AND TOXIC SUBSTANCES

Ms. Jean Killoren
WPC Brands, Inc.
1 Repel Road
Jackson, WI 53037

Subject: Revised Label in Response to Agency's October 28, 2002 Letter
Repel® Permanone®
EPA Reg. No. 305-55
Your Submission Dated November 6, 2002. Submitted by E-Mail

Dear Ms. Killoren:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comment below. Two (2) copies of the finished labeling must be submitted prior to releasing the product for shipment. A stamped copy of the label is enclosed for your records.

1. Delete the statement "Not for use on human skin" near the beginning of the Directions for Use or revise it as on the previously submitted label: "Not for use directly on humans". The statement "Not for use on human skin" is open to misinterpretation (i.e., that the product could be used on human hair, for instance, or on the skin of other animals).

If you have any questions regarding this action, please contact Susan Stanton of my team at (703) 305-5218.

Sincerely,

Handwritten signature of Susan L. Stanton, for

PRECAUTIONARY STATEMENTS Hazards To Humans & Domestic Animals

CAUTION: Causes moderate eye irritation. Harmful if absorbed through the skin. Avoid contact with face, eyes, or skin. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or using the toilet.

FIRST AID

IF IN EYES:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes then continue rinsing.

IF ON SKIN:

- Rinse skin immediately with plenty of water for 15-20 minutes.

Call a poison control center or doctor for further treatment advice. Have the product container with you when calling a poison control center or doctor or going for treatment.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting.

DISPOSAL: Do not Puncture or Incinerate!

If empty: Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1-800-CLEANUP [www.cleanup.org] for disposal instructions.

READ ENTIRE LABEL BEFORE EACH USE

(Must be at the top of the first side or back panel in bold and capital letters.)

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING

Not for use on human skin. Do not allow contact with treated surfaces until spray has dried. When using product do not allow spray to contact food, or water supplies.

(One or more of the following directions must be on the label. Directions must be in agreement with the marketing claims.)

• GENERAL CLOTHING INSTRUCTIONS:

This product must not be applied to clothing while it is being worn. Under no circumstances should bare skin or clothing on the body be treated.

For protection against ticks (including those, which may carry Lyme disease), chiggers and mosquitoes, apply product as directed below. For further protection, use in conjunction with an insect repellent registered for direct application to the skin and utilize the following primary preventive measures. Avoid walking in areas where the pests are found, wear appropriate protective clothing (light-colored, long-sleeved shirt and long pants tucked into socks) and inspect body daily for ticks. Pant cuffs should be worn inside the socks or footwear to ensure full protection against ticks and chiggers.

INITIAL TREATMENT INSTRUCTIONS:

1. Select a well-ventilated outdoor area protected from wind and lay out [or hang] the clothing to be treated (as complete outfit; shirt, pants [trousers] and socks).
2. Hold container about 6-8 inches from surface of the clothing and spray with a slow sweeping motion to lightly moisten the entire surface of the fabric.
3. Continue spraying over entire outfit, until a total treatment time of 60 seconds has elapsed and the outer surface of the fabric is moist enough to cause a slight color change or darkening. Pay special attention to socks, trouser [pant] cuffs and shirt cuffs.

4. Turn the clothing over and treat the other side as described in Steps 2 & 3.
5. Hang the treated clothing and allow to dry for at least 2 hours (4 hours under humid conditions) before wearing.
6. Three ounces will treat one complete [an average] outfit. Do not exceed recommended spraying times.

INITIAL TREATMENT INSTRUCTIONS ON NETS, TENTS, SLEEPING BAGS AND BACKPACKS:

Do not treat inside of sleeping bag. Spray exterior surfaces of tent only.

Select a well-ventilated outdoor area protected from wind and lay out [or hang] article to be treated. Hold container upright about 6 -8 inches from surface of the article and spray with a slow sweeping motion to lightly moisten the surface of the fabric. Continue spraying over entire article, until the outer surface of the article is moist enough to cause a light color change or darkening. Turn the article over and treat the other side as described above. Hang the treated article and allow to dry for at least 2 hours (4 hours under humid conditions) before using.

RE-TREATMENT INSTRUCTIONS:

This product contains an active ingredient, which actually binds to the fabric being treated, providing residual protection, which lasts a minimum of two weeks, and holds up through several machine washings. **DO NOT RETREAT CLOTHING MORE THAN ONCE EVERY TWO WEEKS. LAUNDRY CLOTHING AT LEAST ONCE BEFORE RETREATING.** For re-treatment, follow instructions for initial treatment.

4/5

Master Label Repel® Permanone®

• **DOG, DOG BEDDING AND PREMISES:**

USE ONLY ON DOGS: To control Fleas, Ticks and Lice: Start spraying at the tail, moving the dispenser rapidly and making sure that the animal's entire body is covered, including the legs and under body. While spraying, fluff the hair so the spray will penetrate to the skin. Make sure spray wets thoroughly, but do not saturate animal. Do not spray into eyes or face. Avoid contact with genitalia. Use protective gloves or mitts when applying product. Repeat application every two weeks if necessary. **DO NOT USE ON CATS OR KITTENS.** Do not use on dogs under twelve (12) weeks old. Consult a veterinarian before using this product on medicated, debilitated, aged, pregnant or nursing animals. Sensitivities may occur after using ANY pesticide products for pets. If signs of sensitivity occur bathe your pet with mild soap and rinse with large amount of water. If signs continue, consult a veterinarian immediately.

To control fleas and ticks on pet bedding, premises and upholstered furniture.

Fleas and Ticks (Adults and Larvae): thoroughly clean or launder pet bedding before treatment. Spray bedding, sleeping quarters, floor coverings and floors, paying special attention to cracks and crevices.

Upholstered furniture may also be treated to control fleas and ticks in these areas. A test application should be made to upholstery in an inconspicuous place before use. Spray upholstery paying particular attention to tufts and seams. Allow to dry before reuse.

• **INDOOR APPLICATION**

For spot application only. Do not use as a space spray indoors. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food/feed should be covered or removed. Do not use in commercial food/feed handling establishments, restaurants or other establishments where food/feed is commercially prepared, processed or served.

For protection against ticks, chiggers, fleas and mosquitoes: Spray around windows, doors, porches, patios, and screens until surface area is damp.

SURFACE SPRAYING:

For 60-day [Two months] control of **Cockroaches, Waterbugs, Palmetto Bugs, Scorpions, Millipedes, Centipedes, Sowbugs, Pillbugs, Ants, Silverfish, Firebrats, Spiders, Crickets, Clover Mites, Cheese Mites, Granary Weevils, Rice Weevils, Confused Flour**

Beetles, Rust Red Flour Beetles, Drugstore Beetles, Meal Worms, Grain Mites and Cadelles:

Direct the spray into hiding places, cracks and crevices, and behind shelves and drawers. For **silverfish**, spray bookcases. For **ants**, spray trails, nests and points of entry.

To control **Carpet Beetles:** Spray edges of carpeting and under carpeting and rugs. Make localized application to floor and baseboards. Spray directly into cracks, crevices and infested areas of shelving. Repeat treatment, as infestation occurs but not more than once every two weeks.

To control **Bedbugs:**

Spray mattresses lightly, particularly around tufts and seams. Take beds apart and spray in all joints. Treat baseboards, molding and floors. Repeat treatment, as infestation occurs but not more than once every two weeks.

To control **Fleas (adults and larvae) and Ticks**, including Ticks which may carry Lyme disease (adults and larvae): Thoroughly spray infested areas, pet beds, resting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames and entire areas of floor and floor covering. Fresh bedding should be placed in animal quarters following treatment. Repeat treatment, as infestation occurs but not more than once every two weeks. Allow to dry thoroughly before allowing pets to contact treated areas.

To control **Clothes Moths:**

Remove any infested articles from storage, brush thoroughly, and air for several hours in sunlight, if possible. Apply spray liberally to empty chests, closets, bureaus and other storage's directing the spray into cracks, joints and crevices. After airing, infested articles may be treated lightly. A test application should be made to fabric in an inconspicuous place before use.

To kill **Lice and Louse Eggs:**

NOT FOR USE ON HUMAN HAIR. Spray fabric in an inconspicuous area to test for possible staining or discoloration. Inspect again after drying then proceed to spray entire area to be treated. Spray from a distance of 8 to 10 inches. Treat only those garments and parts of bedding, including mattresses and furniture that cannot be either laundered or dry-cleaned. Allow all treated articles to dry thoroughly before use.

Master Label Repel® Permanone®

• OUT DOOR APPLICATION

To control ticks, mosquitoes, chiggers and mites use as a residual treatment. For each area listed below, apply until surface is wet.

Treat around windows and doors, porches, screens eaves, patios, garages, under stairways and in crawl spaces where these pests [ticks] may enter.

Treat a band of vegetation and leaf litter 6 to 10 feet wide around the outside of building to help control pests [ticks] from occurring there.

To help control pest [ticks] in outdoor activity areas, treat a band of vegetation and leaf litter 6-10 feet wide and adjacent to activity areas, especially where dense vegetation occurs.

• FOR CONTROL OF GARDEN INSECTS ON ORNAMENTAL PLANTS:

Spray may damage certain plants. When spraying insects resting on vegetation, first test a few leaves and check after a week for signs of damage. Lightly spray from approximately 18 inches so as to avoid over wetting leaves. Use a sweeping motion. Do not spray flowers directly. Be cautious about wetting tender foliage, young plants and new growth. Do not spray plants when temperatures exceed 90 F. Contact insects directly whenever possible. Repeat treatment as infestation occurs.

For use on roses, dahlias, asters and other ornamentals to kill **Japanese Beetles** hit by sprays as well as **Whiteflies, Aphids, Exposed Thrips, Spiders, Red Mites** and **Leafminers**. May be used on plants as a multi-purpose spray in small gardens and for spot treatments of incipient insect infestations to prevent spreading in large garden areas.

May also be used on other plants such as African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, dahlias, delphiniums, dogwoods, English ivy, eunonymus, fuschia, geraniums, crassula, grape vines, Kentia palms, laurels, marigolds, rhododendrons, rose, rubberplants, snapdragons, stocks, wandering Jews and zinnias.

Effective when used as directed against **Whiteflies, Aphids, Spider and Red Mites, exposed Thrips, Lace Bugs, Japanese Beetles, Pavement Ants, Clover Mites** and **Armyworms**.

Not for use on plants grown for sale or other commercial or research purposes. Not for use in commercial greenhouses.
