

## DIRECTIONS

### FOR CLEANING OF TOILETS

During initial cleaning, empty bowl by expelling water over trap, then apply disinfecting solution full strength onto stains with bowl mop or brush. Stains appearing under flushing rim will be removed readily when a little of this product is washed over the stains and the mop is used. Rinse thoroughly immediately with water after cleaning.

For more stubborn stains, allow this product to stand a few minutes on stains, and this will make the work easier. Except on extra-stubborn stains, all stains on the bottom or walls of bowl come off very quickly, but prior soaking could be necessary in extreme cases.

The ring around the water line can easily be removed by taking two cups of water out of the bowl and replacing it with two cups of this product. A steel wool pad can gently be used to remove the ring and not scratch the surface. Rinse thoroughly immediately with water after cleaning.

### FOR USE ON SHOWER AND SWIMMING POOL TILE:

This product is an extremely powerful, non-selective bactericidal and germicidal cleanser, which aids greatly in retarding growths and preventing odor-forming fungi and mildew.

On initial application, pour in glass or plastic container, and add equal amount of water. Thereafter immerse brush or mop and apply where needed. Let solution remain on soiled and dirty surface three to five minutes—agitation not necessary. Thereafter brush lightly and rinse thoroughly over entire surface.

To control mold and fungi, repeat weekly or when new growth appears.

For daily cleaning of wash basins, tubs, shower stalls and drinking fountains: Dilute with 4 parts of water and apply with soft cloth swab, or brush. Rinse thoroughly immediately with water after cleaning.

This product has excellent cleaning qualities, as well as more than ample germicidal properties. Persons with sensitive skin should use rubber gloves if prolonged contact with skin is necessary.

# STERIZONE

## HOSPITAL TYPE FOAMING IODINE COMPLEX

# Bowl, Porcelain & Shower Stall CLEANER

CLEANS • DISINFECTS • DEODORIZES

**DANGER: KEEP OUT OF REACH OF CHILDREN.  
CORROSIVE. MAY BE FATAL IF SWALLOWED. DO NOT  
BREATHE VAPOR OR FUMES. MAY PRODUCE CHEMICAL  
BURNS. DO NOT GET IN EYES, ON SKIN, OR ON  
CLOTHING. SEE ANTIDOTE STATEMENT ON SIDE PANEL.**

NET: 32 FL. OZ. (1 QT.)

### FOR COMPLETE STOPPAGE:

This product removes stoppages quickly in urinals, due to the gradual formulation of scale, and other organic matter. Its regular use will prevent these stoppages, allow the water to flush more quickly down the drain, and banish those disagreeable urinal odors. Absolutely harmless on genuine porcelain. Will not hurt the pipes or plumbing fittings connected with the bowl. Just pour this product into the bowl or urinal, and it immediately begins to penetrate through the standing water in the trap and waste line until it reaches the obstruction, where it collects, and removes the scale with chemical reaction and, therefore, cleans the line. Simply let stand overnight and check the results in the morning.

#### ACTIVE INGREDIENTS:

Hydrogen Chloride ..... 9.5%  
Nonylphenoxyethoxymethanol-Iodine  
Complex (Provides 0.3% titratable Iodine) 3.0%

#### INERT INGREDIENTS

87.5%

**BEFORE DISCARDING THIS  
CONTAINER RINSE THOROUGHLY  
WITH WATER.**

#### ANTIDOTE:

**INTERNAL**—Call a physician immediately. Drink a teaspoonful or more of magnesia, chalk, or small pieces of soap, softened with water in milk or raw egg white.

**EXTERNAL**—Eyes. Wash with water for 15 minutes. Get prompt medical attention. Skin—Wipe off acid gently, immediately flood the surface with water, using soap freely, then cover with moist magnesia or baking soda.
