

**DIRECTIONS
As an Insecticide**

When used against moths it is necessary to close the space in which the material is stored and then place within a liberal amount of the Crystals in order to create sufficient vapor to kill. One pound of Crystals will be found sufficient to kill all insect life in a tightly closed container not exceeding ten cubic feet.

CLOTHING PLANKETS BEGS or other articles to be protected in a tight trunk, chest or similar container about the dry hills in the center of the container.

For use against moths, place the crystals in the drawers of the wardrobe, in the closets, and in the trunks, chests, and suitcases.

For use against flies, place the crystals in the closets, in the trunks, chests, and suitcases, and in the drawers of the wardrobe.

May cake on storage. Shake vigorously several times before using. Store in cool place.
