

Texas Phenothiazine Company
P. O. Box 4186
Fort Worth, Texas 76106

ACCEPTED

50-W Insecticide
No. 327-128
Jan. 13, 1972

MAY - 8 1972
UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND ROENTICIDE ACT
FOR ECONOMIC POISON REGISTERED
ED UNDER NO. 327-128 SUBJECT
TO ATTACHED COMMENTS.

FOR CONTROL OF CERTAIN PESTS OF FRUITS, VEGETABLES, AND FORAGE AND FIELD CROPS

ACTIVE INGREDIENT:
Carbaryl (1-Naphthyl Methylcarbamate) 50%
INERT INGREDIENTS: 50%
Total 100.00%

*Trademark of Union Carbide Corp. for active ingredient
(1-Naphthyl Methylcarbamate)

CAUTION: Keep out of reach of children. Harmful if
swallowed or inhaled. Do not breathe dust. Do not get
in eyes or on skin. Wash thoroughly with soap and
water after handling. Avoid contamination of feed and
food stuffs.

Note to Physician: Carbaryl is a moderate, reversible
cholinesterase inhibitor. Atrophine is antidotal.

CAUTION: Keep out of Reach of Children
See side panel for additional precautions

NET WEIGHT: 4 POUNDS AVOIR.

Manufactured by
TEXAS PHENOTHIAZINE COMPANY
FORT WORTH, TEXAS 76106

DIRECTIONS: Read entire label. Use in strict accordance
with label directions, cautions, and warnings. Keep
spray mixtures well agitated.

For Forage Grasses and Pasture: Use 2 to 3 lbs. of TPC
Sevin 50-W per acre in sufficient water to obtain full
coverage for the control of armyworm and thrip.

For armyworms, corn earworm, stink bugs, and web
worms in milo and grain sorghums, use 2 to 4 lbs. per
acre.

CAUTION: Do not apply within 21 days of harvest on
grain sorghums.

For use on alfalfa, clovers, cowpeas, peanuts, and soy-
beans in the control of alfalfa caterpillar, cucumber
beetles, green cloverworm, Japanese beetle, leafhoppers,
thrip and velvet bean caterpillar, use from 2 to 4 lbs.
per acre in enough water to obtain good coverage. To
avoid possible injury on tender foliage, do not apply
when foliage is wet or when rain or high humidity is
expected.

CAUTION: Avoid drift to adjacent food and forage
crops that may be damaged or rendered unfit for sale,
use, or consumption.

BEE CAUTION: May kill honeybees in substantial num-
bers. This product is highly toxic to bees exposed to
direct treatment of residues on crops. Protective infor-
mation may be obtained from your cooperative Agricul-
tural Extension Service.

For peaches, apricots, plums, prunes, and cherries, for
the control of Japanese beetles, aphids, plum curculio,
fruit tree leaf roller, lesser peach tree borer, and eastern
tent caterpillar, use 2 lbs. TPC Sevin 50-W in 100 gal-
lons of water. Keep spray mixture well agitated and
apply for full coverage.

For vegetable insect control apply when insects or
their damage appear. Use spray gallonage sufficient to
provide 1 to 2 lbs. of TPC Sevin 50-W per acre. Timing
and good coverage are essential for good control.

Cucumbers, Melons, and Squash:

To control pickleworms, melonworms, cucumber
beetles, flea beetles and squash bug, use 1 to 2 lbs.
TPC Sevin 50-W per acre in sufficient spray for good
coverage.

Corn, Egg Plants/Okra/Peas, Peppers, Potatoes, and
Tomatoes:

To control corn earworms, flea beetles, fall army-
worms, colorado potato beetles, lace bugs, tomato fruit-
worms, tomato hornworm, tarnish plant bugs and stink
bugs, use 1 to 2 lbs. TPC Sevin 50-W per acre in suffi-
cient spray gallonage for good coverage. Allow 1 day
between spraying and harvesting of vegetables named
above.

CAUTION: Care should be exercised in making appli-
cation to young tender foliage to avoid damage. For
lawn insect control, use 2 lbs. of TPC Sevin 50-W in
approximately 150 gallons of water for each 5,000
square feet of lawn area for the control of ants, chinch
bugs, earwigs, fleas, fall armyworms, and millepedes.
Use pressure type equipment to insure good penetra-
tion on turf. Repeat in 2 to 3 weeks if necessary. For
smaller lawn areas, use at the rate of 1 cupful of TPC
Sevin 50-W in 15 to 20 gallons of water for each 500
square feet of lawn area.

Do not re-use container. Destroy by punching holes in
them and burying with waste, or by burning. Keep out
of smoke.
