# PRECAUTIONARY STATEMENTS

#### Hazards to Humans (and Domestic Animals) Caution

Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling.

#### Environmental Hazards

This pesticide is extremely toxic to fish and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Drift and run-off from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters or rinsate.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Not for use on plants being grown for sale of other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climate modification and being grown in interior plantscapes, ornamental gar-dens or parks, or lawns or grounds.

Do not apply more than 0.2 lb. active ingredient (a.i.) per acre per appli-cation on residential use sites (i.e., around private homes, apartment buildings, condominiums, non-agricultural outbuildings, non-commer-cial greenhouses, pre-schools or day care facilities). May be applied at up to 0.4 lb. a.i. per acre per application on non-residential use sites (i.e., around institutional, public, commercial or industrial buildings; narte: corrections) acres or athlotic field(b) parks; recreational areas or athletic fields).

Do not broadcast apply more than 0.4 lbs. A.I. (200 lbs. of this product) per Acre per year.

Not for use on golf courses, sod farms, nurseries, in commercial green-

#### LAWN Applications

Broadcast this product with suitable application equipment to ensure uniform coverage over the treatment area. Apply the bait late in the afternoon to flower and shrub beds, lawns and other ornamental turf areas that have been well irrigated prior to application. For maximum efficacy, do not irrigate treated area immediately after application.

#### **APPLICATION RATES**

The application rates listed in the following table will provide excellent control of Mole Crickets (Adults & Nymphs) under typical conditions. However, for residential lawn use, do not apply more than 0.2 lbs. A.I. per Acre per application.

| Pest                              | Active ingredient<br>Ibs. per acre | Application Rate<br>FMC 01-0004 Insecticide |                  |
|-----------------------------------|------------------------------------|---|------------------|
| Mole Cricket (Adult) <sup>1</sup> |                                    | 100 - 200 lbs.                              | 2.3 - 4.6 lbs.   |
| Mole Cricket (Nymph) <sup>1</sup> |                                    | per acre                                    | per 1000 sq. ft. |

#### Comments

<sup>1</sup>Mole Cricket: Achieving acceptable control of mole cricket nymphs and adults is best accomplished with a season-long integrated control program. A mole cricket management program should include monitoring the pest population and may include granular and/or liquid applications of Taistar<sup>®</sup> Insecticides and this product. Applications of this product may be followed by treatment with Taistar<sup>®</sup> Insecticides to control any individual mole crickets that may not have consumed the bait.

Tawny mole cricket nymphs will often be found infesting the same areas where late winter/early spring adult activity has been noted. Southern mole cricket adults will fly and breed in a more widespread area. The best time to control southern and tawny mole crickets with this bait is between June and December, depending on the geographic location and local weather conditions. All life stages of shortwinged mole crickets may be present throughout the year.

#### **rimeter Applications**

Spread this product at a rate of 4 pounds per 1,000 square feet or 6.4 ounces per 100 square feet in a band at least 2 feet wide around foundations, including crevices where insects may hide.

Resistance: Some insects are known to develop resistance to products used repeatedly for control. Because the development of resistance cannot be predicted, the use of this product should conform to resistance management strategies established for the use area. Consult your local or state pest management authorities for details.

If resistance to this product develops in your area, this product, or other products with a similar mode of action, may not provide adequate control. If poor performance cannot be attributed to improper application or extreme weather conditions, a resistant strain of insect may be present. If you experience difficulty with control and suspect that resistance is a reasonable cause, immediately consult your local company representative or pest management advisor for the best alternative method of control for your area.

#### **RECOMMENDED SPREADER SETTINGS**

Note: Following will be a list of application spreaders and appropriate settings. This list will vary depending on market of spreaders. (This note will not appear on final printed label).

Note: These spreader settings were established using standard equipment available from the spreader manufacturer at swath widths and speeds typically used within the industry. It is recommended that all spreader equipment be calibrated at the time of application to achieve the desired application rate.

#### Conditions of Sale and Limitation of Warranty and Liability:

NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions beyond the control or FMC or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold FMC and Seller hamiless for any claims relating to such factors.

Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the Directions for Use when used in accordance with the directions under normal conditions of use. FMC MAKES NO WAR-RANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTIC-ULAR PURPOSE, NOR ANY OTHER EXPRESS OR IMPLIED WARRANTIES WITH RESPECT TO THE SELECTION, PURCHASE, OR USE OF THIS PRODUCT. Any warranties, express or implied, having been made are inapplicable if this product has been used contrary to label instructions, or under sbnormal conditions, or under conditions not reasonably foreseeable to (or beyond the control of) seller or FMC, and buyer assumes the risk of any such use.

In no event shall FMC or seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF FMC AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELEC-TION OF FMC OR SELLER, THE REPLACEMENT OF THE PROD-UCT.

This Conditions of Sale and Limitation of Warranty and Liability may not be amended by any oral or written agreement.
