

**WARNING:** Harmful or fatal if swallowed. Contact with skin can cause toxic symptoms. In case of contact with skin, wash with soap and water. Avoid breathing spray mist. Avoid contamination of feed and foodstuffs. **DO NOT USE, POUR, SPILL, OR STORE NEAR HEAT OR OPEN FLAME.**

Keep children and pets off treated areas until this material is washed into the soil and grass is dry.

This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams, and ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

Do not reuse empty container. Destroy by crushing and burying or discarding in a safe place.

# 74% CHLORDANE CONCENTRATE

Contains 8 pounds Chlordane per gallon.

Controls Fire Ants, Termites

CONTENTS: 1 QUART

**WARNING: Keep Out of Reach of Children.**

See Side Panel for Other Precautions

ACTIVE INGREDIENTS: \*Technical Chlordane - 74%. Kerosene - 20%.  
INERT INGREDIENTS: 6%

Equivalent to 44.4% Octachloro-4, 7-methanotetrahydroindane and 29.6% related compounds.

## DIRECTIONS FOR USE

Use these regular mixtures except where otherwise stated in directions.

74% Chlordane Concentrate

Gallons of Water	1 Gal.	1 Qt.	1 Pt.	8 oz.	4 oz.	1 Tbsp.
	400	100	50	25	12½	1½

**FIRE ANTS, TEXAS HARVESTER ANTS IN OKLAHOMA** in lawns, parks, cemeteries and other non-crop land: Thoroughly saturate mounds and the ground within 3 feet of mound with regular mixture, using as much as 5 gallons for large colonies. Repeat in 3 weeks if needed. Do not contaminate food or feed crops.

**SUBTERRANEAN TERMITES:** Use a 1% water emulsion prepared by mixing 1 gallon with 95 gallons of water, or 1 quart with 24 gallons of water. In buildings having basements or crawl spaces, dig a trench along the outside foundation walls. In buildings having brick, hollow block, or concrete foundations, dig a trench too, but not below the footing. As the trench is refilled, treat the soil at the rate of 4 gallons of 1% mixture per 10 linear feet for each foot of depth. A trench 3 feet deep would require 12 gallons per 10 linear feet.

The objective is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment. Consult your State Extension Service for further information.
