See The Brand  
INDUSTRIAL SPRAY #10  
for commercial and household use.

For the control of Flies, mosquitoes, Flying Moths, Gnats, Silverfish, Beetles, Ants, Spiders, Fleas, Ticks, Lice, and fleas.

For Best Results, Follow Directions Carefully.

FOR FLYING INSECTS: Flies, Mosquitoes, Flying Moths and Gnats.

Best results are obtained with a sprayer that produces a fine mist. Close windows and doors. Direct spray towards ceiling in all areas until the room is filled with mist. Direct spray into corners, under furniture, in closets and areas where insects may hide. When spraying, keep sprayer about three feet from walls or furniture. Doors and windows may be opened after 10 minutes.

FOR CRAWLING INSECTS: Roaches, Waterbugs, Silverfish, Crickets and Spiders.

Apply as a coarse spray directly on insects when possible. Also spray thoroughly in cracks and crevices, around baseboards, door sills, window frames, under and behind sinks, cupboards, drawers, woodwork, refrigerators, stoves, in storage areas, behind shelves, around pipes and drains and wherever these insects may hide and breed. Repeat application when necessary.

CLOTHES MOTHS and Carpet Beetles:

For moths, clean closets and spray thoroughly, paying particular attention to cracks and crevices. Moth-tight chests and vaults should be sprayed before being filled with materials. Clean and brush woolen articles. Repeat application every 30 days. For carpet beetles, be sure that cracks and crevices around moulding and baseboard, and cracks in floors, are thoroughly wet with a coarse spray. When infested, spray both sides of the carpet thoroughly. When spraying near fabrics, keep sprayer in constant motion and at least 36 inches away from fabric to avoid possible staining. Repeat application as required.

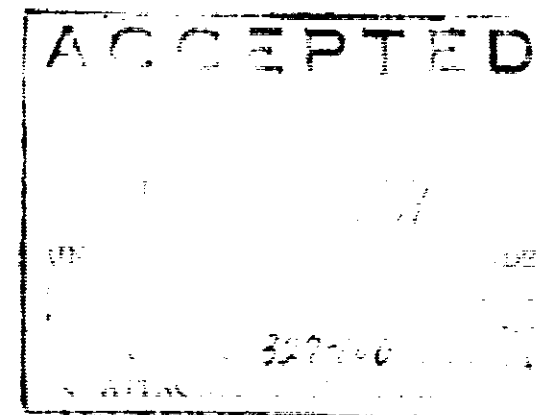

ANTS: Spray ant trails, and hills, and surfaces where they are crawling. Pay particular attention to door and window sills, and openings around pipes and behind baseboards. Spray directly on as many insects as possible. Repeat application as necessary.

BEDBUGS: Spray baseboards, mouldings, floorboards, furniture, under loose wall paper and any cracks where bedbugs may hide. Spray bed mattresses thoroughly, paying particular attention to seams and tufts. Dismantle and spray bed frames and springs, particularly cracks and joints. Repeat application when necessary.

FLEAS: Spray walls, floors, floor coverings and sleeping quarters of pets and other infested areas, paying particular attention to cracks and crevices. CAUTION: Do not spray animal pets.

FOR OUTDOOR USE: To repel temporarily many annoying flying insects on porch, terrace, lawn and at outdoor gatherings, spray in the area frequently. Caution: Do not spray on plants.
