Dear Ms. Miller:

Subject: Echelon 0.57% Granular Herbicide on Fertilizer for Consumers
EPA Reg. No. 279-3320

Notification of Typographical and Printing errors

FMC is notifying the EPA that we have made typographical correction to the subject label. This change is a non-notification; however it is being submitted to the EPA due to some states requiring proof that the Agency has been officially notified of the label change. The change is as follows below:

- Page 1: Corrected calculation typo in the Pounds of active ingredient per pound of product (changed 0.57 to 0.0057).

The change is shown in red text on the referenced page of the label. Paper and electronic (PDF on CD) copies are enclosed for your records.

If I can be of any further assistance, please feel free to contact me at (215) 299-5876 or by e-mail at mike_zucker@fmc.com.

New Product Facts

- Echelon is a selective pre-emergence and post-emergence turf herbicide for control of sedges, annual grass and broadleaf weeds in residential lawns.
- Do not use on Dichondra or St. Augustine lawns
- In early spring apply when lawn is dry to kill weeds already in the lawn including Plantain, Oxalis, Dandelion, Violet, Wild onion, Garlic and Black medic and prevent germination of Crabgrass, Foxtail, spurge, Barnyard grass, fall panicum, goosegrass, nutsedge, oxalis, Chickweed, Purslane and Pigweed:
 - Before March 1 in southern California. For best results apply by mid February
 - Before mid March in northern California
 - Early Spring (up to the time dandelions are in puffball stage) in other states
 - For Goosegrass control repeat application in 8 weeks
- Rain, snow or freezing conditions will not effect the performance of the product.
- In the fall (August-October) apply after temperatures have cooled and the fall rains have begun to prevent the germination of *Poa annua*, Chickweed, in the fall and crabgrass and oxalis in the spring
- Don't use on newly seeded grassy lawns until after the second mowing. On newly sprigged areas wait 4 months before application
- Do not plant grass seed for four months after using this product.
- Do not apply more frequently than twice a year. Allow at least one month interval between applications
- Do not rake or aerify after application.
- Do not apply this product to flower beds
- Do not graze or feed livestock forage cut from areas treated with Echelon turf herbicide.

Spreading Tips- Apply header strips. Then apply product in longest direction of lawn..

PRECAUTIONARY STATEMENTS
Hazards to Humans (and Domestic Animals)
CAUTION

Causes moderate eye irritation. Harmful if inhaled, swallowed, or absorbed through skin. Avoid breathing dust. Do not get on skin, in eyes or on clothing. Prolonged or frequently repeated skin contact while mixing or handling may cause allergic reactions in certain individuals.

Environmental Hazards

This pesticide is toxic to marine/estuarine invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to terrestrial and aquatic plants in neighboring areas. Do not contaminate water when disposing of equipment wash waters or rinsate.

Groundwater advisory: Sulfentrazone is known to leach through soil into groundwater under certain conditions as a result of label use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Do not use on coarse soils classified as sand which have less than 1% organic matter.

Surface water advisory: Sulfentrazone can contaminate surface water through spray drift. Under some conditions, sulfentrazone may also have a high potential for runoff into surface water (primarily via dissolution in runoff water), for several to many months post-application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlying extremely shallow groundwater, areas with in-field canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas over-lying tile drainage systems that drain to surface waters.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage

Store product in original container only, away from other pesticides, fertilizer, food or feed. Reseal open bag by folding top down and securing. Store in a cool, dry place and avoid excess heat.

Pesticide Disposal

Securely wrap original container in several layers of newspaper and discard in trash.

Container Disposal

Do not reuse bag. Discard bag in Trash

1. Poa annua is a winter annual, applications of Echelon should be made in August or September to established, non overseeded turf before Poa Annua germinates. Consult local Cooperative Extension Service for more specific applications timings for your local area since August – September are approximate timings.
2. Apply Echelon in late summer, fall or winter before weed germinates for control.
3. Crabgrass control in cool season grasses from fall application:
Areas where the ground is subject to winter freezes, Echelon may be applied in the fall for cool season grasses when soil temperatures are below 50F, but prior to the ground freezing. This will provide control of crabgrass the following spring.
4. In areas of extended growing season and heavy pressure weed control will be enhanced by second application of Echelon 60 -90 days after initial application

Postemergence Control of Annual, Biennial & Perennial Broadleaf Weeds and sedges

ECHELON herbicide will control or suppress the weeds listed in Table 2 when applied shortly after weeds have emerged.
