

GENERAL INFORMATION

This product, a selective weed killer for lawn grasses, is a non-persistent herbicide especially formulated for use on turf-grass for selective control of many broadleaf weeds commonly prevailing in lawns without injury to desirable grasses. This chemical may be used on all types of turf where some of our other products are used, including Horton, Kentucky Blue Grasses, Bermuda, fescues and rye grasses. (This product has been used successfully on bentgrasses; however, it should not be used unless prior tests have shown it to be non-damaging under the particular conditions of use. To eradicate broadleaf weeds, it is better to use another of our recommended selective weed killers for Fine Lawn Grasses.)

Do not use on dichondra or on newly seeded lawns.

WEEDS CONTROLLED:

Buckhorn Clover	Lambsquarters Wiglow	Red Clover Red Sorrel*
Common Chickweed	Mouse ear Chickweed	Stitchwort
Curled Dock	Morning Glory	Speedwell
Dandelions*	Pigweed	White Clover
English Daisy*	Plantain	Wild Geranium
Ground Ivy	Purslane	Wild Onion*
Knockweed	Ragweed	Yarrow

NOTE: *Plants containing 2,4-D so that some weeds will be controlled by other herbicides in 4 weeks for complete weed killing action to occur.

Either before or after application, it is wise to properly fertilize the lawn so as to encourage the lawn to heal rapidly as possible, filling in the bare areas where the weeds have died away. Once the weeds have been removed, the bare areas should be reseeded. Bare areas may be reseeded 3 to 4 weeks after application.

WHEN TO APPLY:

Apply in spring, or fall, when weeds are actively growing. Knotweed is controlled more easily in spring or early summer, when weeds are young.

PRECAUTIONS: Do not apply when turf is suffering from drought conditions or during very hot weather or damage to grass may result. Do not mow for several days before or after application. Withhold sprinkling for 24 hours after application. Do not apply during periods of heavy rainfall. Do not use on newly seeded areas. Do not use if you want clover in your turf. In some areas, blythe grasses, carpet, buffals and St. Augustine grasses may be injured. Therefore do not use on turf where these grasses predominate.

Local conditions may affect the use of this chemical. Consult competent state or local turf or weed authority for specific recommendations as to dosage and time of application, and for control of other weeds.

GCC-534

GROUNDS CONTROL CHEMICALS

Controls many turf and lawn broadleaf weeds and surface-creeping broadleaf weeds without injury to most ornamental lawn grasses.

ACTIVE INGREDIENTS:

Dimethylamine salt of 2-(2-methyl 4-chlorophenoxy) Propionic acid* 0.312

Dimethylamine salt of 2,4-dichlorophenoxyacetic acid* 0.310

INERT INGREDIENTS: 99.378

*Equivalent to .21% of 2-(2-methyl 4-chlorophenoxy) propionic acid or .024 lbs. MCPA acid per gallon. Equivalent to .21% 2,4-dichlorophenoxyacetic acid or .024 lbs. 2,4-D per gallon.

CAUTION: KEEP OUT OF REACH OF CHILDREN

CONTENTS UNDER PRESSURE

Avoid contact with skin, eyes or clothing. Avoid inhaling spray mist. Avoid spray drift to susceptible plants as this product may injure grapes, tomatoes, beans, peas, other vegetables, legumes, ornamentals. Do not transport with or store near seeds, fertilizers, insecticides or fungicides. Do not use in or around green houses. Avoid contamination of water intended for irrigation or domestic purposes. ~~Keep out of reach of children. Do not store with foodstuffs. After using, wash hands and other parts of the body contaminated with concentrate, spray or washings.~~

Keep in a storage space where temperatures are cool, since this container may burst at 120° F. Do not puncture or throw in fire.

Do NOT Store With Foodstuffs
