Russell's

GRANULAR

LAWN FUNGICIDE

For control of BROWN PATCH, COPPER, DOLLAR & LEAF SPOT, SNOW MOLD.

Apply with Spreader

ACTIVE INGREDIENTS

Thiram	5.00 %
(Tetramethylthiuram Disulfide)	
*Cadmium Chloride	.75 %
INERT INGREDIENTS	94.25 %
*Total Cadmium	.48 %

For the prevention and control of Copper Spot, Dollar Spot, Leaf Spot (*Helminthosporium-Curvalarial*), Brown Patch and Snow Mold on Lawns containing Kentucky Blue including Merion and other strains, the various Fescues, Bents and most other grasses.

SPECIAL INSTRUCTIONS

Do not water or mow lawn area for 24 hours after application. Application will be more effective if made in the early morning hours when dew is on the grass. Repeat treatments are necessary until fungus diseases disappear. Apply contents of this bag to 10,000 square feet for prevention program and at double rate (5000 square feet) if fungus diseases have already infested lawn area.

SPRING PROGRAM

Application should be made immediately at a double rate (contents of this bag to 5000 square feet) if no disease treatments have been given and Dollar or Leaf Spot have invaded lawn area. For a prevention program against these diseases apply RUSSELL'S GRANULAR LAWN FUNGICIDE soon after the second mowing in the Spring and repeat every 7 to 10 days for a minimum of five times. This program will prevent Fungus activity of Dollar Spot and Leaf Spot which may kill good grasses.

SUMMER APPLICATION

Apply immediately at double rate if Brown Patch or Curculvaria Disease is active in lawn area. Prevention of these diseases may be obtained by an application of RUSSELL'S GRANULAR LAWN FUNGICIDE every 7 to 10 days during the hot humid months.

EARLY FALL APPLICATION

Prevent infestation of Dollar Spot and Copper Spot with treatments at 7 to 10 day intervals during the period of cool nights.

SNOW MOLD

Apply at double rate in the late Fall, before the first snowfall and repeat again at double rate in January.

CAUTION

treatments are necessary until fungus diseases disappear. Apply contents of this bag to 10,000 square feet for prevention program and at double rate (5000 square feet) if fungus diseases have already infested lawn area.
