DIRECTIONS FOR USE

Roaches, Ants, Waterbugs, Spiders, Ticks: Spray into cracks around baseboards and in places where these insects may spray until wet surfaces behind and beneath cabinets, refrigerator, stoves, etc. Use on other localized areas infested with these pests. Repeat treatment as required.

Carpet Beetles: Make localized application to areas of the floor and baseboards. Spray directly into cracks and under carpets where insects may be found. Treat crevices, cracks or closets and infested areas of shelvings. Repeat as necessary.

Brown Dog Ticks: Thoroughly spray infested areas around baseboards, window and door frames, wall cracks, sleeping quarters of household pets and localized areas of floors and floor coverings. Applications should be

made in areas where ticks may be found. Repeat applications as necessary. For localized infestations of ticks outdoors, first spray infested areas with water, thoroughly wetting the area. Repeat applications as necessary. For localized infestations of ticks outdoors, first spray infested areas with water, thoroughly wetting the area. Repeat applications as necessary. For localized infestations of ticks outdoors, first spray infested areas with water, thoroughly wetting the area. Repeat applications as necessary.
