

APR 29 1991

Mr. Lewis Mantels
Hysan Corporation
4309 South Morgan Street
Chicago, IL 60609

Dear Mr. Mantels:

Subject: Revised Label - Confidential Statement of Formula
Hexit Insect Killer
EPA Registration No. 334-154
Your Submission Dated January 7, 1991

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

Have your supplier of Floral 167-032 Cherry Bouquet submit its complete composition, referencing this pesticide by product name and EPA Registration Number.

Sincerely yours,

Richard F. Mountfort
Product Manager (10)
Insecticide-Rodenticide Branch
Registration Division (H7505C)

INSECTICIDA A NEBLINA SECA

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Avoid breathing spray mist and vapors. Provide adequate ventilation in area being treated. Avoid contact with eyes, skin, or clothing. After handling, wash thoroughly with soap and water.

In hospitals, patients should be removed from room prior to treatment. Room should be ventilated for two hours after spraying. Do not return patients to room until after ventilation.

Do not get spray on foods, feeds, or surfaces that they may contact. Remove or cover all food and feed during treatment. All food and feed processing surfaces should be thoroughly cleaned with soap or detergent and then rinsed with potable (drinking) water before using. Treat food and feed processing areas only when the facility is not in operation.

STATEMENTS OF PRACTICAL TREATMENT
IF IN EYES: Immediately flush eyes with water. Remove any contact lenses, then hold lids open and flush eyes thoroughly with water. Get medical attention if irritation persists.

IF SWALLOWED: If conscious, rinse mouth with water. Do NOT induce vomiting unless directed by medical personnel. Call a physician or Poison Control Center.

NOTE TO PHYSICIAN: Contains under 20% Petroleum Distillates (possible lung aspiration hazard).

PHYSICAL/CHEMICAL HAZARDS

EXTREMELY FLAMMABLE. Contents under pressure. Keep away from fire, sparks, pilot lights, and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130°F (54°C) may cause bursting.

DIRECTIONS FOR USE

GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL: Remove protective cap. Hold container upright. Do not aim or spray toward persons, pets, or vegetation. Before spraying, cover fish bowls, and remove pets and birds from the area.

FOR FLYING INSECTS (Flies, Gnats, Hornets, Mosquitoes, small flying Moths, and Wasps): Close all doors and windows. Spray up into the air with a sweeping motion. No need to spray directly at flying insects — the mist in the air will kill them. Fill the room with mist, then leave the area. Wait at least 15 minutes before returning, then ventilate area thoroughly. Sweep up and dispose of fallen insects.

FOR CRAWLING INSECTS (Centipedes, Crickets, Roaches, Silverfish, Sow Bugs, and Waterbugs): Spray hiding places such as baseboards and floor boards; moist places; cracks; crevices; openings around sinks, drains and pipes; behind bookcases, cabinets, and other storage areas, hitting as many bugs as possible. Repeat as needed.

FOR ANTS: Spray trails, hills, around window and door frames, and openings around pipes and baseboards where ants crawl, hitting as many as possible.

FOR SPIDERS: Spray webs, cracks, and crevices which may harbor these pests, spraying directly on as many spiders as possible. Repeat application frequently.

FOR CARPET BEETLES: For adequate control, contact insects directly with spray. For infested upholstered furniture, thoroughly treat interior as well as exterior surfaces. For rugs and carpets, thoroughly spray both top surfaces and undersides. Shelves, closets, and areas under furniture should be treated. In all cases, treatment should be repeated as necessary to maintain control.

FOR CLOTHES MOTHS: Spray all articles of clothing and other items to be protected, giving special attention to seams and folds. Spray interiors of storage containers, such as clothes bags, trunks, chests, and closets on a regular basis. Wash clothing before wearing. Repeat treatment at least every 30 days, unless articles are stored in moth-proof containers.

FOR BEDBUGS: Spray baseboards, moldings, and floor boards. Spray mattresses, particularly around seams and tufts. Take beds apart and spray into all joints. Repeat spraying at frequent intervals.

FOR FLEAS: Apply to floors and floor coverings, cracks, crevices, sleeping quarters of animals, and infested furniture. For adequate control, it is necessary to repeat applications to these areas to insure contact of all pests with the spray.

STORAGE AND DISPOSAL

GENERAL: Do not contaminate other materials, especially foods or drinks, during transport, use, storage, or disposal. If damaged or leaking, soak up and wrap any waste, then dispose of as below.

STORAGE: Keep in a cool, dry, locked area away from flames, sparks, sunlight, or other sources of heat or ignition. Containers heated above 130°F (54°C) may burst.

DISPOSAL: Refasten protective cap on container, then securely wrap in several layers of newspaper and discard in trash. Do not incinerate or puncture.
