

327-138 02/04/1974

**DIRECTIONS:**

EQUI-SPRAY 'N' WIPE is made especially for use on horses. It gives a protective hair coating against flies. 1-2 ounces per animal applied daily with a soft cloth or as a fine mist spray usually provides adequate protection.

Make sure horse's hair coat is free of dirt by brushing thoroughly before making application. Moisten a soft cloth with EQUI-SPRAY 'N' WIPE and rub over the hair paying special attention to the legs, shanks, shoulders, neck and areas around the face where flies generally are seen. Rub against hair growth and apply lightly. Avoid using an excessive amount on animals. Do not wet skin. Brushing thoroughly after application will help bring out a sheen on hair coat. Repeat application daily or as needed.

EQUI-SPRAY 'N' WIPE may be applied as a fine mist spray in and around stable area and stabled horses. Do not wet horse's skin nor use more than two ounces per application.

**CAUTION:** Keep out of reach of children. Harmful if swallowed. Remove or cover exposed feed before spraying. Do not apply to dairy animals. Do not spray EQUI-SPRAY 'N' WIPE on or near open flame. Do not reuse empty container. Destroy by crushing or perforating and discard in a safe place.
