

**FOR DISINFECTING HARD NONPOROUS
INANIMATE ENVIRONMENTAL SURFACES**

**EFFECTIVE IN HARD WATER*
FAST ACTING • BUFFERED**

This product has been specially formulated for cleaning surfaces that do not ordinarily respond to most detergents. It is powerful, yet safe on all washable surfaces. It removes the heaviest accumulations of grease, grime, dirt, and unusual soils.

Its extra cleaning power is held in reserve, responding to the catalytic action of the soil. Its amphoteric system gives a full range of cleaning power, whether the soil be alkaline, acidic, or nonpolar. Its silicate-buffered action fights corrosion. Its chelating action removes alkali and soap scum.

It is not only a superior detergent, but also an effective germicide, containing 15,000 parts per million (before dilution) of a potent dual quaternary germicide. In use, it is effective against a broad spectrum of microorganisms.

It will not only clean and disinfect, but it also destroys unwanted odors from smelly surfaces.

It cleans and disinfects in cold or hot water, then rinses off easily.

*This product is effective in waters up to 400 ppm hardness, calculated as Calcium Carbonate (CaCO₃).

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

WARNING: May be fatal if swallowed. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.

Do not allow this product to contaminate foods, drinks, or feeds. Before using product, all edible items must be removed from the area or carefully protected. Equipment and other processing surfaces which may contact edible items must be cleaned with this product while they are not in use. After being cleaned, these surfaces must be thoroughly rinsed with potable water before being used.

STATEMENTS OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

IF IN EYES: Flush eyes with water. Remove any contact lenses, then flush eyes again with plenty of water. Call a physician if irritation persists.

IF ON SKIN: Wash with plenty of water. Get medical attention if irritation persists.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL: Apply to surfaces with a mop, sponge, brush, cloth, or sprayer. As a general rule, the longer the wet disinfectant is in undisturbed contact with the microorganisms on a surface, the more effective it is at killing or inactivating them. Effective disinfection requires a minimum of 10 minutes contact time.

FOR USE AS A CLEANING AGENT: For light duty cleaning, add 1 part of undiluted product to 64 parts of water (2 oz per gal, or 59 mL per 3.8 L). For medium duty cleaning, use 1 part to 43 parts (3 oz per gal, or 89 mL per 3.8 L). For extra heavy soil, use 1 part to 16 parts (8 oz per gal, or 238 mL per 3.8 L).

FOR USE AS A GENERAL DISINFECTANT: For use in Food Service Areas, Food Processing Plants, Institutional and Industrial Cafeterias, School Lunch Rooms, and other places where food is processed, prepared, or serviced. Also for use in institutions, such as Schools, Municipal Buildings, Nursing Homes, Senior Centers, Children's Homes, Colleges, Churches, Country Clubs, Athletic Clubs, Hotels, Motels, Airline Facilities, Bus and Rail Terminals, Hospitals, and Clinics.

First, remove gross filth or heavy soil as directed in cleaning instructions. Then add 1 part of product to 40 parts of water (3.2 oz per gal, or 95 mL per 3.8 L) in a clean bucket or portable container. If the surface is heavily soiled, use higher concentrations, up to 8 oz per gal of water (238 mL per 3.8 L).

FOR PSEUDOMONAS DISINFECTION: Dilute 1 part of product to 30 parts of water (4.3 oz per gal, or 127 mL per 3.8 L).

FOR FUNGICIDAL ACTIVITY: To kill Trichophyton mentagrophytes/interdigitale (the fungus commonly associated with Athlete's Foot condition) on environmental surfaces, use 3.5 oz of product per gal of water (104 mL per 3.8 L).

STORAGE AND DISPOSAL

GENERAL: Do not contaminate water, food, feed, or other pesticides by use, storage, or disposal. If damaged, leaking, or spilled, soak up and wrap waste, then dispose of as below.

STORAGE: Keep in upright, tightly closed original container in a cool, dry, locked area away from flames, sparks, sunlight, other chemicals, and other sources of heat, degradation, or contamination.

DISPOSAL: Do not reuse empty container. Rinse original container thoroughly, then securely wrap in several layers of newspaper and discard in trash.
