## Prevents Horse Cribbing Wood Preservative

CONTENTS: 1 QUART

**CAUTION: Keep Out of Reach of Children**  
**SEE OTHER WARNING STATEMENT ON SIDE PANEL.**

<b>ACTIVE INGREDIENTS:</b> .....	100%
Petroleum distillate .....	80%
Anthracene Oil .....	20%

### DIRECTIONS

**TO PREVENT CRIBBING:** Horses in  
confinement often develop the habit  
of biting any wood object within  
reach, and sucking air at the same  
time. The teeth of cribbers will show  
more than normal wear. The sucking  
of air will cause a bloated appear-  
ance. Such horses are subject to  
colic. Wood splinters may be danger-  
ous. Paint Carbolin Oil on All Stall  
surfaces. On dressed lumber use  
1 gallon to 200 sq. ft.. On rough  
lumber use 1 gallon to 100 sq. ft.  
Apply with a brush or spray. Let  
Carbolin Oil impregnate into the lum-  
ber before putting horses into stalls  
to prevent blistering. Horses will not  
chew wood treated with Carbolin Oil.

**AS A WOOD PRESERVER:** Fence  
posts, poles, foundation timbers, and  
heavy wooden members should be free
