bins.
- It is recommended that Dry Bulk Fertilizer impregnation operations using Command 4 EC not be conducted within a mile of residential areas or areas where Command 4 EC simulant or general vegetation would be tolerated.

**BEST AVAILABLE COPY**

# COMMAND GEOGRAPHICAL AREAS

## Rate, Weed Control, and Crop Rotation

Southern area includes Missouri bottomland, which incorporates the following counties: Butler, Dunklin, Mississippi, New Madrid, Pemiscot, Scott, and Stoddard.

### SOYBEANS

#### GENERAL INFORMATION

Command 4 EC herbicide may be utilized as a preemergent soil applied or soil incorporated treatment for the control of annual grass and broadleaf weeds in soybeans.

Command 4 EC must be soil incorporated in the following states unless an approved 24(C) is on file for counties within that state (check with your local dealer): Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, Wisconsin.

Command 4 EC herbicide may be tank mixed with other herbicides to broaden the weed control spectrum compared to the products applied alone. Command 4 EC may be tank mixed with Canopy, Dual, Lassol, Lurox, Lurox Plus, Maxone, Preview, Prowl, Scepter, Sencor, Sonalan, Squadron, Trelan, Tri-Scept, or other registered herbicides. Observe all precautions, instructions.

Use rotational cropping guidelines of each product's label when tank mixing. Water or liquid fertilizer may be used as a carrier for Command 4 EC when applied alone, or when tank mixed with the herbicides listed above, unless use directions specifically state otherwise.

#### REPLANTING INSTRUCTIONS

If initial seeding of soybeans fails to produce a stand, soybeans may be replanted in fields treated with Command 4 EC alone (or with recommended tank mixtures). Do not retreat field with a second application of Command 4 EC. When tank mixing with a labeled product refer to the soybean replant instructions for that product. Do not replant treated fields with any crop at intervals which are inconsistent with the Rotational Guidelines on this label.

\* Partially Controlled  
 Higher label rate (a minimum of 2 pints per acre) are recommended for fields that have previously been in conservation programs, or where heavy weed pressure is anticipated. Select lower to higher rates based on lighter to heavier soil types. For fields that have previously been in conservation programs, a minimum application rate of 2 1/2 pints per acre for cocklebur or common ragweed control is recommended.

\*\* Use in AR, LA, MS, TX, OK, or, — for high pressure and heavy soils use 2.5 pints  
 For heavy weed pressure or heavy soils use 1.25 pints per acre to control Velvetleaf or Spurred Anoda.  
 \*\*\* For control of Itchgrass, do not incorporate Command 4 EC. For high weed pressure and heavy soils use 2.5 pints.

NOTE: When using Command 4 EC more than 30 days prior to planting, the highest label rate should be used.

**ROTATIONAL CROP GUIDELINES**

Rotate to crops as listed below; otherwise crop injury may occur.

1.0 PT. (0.50 LB. A.I.)	1.5 to 2.0 PT. (0.75 to 1.0 LB. A.I.)	2.5 PT. (1.25 LB. A.I.)
<b>ANYTIME</b> Soybeans Pumpkins Peas	<b>ANYTIME</b> Soybeans Pumpkins	<b>ANYTIME</b> Soybeans
<b>9 MONTHS</b> Corn —Field —Pop —Seed —Sweet Cotton Cucurbits Dry Beans Peanuts Potatoes Pumpkins Rice Snap Beans Sorghum Sugar Beets Sweet Potatoes Tobacco Tomatoes (Transplanted)	<b>9 MONTHS</b> Same as 1.0 pint plus Peas	<b>9 MONTHS</b> Same as 1.5 to 2.0 pints plus Pumpkins
<b>12 MONTHS</b> All crops	<b>12 MONTHS</b> All crops	<b>12 MONTHS</b> All crops

Cover crops, however, may be planted anytime but stand reductions may occur in some areas. Do not graze or harvest for food or feed cover crops planted less than 9 months after Command 4 EC treatment. Do not allow livestock to graze on treated soybean vines or feed treated vines or vine trash to livestock.

**ALS AVAILABLE COPY**

**COMMAND 4 EC HERBICIDE**  
**APPLIED IN COMBINATIONS FOR SOYBEANS**

Command 4 EC herbicide may be tank mixed with other soybean herbicides to broaden the weed control spectrum compared to the product applied alone. In the sections that follow, FMC recommends a combination of products and application rates to broaden weed control spectrum. FMC makes no claims as to weed control for any combination of rates or products other than as recommended in this label. Additional recommendations for rate combinations with other herbicides not included in the following sections may become available subsequent to the date of publication for this label. Please check with your dealer for more recent FMC technical bulletins and label supplements. When applying mixtures of Command 4 EC with other herbicides, observe all precautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and reentry instructions of each product's label when using tank mixes.

**Command 4 EC Herbicide plus Canopy Herbicide—**  
**Northern & Southern Areas**

Tank mix combination for broadening weed control spectrum

Soil Texture	Broadcast Rates Per Acre <sup>1</sup>		
	Command North	Command South	Canopy
(1.1 to 5% Organic Matter)			
Coarse (light) Soils (loamy sand, sandy loam)	1 to 2 pints	2 to 2 pints	4 to 6 oz
Medium Soils (loamy silt, silt loam, sandy clay, sandy clay loam)	1 to 2 pints	2 to 2 pints	5 to 8 oz
Fine (heavy) Soils (silt clay, clay, silty clay loam, clay loam)	1 to 2 pints	2 to 2 pints	6 to 8 oz

<sup>1</sup> See flowchart for application rates based on soil texture and organic matter content. For heavy weed pressure or heavy soils use 1.25 pints per acre to control Velvetleaf or Spurred Anoda.  
 \*\* Use in AR, LA, MS, TX, OK, or, — for high pressure and heavy soils use 2.5 pints.  
 \*\*\* For control of Itchgrass, do not incorporate Command 4 EC. For high weed pressure and heavy soils use 2.5 pints.

**WEEDS CONTROLLED**

Grass Weeds	Broadleaf Weeds
All species listed under Command Applied Alone Weeds Controlled section	All species listed under Command Applied Alone Weeds Controlled section plus the following: Cocklebur** Pigweed (Redroot, Smooth, Hairy, sesbania) Morningglory* (annual, leaf, pitted, pitted to Sicklepod) Cupressifol* (hophornbeam)

\* Partially Controlled  
 \*\* Large weeds with taproots may require a follow-up application of glyphosate or other soil-applied herbicide.

**Command 4 EC Herbicide plus Dual 8 E Herbicide—**  
**Northern & Southern Areas**

Tank mix combination for broadening weed control spectrum

Soil Texture	Broadcast Rates Per Acre <sup>1</sup>		
	Command North	Command South	Dual 8 E
(1.1 to 5% Organic Matter)			
Coarse (light) Soils (loamy sand, sandy loam)	1 to 2 pints	2 to 2 pints	1 to 1.5 oz
Medium Soils (loamy silt, silt loam, sandy clay, sandy clay loam)	1 to 2 pints	2 to 2 pints	1 to 1.5 oz
Fine (heavy) Soils (silt clay, clay, silty clay loam, clay loam)	1 to 2 pints	2 to 2 pints	2 to 2.5 oz

**WEEDS CONTROLLED**

Grass Weeds:

All species listed under Command Applied Alone Weeds Controlled section plus the following

- Red Rice\*
- Vitchgrass
- Nutsedge

\* Use higher rate in areas with heavy traffic

When applying mixtures of Command 4 EC plus Duo observe all cautions and limitations appearing on the labels of each product. Observe all Application Precautions, Rotational Crop Guidelines and Replanting Instructions of each product's label when using tank mixtures.

Broadleaf Weeds

All species listed under Command Applied Alone Weeds Controlled section plus the following

- Pigweed
- Cornflower
- Black Nightshade

**Command 4 EC Herbicide plus Lasso\* or Lasso\* Micro-Tech—Northern & Southern Areas**

A tank-mix combination of Command 4 EC herbicide and Lasso or Lasso Micro-Tech herbicide will broaden the weed control spectrum compared to either ~~herbicide~~ used alone

**Product Broadcast Rates Per Acre**

Soil Texture	Command		Lasso* Lasso Micro-Tech
	North	South	
Coarse (light) Soils (loamy sand, sandy loam)	1 1/2 to 2 pints	2 to 2 1/2 pints	2 to 2 1/2 quarts
Medium Soils (loam, silt, silt loam, sandy clay, sandy clay loam)	1 1/2 to 2 pints	2 to 2 1/2 pints	2 to 3 quarts
Fine (heavy) Soils (silty clay, clay loam, silty clay loam, clay)	1 1/2 to 2 pints	2 to 2 1/2 pints	2 1/2 to 3 quarts

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types (e.g. sand, loamy sand, sandy loam) within a textural group

**WEEDS CONTROLLED**

Grass Weeds

All species listed under Command Applied Alone Weeds Controlled section

Broadleaf Weeds

All species listed under Command Applied Alone Weeds Controlled section plus the following

- Carpenterweed
- Pigweed
- Black Nightshade

When applying mixtures of Command 4 EC herbicide plus Lasso or Lasso Micro-Tech, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**COMMAND 4 EC HERBICIDE PLUS LOROX\***

A preemergence tank mix combination of Command 4 EC herbicide and LoroX herbicide will broaden the weed control spectrum compared to either product alone

The tank mix combination may not be incorporated. Where Command 4 EC must be incorporated (see Geographical Restrictions), apply LoroX as an overlay treatment.

**Broadcast Rates Per Acre\***

Soil Texture†	Command		LoroX DF†
	North	South	
Coarse (light) Soils (loamy sand, sandy loam)	1 1/2 to 2 pints	2 to 2 1/2 pints	4 1/2 to 5 pints
Medium Soils (loam, silt, loam, sandy clay, sandy clay loam)	1 1/2 to 2 pints	2 to 2 1/2 pints	5 to 5 1/2 pints
Fine (heavy) Soils (silty clay, clay loam, silty clay loam, clay)	1 1/2 to 2 pints	2 to 2 1/2 pints	5 to 5 1/2 pints

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types (e.g. loam, silt loam, sandy clay, sandy clay loam) within a textural group

† Plant seed at least 1 1/2 inches deep

‡ deep in which corn, soybeans may result. Refer to LoroX label for other planting and application precautions. one pint of LoroX DF equals one quart of LoroX DF, use equivalent rates

Do not use on sand, gravel, soils or exposed subsoils or soils with less than 1% organic matter. Use on, or, clay, sand with over 1% organic matter

**WEEDS CONTROLLED**

Grass Weeds:

All species listed under Command Applied Alone Weeds Controlled section

Broadleaf Weeds

All species listed under Command Applied Alone Weeds Controlled section plus the following

- Carpenterweed
- Chickweed

- Pigweed (Redroot pigweed) (Smooth pigweed)
- Wild mustard
- Wild radish

When applying mixtures of Command plus LoroX observe all cautions and limitations appearing on the labels of each product. Observe Application Precautions, Rotational Crop Grazing and Feeding Restrictions and Replanting Instructions sections of this label when using tank mixtures

**COMMAND 4 EC HERBICIDE PLUS LOROX PLUS**

A preemergence tank mix combination of Command 4 EC herbicide and LoroX herbicide will broaden the weed control spectrum compared to either product alone

The tank mix combination may not be incorporated. Where Command 4 EC must be incorporated (see Geographical Restrictions), apply LoroX as an overlay treatment.

**Broadcast Rates Per Acre†**

Soil Texture	Command		LoroX Plus
	North	South	
Coarse (light) Soils (loamy sand, sandy loam)	1 1/2 to 2 pints	2 to 2 1/2 pints	9 to 12 oz
Medium Soils (loam, silt, loam, sandy clay, sandy clay loam)	1 1/2 to 2 pints	2 to 2 1/2 pints	10 to 12 oz
Fine (heavy) Soils (silty clay, clay loam, silty clay loam, clay)	1 1/2 to 2 pints	2 to 2 1/2 pints	11 to 12 oz

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types (e.g. loam, silt loam, sandy clay, sandy clay loam) within a textural group

† Plant seed at least 1 1/2 inches deep

‡ deep in which corn, soybeans may result. Refer to LoroX label for other planting and application precautions

Do not use on sand, gravel, soils or exposed subsoils or soils with less than 1% organic matter. Use on, or, clay, sand with over 1% organic matter

**WEEDS CONTROLLED**

Grass Weeds:

All species listed under Command Applied Alone Weeds Controlled section

Broadleaf Weeds

All species listed under Command Applied Alone Weeds Controlled section plus the following

- Carpenterweed
- Cornflower
- Mustard
- Pigweed (Redroot, smooth)
- Black Nightshade
- Trifolium (annual, biennial, sterile)
- Trifolium (perennial)
- Grass Pigweed

\* Partially Continuous

† Large seed weed species (e.g. redroot pigweed, smooth pigweed, black nightshade) with saturated soils may require an overlay or an application rate adjustment in the spring and summer

When applying mixtures of Command plus LoroX observe all cautions and limitations appearing on the labels of each product. Observe Application Precautions, Rotational Crop Grazing and Feeding Restrictions and Replanting Instructions sections of this label when using tank mixtures.

**BEST AVAILABLE COPY**

**Command 4 EC herbicide plus Metribuzin (Sencor® or Lexone®)—Northern Area Only**

A tank mix combination of Command 4 EC herbicide and metribuzin will broaden the weed control spectrum compared to either ~~product~~ used alone

Soil Texture**	Broadcast Rates Per Acre†	
	Command	Sencor DF® Lexone DF
Coarse (light) Soils (loamy sand**, sandy loam)	1½ to 2 pints	¼ to ½ lb
Medium Soils (loam, silt, silt loam, sandy clay, sandy clay loam)	1½ to 2 pints	¼ to ½ lb
Fine (heavy) Soils (silty clay, clay loam, silty clay loam, clay)	1½ to 2 pints	¼ to ½ lb

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types (e.g., loam, silt loam, sandy clay, sandy clay loam) within a textural group

\*\* For pints Sencor 4 or Lexone 4L, multiply pounds DF by 1.5

\*\*\* Do not use Command 4 EC in combination with metribuzin on soils with less than 0.5% organic matter, on sand, or on loamy sand with less than 2% organic matter, or on soils having a calcareous surface area or a pH of 7.5 or higher as metribuzin injury to soybeans may occur

**NOTE:** Metribuzin injury to soybeans may occur under excess moisture conditions, cool weather, or compacted soil areas

**WEEDS CONTROLLED**

**Grass Weeds**

All species listed under Command Applied Alone Weeds Controlled section

**Broadleaf Weeds**

All species listed under Command Applied Alone Weeds Controlled section, plus the following:  
Carpetweed  
Pigweed (Redroot, Smooth)  
Wild mustard

† Use the higher rate of metribuzin for a given soil type

When applying mixtures of Command 4 EC plus metribuzin, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures

**Command 4 EC herbicide plus Metribuzin (Sencor® or Lexone®)—Southern Area Only**

A tank mix combination of Command 4 EC herbicide and metribuzin will broaden the weed control spectrum compared to either ~~product~~ used alone

Soil Texture**	Broadcast Rates Per Acre†	
	Command	Sencor DF® Lexone DF
Coarse (light) Soils (loamy sand**, sandy loam)	2 to 2½ pints	¼ to ½ lb
Medium Soils (loam, silt, silt loam, sandy clay, sandy clay loam)	2 to 2½ pints	¼ to ½ lb
Fine (heavy) Soils (silty clay, clay loam, silt, clay, loam, clay)	2 to 2½ pints	¼ to ½ lb

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types (e.g., loam, silt loam, sandy clay, sandy clay loam) within a textural group

\*\* For pints Sencor 4 or Lexone 4L, multiply pounds DF by 1.5

\*\*\* Do not use Command 4 EC in combination with metribuzin on soils with less than 0.5% organic matter, on sand, or on loamy sand with less than 2% organic matter, or on soils having a calcareous surface area or a pH of 7.5 or higher as metribuzin injury to soybeans may occur. Use ¾ to 1¼ lb of metribuzin on silty clay and heavy clay soils of the Mississippi Delta

**NOTE:** Metribuzin injury to soybeans may occur under excess moisture conditions, cool weather, or compacted soil areas

**WEEDS CONTROLLED**

**Grass Weeds**

All species listed under Command Applied Alone Weeds Controlled section

**Broadleaf Weeds**

All species listed under Command Applied Alone Weeds Controlled section, plus the following:  
Carpetweed  
Hemp sesbania (coffee-weed)  
Pigweed (Redroot, Smooth)  
Wild mustard  
Sicklepod

† Reduced Competition

\*\* Use the higher rate of metribuzin for a given soil type

When applying mixtures of Command 4 EC plus metribuzin, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures

**Command 4 EC Herbicide plus Preview®—Northern Area Only**

A tank-mix combination of Command 4 EC herbicide and Preview herbicide will broaden the weed control spectrum compared to either ~~product~~ used alone

Soil Texture	Broadcast Rates Per Acre	
	Command	Preview®
Coarse (light) Soils (loamy sand, sandy loam)	1½ to 2 pints	8 to 10 oz
Medium Soils (loam, silt, silt loam, sandy clay, sandy clay loam)	1½ to 2 pints	8 to 10 oz
Fine (heavy) Soils (silty clay, clay loam, silty clay loam, clay)	1½ to 2 pints	8 to 10 oz

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types (e.g., loam, silt loam, sandy clay, sandy clay loam) within a textural group

Do not use Command 4 EC in combination with Preview on soils with less than 0.5% organic matter, on loamy sands with pH greater than 8.0, or on soils having a calcareous surface area. Preview injury to soybeans may occur

**WEEDS CONTROLLED**

**Grass Weeds**

All species listed under Command Applied Alone Weeds Controlled section

**Broadleaf Weeds**

All species listed under Command Applied Alone Weeds Controlled section, plus the following:  
Carpetweed  
Cage-apple  
Copperleaf, nophornbeam  
Mustards  
Pigweed  
Cockspur  
Sunflower  
Burdock  
Grand Ragweed  
Morning glory (Annual, Turleya), Pitted Erigeron

**NOTE:** Control of morning glory, sunflower, cockspur, and giant ragweed may be erratic depending on soil moisture and depth of weed seed in the soil, and the amount and timing of soil moisture. Control may be improved with timely cultivation

When applying mixtures of Command 4 EC plus Preview, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures

**BEST AVAILABLE COPY**

**Command 4 EC Herbicide plus Prowl\* 4 EC Herbicide—  
Northern & Southern Areas**

A tank-mix combination of Command 4 EC and Prowl will broaden the weed control spectrum of either product used alone

Broadcast Rates Per Acre

Soil Texture	Command		Prowl 4 EC*
	North	South	
Coarse (light) Soils (loamy sand, sandy loam)	1 1/2 to 2 pints	2 to 2 1/2 pints	1 to 1 1/2 pints
Medium Soils (loam, silt, silt loam, sandy clay, sandy clay loam)	1 1/2 to 2 pints	2 to 2 1/2 pints	2 pints
Fine (heavy) Soils (silty clay, clay loam, silty clay loam, clay)	1 1/2 to 2 pints	2 to 2 1/2 pints	2 to 2 1/2 pints

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types (e.g. loam, silt loam, sand, clay, sandy, clay loam) within a textural group.

**WEEDS CONTROLLED**

**Grass Weeds**

All species listed under Command Applied Alone Weeds Controlled section

**Broadleaf Weeds**

All species listed under Command Applied Alone Weeds Controlled section plus the following:  
Pigweed (Redroot, Smooth)  
Carpetweed

When applying mixtures of Command 4 EC plus Prowl, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**Command 4 EC Herbicide plus Scepter† Herbicide—  
Northern Area Only**

See Scepter label for appropriate geographic restrictions

A tank mix combination of Command 4 EC and Scepter will broaden the weed control spectrum of either product used alone

**Note: The Scepter label does not allow rotation to Corn, Wheat, Barley, or Oats prior to 18 months after last Scepter application when Scepter is applied preemergent or preplant incorporated within the Northern Use Area as defined on the Scepter label. See Scepter label for appropriate geographic restrictions.**

Broadcast Rate Per Acre

Soil Texture	Broadcast Rate Per Acre	
	Command	Scepter†
All Soil Types	1 1/2 to 2 pints	1 to 1 1/2 pint

\* Use higher rates when heavier weed pressure is anticipated.

**WEEDS CONTROLLED**

**Grass Weeds**

All species listed under Command Applied Alone Weeds Controlled section

**Broadleaf Weeds**

All species listed under Command Applied Alone Weeds Controlled section plus the following:  
Black Nightshade  
Cocklebur  
Pigweed spp.  
Giant Ragweed

† Partially controlled

In the event of a crop loss due to weather conditions, soybeans can be replanted. DO NOT work the soil deeper than two inches, or make additional Command 4 EC or Command Scepter tank mix applications.

**NOTE:** Adequate soil moisture is important for optimum tank mix applications.

When applying mixtures of Command 4 EC plus Scepter, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**Command 4 EC Herbicide plus Scepter† Herbicide—  
Southern Area Only**

See Scepter label for appropriate geographic restrictions. A tank mix combination of Command 4 EC and Scepter will broaden the weed control spectrum of either product used alone.

**Scepter Herbicide—**

See Scepter label for appropriate geographic restrictions. A tank mix combination of Command 4 EC and Scepter will broaden the weed control spectrum of either product used alone.

Broadcast Rates Per Acre

Soil Texture	Broadcast Rates Per Acre	
	Command	Scepter†
All Soil Types	2 to 2 1/2 pints	1 1/2 to 2 pints

\* Use higher rates when heavier weed pressure is anticipated.

† Partially controlled

**WEEDS CONTROLLED**

**Grass Weeds**

**Broadleaf Weeds**

All species listed under Command Applied Alone Weeds Controlled section plus the following:  
Black Nightshade  
Cocklebur  
Pigweed spp.  
Wind-poinsettia

In the event of a crop loss due to weather conditions, soybeans can be replanted. DO NOT work the soil deeper than two inches, or make additional Command 4 EC or Command Scepter tank mix applications.

In the event of a crop loss due to weather conditions, soybeans can be replanted. DO NOT work the soil deeper than two inches, or make additional Command 4 EC or Command Scepter tank mix applications.

**NOTE:** Adequate soil moisture is important for optimum tank mix applications.

**NOTE:** Adequate soil moisture is important for optimum tank mix applications.

When applying mixtures of Command 4 EC plus Scepter, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

When applying mixtures of Command 4 EC plus Scepter, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**Command 4 EC Herbicide plus Sonalan† EC Herbicide—  
Northern Area Only**

A tank mix combination of Command 4 EC and Sonalan will broaden the weed control spectrum of either product used alone.

**Command 4 EC Herbicide plus Sonalan† EC Herbicide—**

A tank mix combination of Command 4 EC and Sonalan will broaden the weed control spectrum of either product used alone.

Broadcast Rate Per Acre

Soil Texture	Broadcast Rate Per Acre	
	Command	Sonalan†
Coarse (light) Soils (loam, silt, sandy loam)	1 to 1 1/2 pints	1 to 1 1/2 pints
Medium Soils (loam, silt, silt loam, sandy clay, sandy clay loam)	1 to 2 pints	1 1/2 to 2 1/2 pints
Fine (heavy) Soils (silty clay, clay loam, silty clay loam, clay)	1 1/2 to 2 pints	2 to 3 pints

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types within the textural group. Rates within the range of 2 to 3 pints correspond to the equivalent of 1 1/2 to 2 pints of Command 4 EC and weed pressure.

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types within the textural group. Rates within the range of 2 to 3 pints correspond to the equivalent of 1 1/2 to 2 pints of Command 4 EC and weed pressure.

**BEST AVAILABLE COPY**

**WEEDS CONTROLLED**

Grass Weeds

All species listed under Command Applied Alone Weeds Controlled section

Broadleaf Weeds

All species listed under Command Applied Alone Weeds Controlled section plus the following

- Carpetweed
- Pigweed (Redroot Smooth)

When applying mixtures of Command 4 EC plus Soralan, observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**Command 4 EC Herbicide plus Squadron—Northern Area Only**

See Squadron label for appropriate geographic restrictions.

A tank-mix combination of Command 4 EC and Squadron will broaden the weed control spectrum of either product used alone.

Soil Texture	Broadcast Rates Per Acre	
	Command	Squadron*
All Soil Types	1½ to 2 pints	1½ to 2¼ pints

\* Do not exceed 1½ pints in Northern Area (as defined on the Squadron label). Use higher rate of Squadron in areas of heavy rock etc. if feasible.

**WEEDS CONTROLLED**

Grass Weeds

All species listed under Command Applied Alone Weeds Controlled section

Broadleaf Weeds

All species listed under Command Applied Alone Weeds Controlled section plus the following  
*Black Nightshade*  
 Cocklebur  
 Pigweed spp.  
*Common Sunflower*  
 Giant Ragweed\*

\* Partially controlled

When applying mixtures of Command 4 EC plus Squadron observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**Command 4 EC Herbicide plus Squadron—Southern Area Only**

See Squadron label for appropriate geographic restrictions.

A tank-mix combination of Command 4 EC and Squadron will broaden the weed control spectrum of either product used alone.

Soil Texture	Broadcast Rates Per Acre	
	Command	Squadron*
All Soil Types	2 to 2½ pints	2 to 3 pints

\* Use higher rate of Squadron in areas of heavy rock etc. if feasible.

**WEEDS CONTROLLED**

Grass Weeds

All species listed under Command Applied Alone Weeds Controlled section

Broadleaf Weeds

All species listed under Command Applied Alone Weeds Controlled section plus the following  
*Black Nightshade*  
 Cocklebur  
 Pigweed spp.  
*Common Sunflower*  
 Giant Ragweed\*

When applying mixtures of Command 4 EC plus Squadron observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**Command 4 EC Herbicide plus Trellan® EC (Trifluralin)—Northern & Southern Areas**

A tank-mix combination of Command 4 EC herbicide and Trellan EC herbicide will broaden the weed control spectrum compared to either product used alone.

Soil Texture	Broadcast Rates Per Acre		
	Command North	Command South	Trellan EC*
Coarse (light) Soils (loamy sand, sandy loam)	1½ to 2 pints	2 to 2½ pints	1 pint
Medium Soils (loam, silt, silt loam, sandy clay, sandy clay loam)	1½ to 2 pints	2 to 2½ pints	1 to 1½ pints
Fine (heavy) Soils (silt, clay, clay loam, silty clay loam, clay)	1½ to 2 pints	2 to 2½ pints	1 to 1½ pints

\* Select lower to higher rates within the ranges noted based on lighter to heavier soil types (e.g. loam, silt loam, sandy clay, sandy clay loam) within a texture group.

**WEEDS CONTROLLED**

Grass Weeds

All species listed under Command Applied Alone Weeds Controlled section

Broadleaf Weeds

All species listed under Command Applied Alone Weeds Controlled section plus the following

- Carpetweed
- Chickweed
- Field Bindweed
- Pigweed (Redroot Smooth)

When applying mixtures of Command 4 EC plus Trellan EC observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**Command 4 EC Herbicide plus Tri-Scept Herbicide—Northern Area Only**

See Tri-Scept label for appropriate geographic restrictions.

A tank-mix combination of Command 4 EC and Tri-Scept ~~herbicide~~ <sup>fungicide</sup> will broaden the weed control spectrum of either product used alone.

Soil Texture	Broadcast Rates Per Acre	
	Command	Tri-Scept*
All Soil Types	1½ to 2 pints	1 to 1½ pints

**WEEDS CONTROLLED**

- Pigweed (Redroot Smooth)

When applying mixtures of Command 4 EC plus Tri-Scept observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

**Command 4 EC Herbicide plus Tri-Scept—Southern Area Only**

See Tri-Scept label for appropriate geographic restrictions.

A tank-mix combination of Command 4 EC and Tri-Scept <sup>fungicide</sup> will broaden the weed control spectrum of either product used alone.

**BEST AVAILABLE**

Broadcast Rate	Per Acre	
	Command	Tri-Scepter
All Soil Types	2 to 4 pints	1 to 2 pints

\* Use the rate of 1 to 2 pints per acre for soybeans and corn in rotation.

#### WEEDS CONTROLLED

##### Grass Weeds

All species listed under Command Applied Alone Weeds, Controlled section.

##### Broadleaf Weeds

All species listed under Command Applied Alone Weeds, Controlled section plus the following:

Cocklebur *Black nightshade*  
Pigweed spp. *Common Sulfur*  
Wild poinsettia

When applying mixtures of Command 4 EC plus Tri-Scepter observe all cautions and limitations appearing on the labels of each product. Observe all application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixtures.

#### COMMAND 4 EC HERBICIDE APPLICATION FOLLOWED BY PREEMERGENCE TREATMENTS

Preemergence herbicides approved for use on soybeans may be applied following treatments of Command 4 EC alone or in tank mix combinations for control of additional weed species listed on the preemergence product labels. Read and follow the precautionary statements, directions for use, rates of application and all other information that appear on the product labels. **DO NOT** apply compounds containing metribuzin after a soil incorporated Command 4 EC plus Lexone<sup>®</sup> or Sencor<sup>®</sup> tank mix treatment, unless split applications are used where the pounds of active ingredient do not exceed the total allowed.

**DO NOT** apply Canopy, Preview, Pursuit Plus, Scepter, Squadron or Tri-Scepter herbicides after Command 4 EC plus any of these products in a tank mix treatment, as these other herbicides share a common mode of action and may cumulatively cause injury to soybeans or rotational crops.

#### COMMAND 4 EC HERBICIDE APPLICATION FOLLOWED BY POSTEMERGENCE TREATMENTS

Postemergence herbicides approved for use on soybeans may be applied following treatments of Command 4 EC alone or in tank mix combinations for control of emerged weeds as listed on the postemergence product labels. Read and follow the precautionary statements and directions for use, rates of application and all other information that appear on the product labels.

**DO NOT** apply Canopy, Preview, Pursuit Plus, Scepter, Squadron or Tri-Scepter herbicides after Command 4 EC plus Canopy, Preview, Pursuit Plus, Scepter, Squadron or Tri-Scepter in a tank mix treatment, unless the other product labels specifically recommend such a treatment, as these other herbicides share a common mode of action and may cumulatively cause injury to soybeans or rotational crops.

#### COMMAND 4 EC HERBICIDE FOLLOWED BY ACIFLUORFEN (BLAZER<sup>®</sup> 2L OR TACKLE<sup>®</sup>) HERBICIDE

Following an application of Command 4 EC or tank mixture with Command 4 EC, a postemergence application of acifluorfen will control the following emerged broadleaf weeds:

##### Broadleaf Weeds

Cocklebur  
Hemp dogbane  
Pigweed species  
Black nightshade  
Wild mustard  
Purple Moor-clover  
Pitted Morning glory

Apply acifluorfen at a rate of 1 pint per acre with 25% crop oil concentrate to actively growing weeds at no more than the 4 leaf growth stage (do not count cotyledons as leaves, but only the fully developed true leaves). This herbicide generally controls broadleaf weeds at all stages of the first to third trifoliolate stage.

**NOTE:** Application of Command 4 EC herbicide generally retards the development rate of weeds which may extend the period where acifluorfen can be effectively applied.

Read and follow all precautionary restrictions and warnings on all product labels.

#### COMMAND 4 EC HERBICIDE FOLLOWED BY SCEPTER<sup>®</sup> HERBICIDE

Following an application of Command 4 EC or tank mixture with Command 4 EC, a postemergence application of Scepter herbicide will control the following emerged broadleaf weeds:

##### Broadleaf Weeds

Cocklebur, common  
Pigweed  
Wild poinsettia

Apply Scepter after crop emergence but before weeds exceed a height of 12 inches (6 inches for wild poinsettia). Apply at a broadcast rate of 1 to 2 pints per acre. Apply when weeds are actively growing. **DO NOT** apply Scepter postemergence when soybeans and weeds have been subjected to stress conditions such as temperature and moisture extremes. The total amount of Scepter should not exceed 1 pint per acre per season in northern areas or 1/2 pint per acre per season in southern areas as defined on the Scepter label. Squadron and Tri-Scepter include the same active ingredient as Scepter.

**For postemergence applications, the addition of a nonionic surfactant or crop oil concentrate is required. The nonionic surfactant should contain at least 80% active ingredient and should be applied at a rate of 2 pints per 100 gallons of spray mixture. Apply the crop oil concentrate (COC) at the rate stated on the COC label.**

Read and follow all precautionary statements and restrictions, directions for use and all other information appearing on the Scepter label.

#### COMMAND 4 EC HERBICIDE APPLICATION—MINIMUM TILLAGE OR NO-TILLAGE SOYBEANS

Command 4 EC herbicide may be used alone or in combination with Sencor<sup>®</sup>, Lexone<sup>®</sup>, Lorox<sup>®</sup> or Lorox Plus herbicides, plus Paraquat<sup>®</sup> or Roundup<sup>®</sup> herbicide for preemergence (to crop and weeds) and post-emergence (to weeds) but prior to crop emergence control of broadleaf and grass weeds where soybeans will be planted into a cover crop in previous crop residues (e.g., corn, small grain stubble).

##### WEEDS CONTROLLED

When used as directed, the paraquat portion of the tank mix controls most emerged annual weeds and suppresses many perennial weeds. Roundup combinations will control emerged annual and perennial weeds when applied as directed on the Roundup label. Command 4 EC or Command 4 EC plus Sencor, Lexone or Lorox provides preemergence control of the weeds listed in the Command 4 EC Applied Alone and Command 4 EC Applied in Combination sections of this label.

#### APPLICATION AND MIXING INSTRUCTIONS

**Paraquat Combinations:** Tank mix Command 4 EC alone or with Sencor, Lexone, Lorox or Lorox Plus. Observe mixing instructions in the General Mixing Instructions portion of this label, as well as individual product label use directions. Add 1 to 2 pints paraquat (based on product containing 2 pounds active ingredient per gallon) per acre. Use lower rate for annual weeds less than 4 inches tall and the higher rate for weeds 4 to 6 inches tall. As the last ingredient, add a suitable surfactant (refer to paraquat label).

**Roundup Combinations:** Tank mix Command 4 EC alone or with Sencor, Lexone, Lorox or Lorox Plus. Observe mixing instructions in the General Mixing Instructions portion of this label, as well as individual product label use directions. Add 1 to 4 quarts of Roundup per acre for control of emerged annual weeds, or 2 to 4 quarts per acre for control of emerged perennial and annual weeds.

Apply in 20 to 60 gallons of water per acre. Use the higher gallonage for dense stubble or vegetation.

#### PUMPKINS

##### GENERAL INFORMATION

Command 4 EC herbicide may be used as a preemergence soil application treatment for the control of annual grass and broadleaf weeds in pumpkins.

Command 4 EC must be soil incorporated in the following states: Alabama, an approved 24°C in on the farm, Arkansas, California, Colorado, Florida, Georgia, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, West Virginia, Wisconsin, Wyoming.

**Note:** When utilizing Command 4 EC as a soil incorporated treatment, incorporate Command to a depth of 1 inch or less and place the seed below the chemical barrier when planting.

Command 4 EC herbicide may be tank mixed with other pumpkins herbicides for control of weeds. When applied to pumpkins, Command 4 EC herbicide may be used in combination with other pumpkins herbicides for control of weeds. When applied to pumpkins, Command 4 EC herbicide may be used in combination with other pumpkins herbicides for control of weeds. When applied to pumpkins, Command 4 EC herbicide may be used in combination with other pumpkins herbicides for control of weeds. When applied to pumpkins, Command 4 EC herbicide may be used in combination with other pumpkins herbicides for control of weeds.

**BEST AVAILABLE COPY**

**SPECIAL PRECAUTION**

Off-site movement of spray drift or vapors of Command 4 EC herbicide can cause foliar whitening or yellowing of some plants. Prior to making applications, read and strictly follow all precautions and application instructions on this label.

**REPLANTING INSTRUCTIONS**

If initial seeding of pumpkins fails to produce a stand, pumpkins may be replanted in fields treated with Command 4 EC alone. Do not retreat field with a second application of Command 4 EC. When tank mixing with a labeled product refer to the pumpkin replant instructions for that product. Do not replant treated fields with any crop at intervals which are inconsistent with the Rotational Guidelines on this label.

**COMMAND 4 EC APPLIED ALONE RATES AND WEEDS CONTROLLED**

Do not exceed a rate of 2 pints per acre. Weeds controlled (by rate) are as listed under Soybean for Northern and Southern areas.

**ROTATIONAL CROP GUIDELINES**

Rotate to crops as listed under Soybean Rotational Crop Guidelines otherwise crop injury may occur.

Cover crops, however, may be planted anytime but stand reductions may occur in some areas. Do not graze or harvest for food or feed cover crops planted less than 9 months after Command 4 EC treatment. Do not allow livestock to graze on treated pumpkin vines or feed treated vines or vine trash to livestock.

**SUCCULENT PEAS**

**GENERAL INFORMATION**

Command 4 EC herbicide may be utilized as preemergent soil applied treatment for the control of annual grass and broadleaf weeds in peas.

Command 4 EC must be soil incorporated in the following states unless an approved 24(C) is on file for counties within that state (check with your local dealer): Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, Wisconsin.

Note: When utilizing Command 4 EC as a soil incorporated treatment, incorporate Command to a depth of 1 inch or less and place the seed below the chemical barrier when planting.

Command 4 EC herbicide may be tank mixed with other herbicides registered for use in peas to broaden the weed control spectrum compared to the product applied alone. When applying mixtures of Command 4 EC plus other soil applied preemergent herbicides, observe restrictions and limitations as provided in the labels of each product. Observe application precautions, rotational guidelines and replanting instructions of each product's label when using tank mixes. Water or liquid fertilizer may be used as a carrier for Command 4 EC when applied alone or when tank mixed with other succulent pea herbicides unless specific instructions specify otherwise.

**SPECIAL PRECAUTION**

Off-site movement of spray drift or vapors of Command 4 EC herbicide can cause foliar whitening or yellowing of some plants. Prior to making applications, read and strictly follow all precautions and application instructions on this label.

**REPLANTING INSTRUCTIONS**

If initial seeding of peas fails to produce a stand, peas may be replanted in fields treated with Command 4 EC alone or with recommended tank mixtures. Do not retreat field with a second application of Command 4 EC. When tank mixing with a labeled product refer to the replant instructions for that product. Do not replant treated fields with any crop at intervals which are inconsistent with the rotational guidelines on this label.

**COMMAND 4 EC HERBICIDE APPLIED ALONE**

**FOR PEAS ONLY** Apply to soil prior to planting.

**RATE AND WEEDS CONTROLLED (1 PT. (0.5 LB. A.I.))**  
(for all soil types)

GRASSES	BROADLEAF WEEDS
Crabgrass (large)	Alfalfa
Panicum (fall)	Chenopodium
Foxtail Green (fall)	Chenopodium (red)
Rough	Chenopodium (white)
Goosegrass	Chenopodium (yellow)
Field Sandbur	Chenopodium (green)
Barnyardgrass	Chenopodium (purple)
Seeding Johnson grass	Chenopodium (brown)
Partially Curled	Chenopodium (black)

**BEST AVAILABLE COPY** 1/2-

Rotate to crops as listed under Soybean Rotational Crop Guidelines otherwise crop injury may occur.

Cover crops may be planted anytime but stand reductions may occur in some areas. Do not graze or harvest for food or feed cover crops planted less than 9 months after Command 4 EC treatment. Do not allow livestock to graze on treated pumpkin vines or feed treated vines or vine trash to livestock.

**FALLOW LAND**

**GENERAL INFORMATION**

Command 4 EC is a herbicide which may be utilized as a preemergent or surface applied treatment to control many annual grass and broadleaf weeds on fallow land. Command 4 EC may be tank mixed with other herbicides registered for fallow cropland use (e.g. atrazine).

To broaden the weed control spectrum combine with other products applied alone.

**SPECIAL PRECAUTION**

Off-site movement of spray drift or vapors of Command 4 EC herbicide can cause foliar whitening or yellowing of some plants. Prior to making applications, read and strictly follow all precautions and application instructions on this label.

**Additional Precaution For Fallow Land Applications Only**  
Do not apply Command 4 EC within 500 feet of Emerged Winter Wheat or within 1,000 feet of the areas listed below:

- To ns and Subdivisions
- Commercial Vegetable Production\*
- Commercial Fruit Production
- Commercial Nurseries
- Commercial Greenhouses

\* except sweet corn.

**Supplemental Spray Drift Precautions for Fallow Land Applications**  
Non-target spray drift of Command 4 EC herbicide should be avoided to prevent whitening of desirable vegetation. Specific recommendations and requirements for minimizing spray drift are included the Application Precautions section of this label for Fallow Land applications only:

- The use of an agriculturally approved drift reducing additive is required at finished spray volumes of 5 to 15 gallons per acre and is recommended for application volumes of 15 to 40 gallons per acre when spraying in the proximity of desirable plants (see list under Application Precautions).

**ROTATIONAL CROP GRAZING AND FEEDING RESTRICTIONS**

Do not graze or feed treated areas to livestock. Do not graze or feed treated areas to livestock.

**APPLICATION RATES**

Use Command 4 EC herbicide alone at a rate of 1 to 2 quarts per acre or 32 ounces per acre in a surface applied broadcast application for the control of emerged weeds.

Where Clear is registered and was applied at 1 1/2 to 1/2 quarts per acre for weed control in the growing wheat crop, a rate of 1 1/2 quarts (24 ounces) per acre of Command 4 EC is recommended because the additional weed control benefit from Clear may not last throughout the following spring (see Clear label). Use the higher rate of Command 4 EC when heavy weed infestations are anticipated or for longer residual control.

In areas where the winter wheat fallow winter wheat cropping system is practiced, make application after wheat harvest. For optimum results, make application after August 15. Command 4 EC can be applied in areas where the wheat crop is harvested on 15 or 16 months fallow period.

Treated areas should be maintained in a fallow state until the wheat crop has been maintained in the wheat crop. High residual herbicide activity is recommended for areas primarily designed to control weeds that have emerged and the soil and mate through the fallow period. Do not apply in situations where there will be a wheat crop.

**WEEDS CONTROLLED**

Grass Weeds	Broadleaf Weeds
Downy brome	Chenopodium (red)
Jointed goatgrass	Chenopodium (white)
Volunteer corn	Chenopodium (yellow)
Volunteer wheat	Chenopodium (green)
Leafy Green	Chenopodium (purple)
Ligulate Brome	Chenopodium (brown)

**COMMAND 4 EC APPLIED IN COMBINATIONS**

Tank mixtures of Command 4 EC herbicide with other herbicides registered for fallow cropland use to broaden the weed control spectrum and to provide additional control of the herbicides used above.

### COMMAND plus ATRAZINE

Command 4 EC at 1.0-1.5 pints of atrazine 4 EC or equivalent rates of atrazine 4 EC and 1.0-1.5 pints of atrazine 4 EC or equivalent rates of atrazine 4 EC and 1.0-1.5 pints of atrazine 4 EC. Weeds controlled in addition to those listed on the Command 4 EC label will depend on atrazine rate used (see atrazine label). Do not use higher rate of Command 4 EC when heavy or weed infestations are not controlled or for longer residual control.

There is significant risk of atrazine injury to crops if applied at a rate higher than that of the local Experiment Station and that of the local Experiment Station. Consult your local Experiment Station for recommendations of atrazine rates for your area.

Refer to the atrazine label for preplant, preplant and other instructions. Follow all precautions, statements, and restrictions on the atrazine label.

#### Mixing Instructions.

Fill spray tank (1 to 2) full with water and add recommended amount of atrazine with agitator operation. Mix thoroughly and then add atrazine to tank during application. Add Command 4 EC to tank before or during application. Complete filling the spray tank with water. Maintain agitation during mixing and application.

#### Application Instructions

Follow the General Application Instructions on the atrazine label.

### Dealers Should Sell in Original Packages Only.

**Terms of Sale or Use.** On purchase of this product buyer and user agree to the following conditions.

**Warranty.** FMC makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Except as so warranted, the product is sold as is. Buyer and user assume all risk of use and/or handling and/or storage of this material when such use and/or handling and/or storage is contrary to label instructions.

**Directions and Recommendations.** Follow directions carefully. Timing and method of application, weather and crop condition, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the seller and are assumed by the buyer at his own risk.

**Use of Product.** FMC's recommendations for the use of this product are based upon tests believed to be reliable. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such use or the results to be obtained if not used in accordance with directions or established safe practice.

**Damages.** Buyer's or user's exclusive remedy for damages for breach of warranty or negligence shall be limited to direct damages not exceeding the purchase price paid and shall not include incidental or consequential damages.

## COMMAND® 4 EC HERBICIDE PREEMERGENCE APPLICATION SOYBEANS

Code 618

### Command 4 EC Herbicide

EPA Reg. No. 279-3053

#### Supplemental Label

##### Directions For Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

##### Soybeans—Southern Area\*

\* Southern area includes Missouri bootheel which incorporates the following counties: Butler, Dunklin, Mississippi, New Madrid, Pemiscot, Scott and Stoddard.

##### General Information:

Command 4 EC herbicide may be utilized as a preemergent soil applied or as a soil incorporated treatment for the control of annual grass and broadleaf weeds in soybeans. Command 4 EC herbicide may be tank mixed with other herbicides to broaden the weed control spectrum compared to the products applied alone. Observe all precautions, instructions, and rotational cropping guidelines of each products label when tank mixing.

##### IMPORTANT

This supplemental labeling contains directions for use of this product which do not appear on the package label. Follow instructions carefully. Read and carefully observe the precautionary statements and all other information appearing on the product label. This label must be in the possession of the user at the time of application.

# FMC

Agricultural Chemical Group  
2000 Market Street  
Philadelphia Pennsylvania 19103

# Command<sup>®</sup> 4 EC Herbicide Preemergence Application

Southern Area

## Application Precautions for Preemergent Use

When utilizing Command 4 EC as a preemergent soil applied treatment without incorporation, however, additional precautions, beyond those required for a preplant incorporated treatment, must be taken as follows:

Do not apply Command 4 EC within 1,500 feet of the following areas:

- Towns and Subdivisions
- Commercial Fruit or Vegetable\* Production
- Commercial Greenhouses or Nurseries

Prior to application, adjacent properties must be checked, and spraying within 1,500 feet of desirable plants must be avoided.

\*except sweet corn

### Spray Drift Precautions:

Non-target spray drift of Command 4 EC herbicide should be avoided to prevent whitening of desirable vegetation. Drift is influenced by many factors which include wind speed, spray pressure, particle size, nozzle type and boom height.

Refer to package label for specific recommendations and requirements regarding:

- Precautionary Statements
- Storage and Disposal
- Sprayer Cleanup
- General Mixing Instructions
- Application Precautions
- Special Precautions
- Drift Control Supplement
