DIRECTIONS

AS AN AIR SANITIZER:

Use periodically in a pressure vaporizer, electric sprayer or hand sprayer. Spray undiluted in closed spaces, enveloping the entire area with a fine mist.

FOR SURFACE DISINFECTION:

First clean object thoroughly and then spray, wipe, mop or sponge undiluted, covering the surface thoroughly. This will not only aid in destroying many bacteria but unlike many other disinfectants, will leave the environmental surfaces clean and pleasant.

FOR DESTROYING MANY DISAGREEABLE ODORS:

Spray thoroughly and freely into the air. Odors such as from Garlic, Onions, Fish, Smoke, Bathrooms, Closets, or due to Perspiration, Disease, Putrefaction, Decay, are destroyed and not merely covered up. Odors are eliminated quickly and effectively. Pleasantly perfumed.
