NOV 7 2008

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4

Dear Registrant:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 dated August 18, 2008 for:

EPA Registration 322-1 Fort Dodge Gopher Bait

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and finds that the label change(s) requested falls within the scope of PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Banza Djapao of my staff at 703-305-7269.

Sincerely,

Linda Arrington
Notifications & Minor Formulations Team Leader
Registration Division (7505P)
Office of Pesticide Programs

Please read instructions on reverse before completing form.

Form Approved. OMB No. 2070-0060. Approval expires 2-28-

Dear Mr. Hebert,

Sincerely,

Sincerely,

Blake Hazen

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS — DANGER —

Convulsive poison! Fatal if swallowed. Do not breathe dust. This bait may cause an allergic reaction; wear rubber gloves and long-sleeved adequate protection clothing when handling. Do not get in eyes, on skin or on clothing. Wash arms, hands, and face with Germicidal soap and water after using and before eating or accepting anything by mouth or smoking. All spilled bait must be cleaned up immediately. Keep away from humans, domestic animal, pets and foodstuffs.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not allow bait to be exposed on soil surface. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or in intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes.

PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers must wear:

- *Long-sleeved shirt and long pants;
- *Goggles and gloves;
- *Shoes plus socks.

When loading more than 3 lbs. (1.4kg) of bait into mechanical application equipment and when disposing of nonrigid containers (e.g., bags), handlers must wear:

- *Long-sleeved shirt and long pants;
- *Waterproof gloves;
- *Shoes plus socks;
- *Goggles or face shield, and

*dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21c), or a NIOSH approved respirator with any N, R, R, or HE filter.

Follow manufacturer's instructions for cleaning and maintaining PPE. If there are no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should remove clothing immediately if pesticide gets inside.

Then, wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of waterproof gloves before removing them. As soon as possible, wash thoroughly and change into clean clothing.

ENDANGERED SPECIES RESTRICTIONS

NOTICE: The killing of a member of an endangered species during strychnine baiting operations may result in a fine under the Endangered Species Act. Before baiting, the user is advised to contact the Regional U.S. Fish and Wildlife Service (Endangered Species Specialist) or the local Fish and Game Office for specific information on endangered species. Strychnine baits should not be used in the geographic ranges of the following species except under programs and procedures approved by the U.S. EPA: San Joaquin kit fox, Aleutian Canada goose, Morro Bay kangaroo rat, Salt Marsh Harvest mouse, gray wolf, and grizzly bear.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store only in original container, in a dry place inaccessible to children and pets, under lock and key in a posted storage area.

PESTICIDE DISPOSAL:

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinseate in a violation of Federal Law.

If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container.

DO NOT REUSE OR REFILL CONTAINER.

Offer for recycling if available.

NOTICE: Seller makes no warranty, expressed or implied; concerning the use of this product, other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

08278

NOTICE: RESTRICTED USE PESTICIDE (DUE TO HAZARD TO NONTARGET ORGANISMS)

For retail sale to and use only by certified applicators or person under their direct supervision, and only for those uses covered by the certified applicator's certification.

FORT DODGE

GOPHER BAIT

ACTIVE INGREDIENT:

Strychnine Alkaloid CAS #57249 0.50%

OTHER INGREDIENTS 99.50%

TOTAL 100.00%

**KEEP OUT OF REACH OF CHILDREN
DANGER - POISON**

STATEMENT OF PRACTICAL TREATMENT:

IF SWALLOWED:	<ul style="list-style-type: none"> • CALL A PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY. • If less than ten (10) minutes have passed since the poison was taken, give 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. • Have patient lie down in a quiet, darkened room and keep him warm and quiet. • Do not induce vomiting or give anything by mouth to an unconscious person.
IF INHALED:	<ul style="list-style-type: none"> • Remove victim to fresh air. • Apply artificial respiration if indicated.
IF ON SKIN:	<ul style="list-style-type: none"> • Wash with plenty of soap and water. • Get medical attention. • Remove contaminated clothing and wash affected areas with soap and water.
IF IN EYES:	<ul style="list-style-type: none"> • Flush eyes with plenty of water. • Get medical attention if irritation persists.

NOTICE TO PHYSICIAN

A. Administer 100% OXYGEN by positive pressure to provide as much pulmonary gas exchange as possible, despite seizures.

B. Administer ANTICONVULSIVE DRUGS intravenously to control convulsions. **NOTICE:** It may be difficult or impossible to stop the seizure activity without stopping respiration. Be prepared to maintain pulmonary ventilation mechanically. Tracheotomy may be necessary if seizures are prolonged.

See side panel for additional precautionary statements.

FOR USE IN SUBSOIL ONLY DIRECTIONS FOR USE — POCKET GOPHERS —

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS: This product may only be used to control pocket gophers (Thomomys spp. and Geomys spp.) in subsoil applications (only) in rangeland, pastures, cropland, and nonagricultural areas. This product may be applied by use of tractor-operated mechanical burrow builders, by probe assisted manual applications, or by use of manually operated bait-dispensing probes such as the Gopher Bait Dispenser. Bait must be deposited directly into pocket gophers' natural underground runways or into artificial underground tunnels made by burrow builders. Do not broadcast bait over crops grown for food or feed, or any other purpose. Do not apply this product in a way that will contact workers, other persons, or domestic animals. Keep pets and other people out of the area during application.

DIRECTIONS FOR MANUAL BAITING

LOCATING RUNWAYS: To locate a gopher's natural runway, probe about 6" to 8" from an active mound, beginning on the flat side of the horseshoe-shaped depression. Using an iron bar, a strong stick, a bait-dispensing probe, or other suitable implement, probe 8" to 10" below soil level. Soil resistance on the probe will decrease when runway is entered.

HAND APPLICATION: Once the runway is located, enlarge probe hole (if necessary) to accommodate baiting. Drop a teaspoonful of bait through probe opening, taking care not to spill bait on the surface. Pick up any spilled bait immediately. Make 2-7 bait sets per burrow system, depending on the system's apparent length. Close probe holes as indicated below. **BAIT-DISPENSING PROBE APPLICATION:** Read manufacturer's instructions for the equipment selected for use. Determine how to calibrate equipment or otherwise ensure that each bait placement will be approximately one teaspoonful. Locate the main underground runway through probing; as indicated under **LOCATING RUNWAYS:** When probe is in the main runway, operate the dispenser to release bait into tunnel. Pick up or bury any spilled bait immediately. Make 2 to 7 bait sets per burrow system, depending upon the system's apparent length. Close probe holes as indicated below. **CLOSING PROBE HOLES:** After bait placement has been made, cover opening with sod or dirt to close hole and exclude light. Do not permit dirt to sift in and cover bait.

TREATMENT RATE: Depending upon pocket gopher population levels, one pound of bait applied manually will treat one to eight acres.

DIRECTIONS FOR BURROW BUILDER

Burrow builders construct artificial underground tunnels and automatically place bait in them in a single operation. A coupler disc opens the way for a subsolar shank. At the bottom of the shank is a pointed tube or "torpedo". The torpedo creates the artificial burrow. Bait is dropped in preset quantities through an outlet in the rear underside of the torpedo. Close-set rubber tires behind the subsolar shank close the cut above the burrow. Consult manufacturer's directions for the specific equipment to be used. Adjust the torpedo to the depth of pocket gopher runways. Make sure that soil is damp enough to hold formed tunnels. Cut artificial burrows at 20 to 25 foot intervals. Orient artificial burrows to intercept gophers' natural underground runways. Pick up or bury any spilled bait. One to three pounds of bait will treat one acre by the burrow-builder method.

Treatment Indicated by Lines.
