INERT INGREDIENTS

DEEP TUNNELS: Remove center plug from the conical mounds with aid of a long handled spoon and drop 1 level tablespoon bait into the underground tunnel. Close opening with rock or soil.

BULB PROTECTION FROM MOLES: To protect bulbs against destruction by field mice and moles, pack about one quarter inch of soil against each bulb and then place a level tablespoon of soil around the bulb.

WARNING CONVULSIVE POISON: Do not contaminate feed and food stuffs. Keep away from children, domestic animals, pets and game birds. Avoid breathing dust. Do not reuse container. Destroy empty container by crushing or burning. Do not breathe fumes. Where placement is required, treat all grain and other animal feeds with this bait. Place in airtight container. Do not use in areas where children or animals are present.

At the time of use, mix with grain or other feed. Do not use in areas where children or animals are present. Do not use in areas where children or animals are present. Do not use in areas where children or animals are present.

DIRECTIONS

FOR POCKET GOPHER CONTROL: Burrowing pocket gophers throw out low, fan shaped mounds on either side of their underground tunnel. These lateral tunnels coming to the surface are on the flat side of the fan and are plugged with soil. With a long handled spoon carefully remove the plug. Insert bait (1 level tablespoon) as far into the hole as possible. Reclose opening. One pound will treat 5 to 8 acres or one to two pounds will treat one acre when applied with a Burrow Builder Machine.

LAWN PROTECTION FROM MOLES: To protect lawns from mole damage, mix with grain or other feed. Do not use in areas where children or animals are present.

SURFACE RIDGES: To protect lawns from mole damage, mix with grain or other feed. Do not use in areas where children or animals are present.
