

U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (H7505C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg.
Number:

Date of Issuance:

279-3154

18/1
25 NOV 1995

NOTICE OF PESTICIDE:
 Registration
 Reregistration

(under FIFRA, as amended)

Term of Issuance:

Conditional
Registration Until
December 31, 1997

Name of Pesticide Product:

FluorGuard Ant
Control Baits

Name and Address of Registrant (include ZIP Code):

FMC Corporation
1735 Market Street
Philadelphia, PA 19103

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4;

2. And since you have agreed (in your letter dated September 19, 1995) to the conditions of the registration granted to Griffin Corp. for Volcano Ant Bait on March 2, 1995. The conditions include: submission of toxicity data (Griffin responsibility); registration expiration date of December 31, 1997 if data requirements are not fulfilled; and submit production information (pounds or gallons produced) for this product for the fiscal year in which the product is conditionally registered in accordance with FIFRA Section 29. The fiscal year begins October 1 and ends September 30. This information is to be submitted to: Registration Support Branch, Registration Division (7505W), Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460.

Signature of Approving Official:

Date:

George T. LaRocca, Product Manager-13

3. Make the following label changes:

- a. Revise the EPA Registration Number to read, "EPA Reg. No. 279-3154."
- b. Delete "Outdoor Uses" from your labeling. These uses are not on your reference product's labeling. Additionally the placement stations have not been evaluated for child resistant claims.
- c. Delete the phrases "even on food preparation surfaces or next to food." The Agency discourages reference or recommendation for use of pesticides next to food or food utensils regardless of its packaging. Such terms are considered vague and have the potential to mislead the user with respect to the safety of a pesticide.

3. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

George T. LaRocca
 Product Manager (13)
 Insecticide-Rodenticide Branch

| Little Fire ants | Pharaoh ants |
| Pavement ants | Southern Fire ants |
| Pyramid ants | And other ants in and around the structure. |
| Thief ants | |

CHILD RESISTANT BAITS

ACCEPTED
with COMMENTS
in EPA Letter 11/15/95

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 279-3154

Manufactured for:
FMC Corporation
1735 Market Street
Philadelphia, PA 19103

FOR COMMERCIAL, INDUSTRIAL AND RESIDENTIAL USE INCLUDING:

Food Processing Plants, Eating Establishments, Food Marketing-Storage Distribution, Hospitals, Nursing Homes, Schools, Office Buildings, Apartments, Laundries, Buses, Aircraft, Boats, Museums and Zoos.

Listed ants locate bait stations and distribute bait within the nest to kill the queen and destroy the entire colony.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Break FluorGuard™ ant control baits apart from the plastic frame before placement.

Place station nearby ant trails or close to areas where ants are present, even on food preparation surfaces or next to food. Do not place baits on food preparation surfaces when food is being handled or on utensils that are used for food preparation. Also place adjacent to walls, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, inside drop ceilings and wall voids or anywhere ant problems occur. To apply baits to vertical surfaces use the enclosed stickers. Sticker may pull paint, drywall or wallpaper off of surface when stations are removed.

Do not use residual sprays with or near FluorGuard™ Ant Control Baits.

Ants will begin to feed — population reduction and less activity can be expected within 2 to 7 days.

Occasionally because of changes in food preferences, a listed ant colony may not feed upon FluorGuard bait. In these situations, offer another brand of baits and offer FluorGuard bait at a later date.

Outdoor Uses

Outdoor use of the bait are only allowed when the bait station is inserted into an outdoor placement station. The outdoor placement station with or without soil insert tube may be used to place bait stations within a tamper proof bait box. Ants readily enter the placement station and locate the ant bait within. The placement station may contain 1-4 bait stations either of FluorGuard or other FMC baits.

Outdoor placement stations must be used outdoors but may be used anywhere.

Tube may contain treated or untreated cardboard for use in the control of subterranean termites.

Outdoor placement stations may be reused.

The outdoor placement station, with or without soil insert tube, may be placed in, or nearby fireant or harvester ant colonies.

FluorGuard™ baits (and several competitor baits) eventually become moldy if placed in high humidity areas.

FluorGuard™ ant bait stations may be filled or refilled with the same bait or another FMC bait or contain more than one type of FMC bait.

Note: Fire ant colonies usually overwhelm single bait stations. Two or more stations are usually required for colony control.

For Effective Control

Use 3-4 baits for the average size room

Use 6-8 baits for heavy infestations.

Replacement is recommended after 3 months or when bait is almost entirely consumed (do not risk loss of control by allowing complete consumption.)

Ant Baits are packaged in a Child Resistant Container

STORAGE AND DISPOSAL STATEMENTS

STORAGE: Store in a cool, dry area ir accessible to children.
DISPOSAL: Wrap container and put in trash collection.
