

**ACCEPTED**

JUN 4 1976

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under  
EPA Reg. No. 299-104

## 45% CHLORDANE CONCENTRATE

**CONTROLS TERMITES**

Contains 4 pounds Chlordane per gallon

READ ALL NOTICES, CAUTION STATEMENTS, AND DIRECTIONS CAREFULLY  
BEFORE USE.

**CONTENTS: 1 GALLON**

**CAUTION: Keep Out of Reach of Children**  
See Back Panel for other Cautions

**ACTIVE INGREDIENTS:**

\*Technical Chlordane 45%, Petroleum Hydrocarbons 51%, INERT INGREDIENTS: 4%  
\*Equivalent to 27% Octachloro-4, 7-Methanoctahydrochlordane and 18% related com-  
pounds.

### DIRECTIONS FOR USE OF MARTIN'S 45% CHLORDANE CONCENTRATE

For the control of Japanese Beetle Larvae in Federal and State quarantine programs on ornamental turf (and/or sod) and ornamentals, Use 3 quarts to 5 quarts of Martin's 45% Chlordane per acre and work into the top few inches of the soil. For small areas use 4 to 8 tablespoonsful per 1,000 square feet.

For Control of Subterranean Termites: Use a 1% water emulsion prepared by mixing 8½ quarts to 100 gallons of water or 1 pint to 6 gallons of water. In buildings having basements or crawl spaces, dig a trench along the outside of the foundation walls. In brick or hollow block or concrete foundations, dig a trench to, but not below, the footing. Then as the trench is refilled, treat the soil at the rate of 4 gallons per 10 linear feet for each foot of depth. A trench 3 feet deep would require 12 gallons per 10 linear feet.

The objective is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment. It is suggested that you consult the State Extension Service for advice.

**CAUTION:** Harmful if swallowed. Contact with skin can cause toxic symptoms. In case of contact with skin, wash with soap and water. Avoid breathing spray mist. Avoid contamination of feed and foodstuffs. Keep out of the reach of children.

Birds feeding on treated areas may be killed.

This product is toxic to fish and wildlife. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes.
