

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS
—DANGER—**

Convulsive poison! Poisonous if swallowed. This bait may cause an allergic reaction; wear rubber gloves and long-sleeved adequate protective clothing when handling. Do not breathe dust. Do not get in eyes, on skin or on clothing. Do not contaminate feed and foodstuffs. Wash arms, hands, and face with Germicidal soap and water after using and before eating or accepting anything by mouth or smoking. All spilled bait must be cleaned up immediately. Keep away from children, pets, and domestic animals.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Baits exposed on soil surface may be hazardous to birds and other wildlife. Do not contaminate water in lakes, streams, or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

ENDANGERED SPECIES RESTRICTIONS

NOTICE: The killing of a member of an endangered species during strychnine baiting operations may result in a fine under the Endangered Species Act. Before baiting, the user is advised to contact the Regional U.S. Fish and Wildlife Service (Endangered Species Specialist) or the local Fish and Game Office for specific information on endangered species. Strychnine baits should not be used in the geographic ranges of the following species except under programs and procedures approved by the U.S. EPA: San Joaquin kit fox, Aloutian Canada goose, Florio Bay kangaroo rat, Salt Marsh Harvest mouse, gray wolf, and grizzly bear.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store only in original container, in a dry place inaccessible to children and pets, under lock and key in a posted storage area.

PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

NOTICE: Seller makes no warranty, expressed or implied, concerning the use of this product, other than indicated on the label. Buyer assumes all use and/or handling of this material when such use and/or handling is contrary to label instructions.

ACTIVE INGREDIENT:		
Strychnine Alkaloid	0.50%
INERT INGREDIENTS	99.50%
TOTAL	100.00%

**KEEP OUT OF REACH OF CHILDREN
DANGER-POISON**

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: CALL A PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY. If less than ten (10) minutes have passed since the poison was taken, give 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Have patient lie down in quiet, dark room and keep him warm and quiet. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED: Remove victim to fresh air. Apply artificial respiration if indicated.

IF ON SKIN: Remove contaminated clothing and wash affected areas with soap and water.

IF IN EYES: Flush eyes with plenty of water. Get medical attention if irritation persists.

NOTE TO PHYSICIAN

A. Administer 100% O₂ by positive pressure to provide as much pulmonary gas exchange as possible, despite seizures.

B. Administer ANTICONVULSANT DRUGS intravenously to control convulsions.

NOTICE: It may be difficult or impossible to stop the seizure activity without stopping respiration. Be prepared to maintain pulmonary ventilation mechanically. Tracheotomy may be necessary if seizures are prolonged.

**FOR USE IN SUBSOIL ONLY
DIRECTIONS FOR USE
—POCKET GOPHERS—**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS: For use to control pocket gophers (*Thomomys* spp. and *Geomys* spp.) in subsoil applications (only in yard and garden areas around homes. Bait must be deposited in pocket gophers' natural underground runways. Do not apply bait above ground. Do not apply this product by means of a burrow-builder machine. Do not apply this product over food or feed crops.

BAITING DIRECTIONS: An easy way to deposit bait is to use the Gopher Getter Jr. or the Gopher Bait Injector hand probes. Both manually operated systems can deposit bait in gophers' natural runways. Runways may also be treated by use of a long-handled spoon.

Locating Runways: To locate a gopher's natural runway, probe about 6" to 8" from the mound on the side of the horseshoe-shaped depression. Using an iron bar, a strong stick, or other suitable implement, probe 8" to 10" below soil level. Resistance on probe will decrease when runway is entered.

Gopher Getter Jr.: Turn hand probe unit upside down to attach or remove bait bottle. Bottle screws into dispenser. Using probe end, probe around mounds to locate runways (see "Locating Runways," above). Lift handle to deposit bait in each active runway. (See "Closing Runways," below.)

Gopher Bait Injector: Remove cap from built-in bait reservoir. Add bait. Replace and tighten cap. Using Gopher Bait Injector probe, probe around mounds to locate runways (see "Locating Runways," above). Turn crank two full turns clockwise, followed by two full turns counter clockwise, to deposit bait in the runway. (See "Closing Runways," below.)

Long-handled Spoon: Locate runway by probing (see "Locating Runways," above). Using long-handled spoon, insert one tablespoon of bait into each active runway. (See "Closing Runways," below.)

Depending upon pocket gopher population levels, one pound of bait will treat one to eight acres. **CLOSING RUNWAYS:** After bait has been applied, regardless of the method used, cover probe opening with sod or dirt. Do not permit dirt to sift in or cover bait.
