PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Do not take internally. Avoid eye contact. Flush contaminated eyes with plenty of water and get medical attention if irritation persists. Wash thoroughly after handling. Wash contaminated clothing before re-use. Keep away from food, feedstuffs, and domestic water supplies.

NOTE TO PHYSICIAN: Active ingredient is a cholinesterase inhibitor. Treat symptomatically. Atropine, by injection only, is an antidote.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife. Use with care when applying in areas adjacent to any body of water. Keep out of lakes, streams, and ponds. Do not apply when weather conditions favor run-off or drift from target areas. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

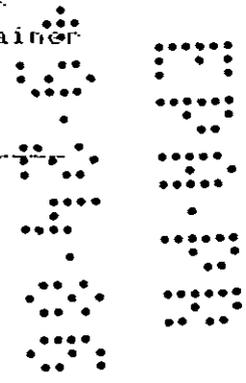

~~General Classification.~~

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

 STORAGE AND DISPOSAL

STORAGE: Do not contaminate water, food or feed by storage or disposal. Store in original container until used. Keep container tightly closed. Store out of reach of children and domestic animals.

DISPOSAL: Do not reuse empty bag. Discard bag in trash.

DIRECTIONS FOR USE
(Continued)

TO CONTROL: Ants, Chinch Bugs, Fleas, Sod Webworms (Lawn Moths), Brown Bog Ticks, Crickets, Cutworms, Earwigs, Grasshoppers, and Pillbugs infesting home lawns and other ornamental turf areas: Uniformly apply Dursban* Insecticide Granules using any hand or power operated gravity or rotary type spreader designed for application of granular materials. Treat when insects first appear using Dursban* Insecticide Granules at the rate of 50 lbs. per acre. Immediately after application sprinkle turf with 1200 gallons of water per acre so as to wash the granules into the zone of insect infestation. Consult the following table to determine amounts of Dursban* Insecticide Granules and water needed for smaller sized areas. Re-treat as necessary.

RATES TO USE

Area to Be Treated	Lbs of Dursban* Insecticide Granules	Gallons of Water to sprinkle on turf after treatment
1,000 Sq.Ft.	5	30
5,000 Sq.Ft.	25	150
10,000 Sq.Ft.	50	325

To control certain White Grubs (Larvae of European Chafer and Japanese Beetle): Use two to four times the amount of Dursban* Insecticide Granules shown in the above table. Apply the granules uniformly over the area treated followed immediately by thorough watering to wash the insecticide into the turf. For best results, treat when grubs are young and actively feeding near the soil surface, usually during late July and August. Consult your local Agricultural Extension Service specialist for best time to treat your area.

To control Hyperodes (Turfgrass) Weevil: Use twice the rate of Dursban* Insecticide Granules shown in the above table. Treat suspected problem areas in mid-April and again in mid-May. Consult your local Agricultural Extension Service specialist for best time to treat in your area.

Keep children and pets off treated areas until this material is washed into the soil and grass is dry. Keep out of fishponds and other bodies of water. Do not apply where run-off is likely to occur.
