

**WARNING:** Avoid contamination of feed or foodstuffs.

**CAUTION:** Keep away from humans, domestic animals, and pets. Martin's Rat Stop "D" contains as an active ingredient an anticoagulant (rodenticide). If taken by humans, domestic animals or pets, it may reduce the clotting ability of the blood and serious hemorrhage may result. If baits are eaten give a tablespoon of salt in a glass of warm water and repeat until vomited. Call a physician immediately.

**NOTE TO PHYSICIANS:** When humans have been known to have ingested Rat Stop "D" blood transfusions combined with intravenous injections and large doses of Vitamin K are indicated in the case of hemorrhage caused by ingestion of Diphacinone.

100.0000

\*Diphacinone - Manufactured by Nove Chemical Company, Inc., New York, N.Y.  
No. 2 672 483. For Rodenticide Use Only.

### DIRECTIONS

Place bait in locations where rats and mice feed, water or travel. Bait placements along walls in corners and in concealed locations where rats and mice feed are desirable. Place baits in locations not accessible to children, pets, and domestic animals or in tamper-proof boxes. Contaminated or spilled baits should be replaced promptly.

**FOR RAT CONTROL:** Place a one pint liquid dispenser per location as the minimum amount of Rat Stop "D". Maintain an uninterrupted supply of bait in the station for approximately 30 days. Bait should be placed in locations not accessible to children, pets, and domestic animals.

**FOR MOUSE CONTROL:** A one pint liquid dispenser should be placed at 8-10 foot intervals. An uninterrupted supply of bait should be maintained for at least 15 days. Bait should be placed in locations not accessible to children, pets, and domestic animals.
