

DIRECTIONS

FOR CLEANING OF TOILETS

During initial cleaning, empty bowl by expelling water over trap, then apply disinfecting solution full strength onto stains with bowl mop or brush. Stains appearing under flushing rim will be removed readily when a little of this product is washed over the stains and the mop is used. Rinse thoroughly immediately with water after cleaning.

For more stubborn stains, allow this product to stand a few minutes on stains, and this will make the work easier. Except on extra-stubborn stains, all stains on the bottom or walls of bowl come off very quickly, but prior soaking could be necessary in extreme cases.

The ring around the water line can easily be removed by taking two cups of water out of the bowl and replacing it with two cups of this product. A steel wool pad can gently be used to remove the ring and not scratch the surface. Rinse thoroughly immediately with water after cleaning.

FOR USE ON SHOWER AND SWIMMING POOL TILE:

This product is an extremely powerful, non-selective bactericidal and germicidal cleanser, which aids greatly in retarding growths and preventing odor-forming fungi and mildew.

On initial application, pour in glass or plastic container, and add equal amount of water. Thereafter immerse brush or mop and apply where needed. Let solution remain on soiled and dirty surface three to five minutes—agitation not necessary. Thereafter brush lightly and rinse thoroughly over entire surface.

To control mold and fungi, repeat weekly or when new growth appears.

For daily cleaning of wash basins, tubs, shower stalls and drinking fountains: Dilute with 4 parts of water and apply with soft cloth, swab, or brush. Rinse thoroughly immediately with water after cleaning.

This product has excellent cleaning qualities, as well as more than ample germicidal properties. Persons with sensitive skin should use rubber gloves if prolonged contact with skin is necessary.

Bowl, Porcelain & Shower Stall CLEANER

CLEANS • DISINFECTS • DEODORIZES

**DANGER: KEEP OUT OF REACH OF CHILDREN.
CORROSIVE. MAY BE FATAL IF SWALLOWED. DO NOT
BREATHE VAPOR OR FUMES. MAY PRODUCE CHEMICAL
BURNS. DO NOT GET IN EYES, ON SKIN, OR ON
CLOTHING. SEE ANTIDOTE STATEMENT ON SIDE PANEL.**

NET: 32 FL. OZ. (1 QT.)

FOR COMPLETE STOPPAGE:

This product removes stoppages quickly in urinals, due to the gradual formulation of scale, and other organic matter. Its regular use will prevent these stoppages, allow the water to flush more quickly down the drain, and banish those disagreeable urinal odors. Absolutely harmless on genuine porcelain. Will not hurt the pipes or plumbing fittings connected with the bowl. Just pour this product into the bowl or urinal, and it immediately begins to penetrate through the standing water in the trap and waste line until it reaches the obstruction, where it collects, and removes the scale with chemical reaction and, therefore, cleans the line. Simply let stand overnight and check the results in the morning.

ACTIVE INGREDIENTS:

Hydrogen Chloride	9.5%
Nonylphenoxypolyethoxyethanol-Iodine Complex (Provides 0.3% titratable Iodine)	3.0%
Essential Oils	1.2%
INERT INGREDIENTS	86.3%

**BEFORE DISCARDING THIS
CONTAINER RINSE THOROUGHLY
WITH WATER.**

ANTIDOTE:

INTERNAL—Call a physician immediately. Drink a teaspoonful or more of magnesia, chalk, or small pieces of soap, softened with water in milk or raw egg white.

EXTERNAL—Eyes. Wash with water for 15 minutes. Get prompt medical attention. Skin—Wipe off acid gently, immediately flood the surface with water, using soap freely, then cover with moist magnesia or baking soda.

DIRECTIONS

REMOVES LIME AND HARD WATER DEPOSITS, URIC ACID SALTS, VARIOUS DISCOLORATIONS from toilet bowls, urinals, shower walls, swimming pools, drinking fountains, bath tubs, wash basins, lavatories when used as directed. Porcena is a concentrate and MUST be diluted with water according to directions and always well rinsed when used on Porcelain Enamel such as bath tubs, lavatories, and sinks. It keeps fixtures sparkling clean.

Inadvertent spillage on textiles or other materials should be immediately rinsed thoroughly with water.

* Do not use on any surface that can be damaged by acidic materials. Many Porcelain surfaces are not resistant to acid.

BEFORE DISCARDING THIS CONTAINER
RINSE THOROUGHLY WITH WATER.

DIRECTIONS CONTINUED

For toilet bowl and urinal cleaning, flush toilet and remove as much water as possible by plunging. Apply with the Porcelon yarn mop and allow to remain on the surface at least 3 minutes until all rust, stains and scale are loosened. Clean upper part of bowl, under the flush rim and down into the trap. To remove odor and incrustations in trap, pour 2 ounces into urinal and allow to remain for as long as possible.

To clean bath tubs, sinks, wash basins and other enamelled and plated surfaces, always dilute with 3 parts water. Apply with Sponge or Porcelon Mop. Do not allow Porcena to remain on fixture without thoroughly rinsing with water.

For cleaning of shower stalls, drinking fountains, coffee urns, sterilizers, brass rails, ceramic tile floors, dilute with 3 parts of water then apply to the surface, and finally rinse with water. For stubborn stains, 2 or 3 such applications will be necessary. Do not allow Porcena to remain on the fixture without thoroughly rinsing it with water.
