For Flying Insects: Flies, mosquitoes, small flying moths, gnats, wasps. There is no need to spray directly at flying insects — the mist in the air will kill them. Close all doors and windows. Four to five seconds of spraying treats 1000 cubic feet. Sweep up and destroy fallen insects. Repeat treatment as necessary.

For Crawling Insects: Roaches, waterbugs, silverfish, crickets. Spray hiding places, baseboards and floor boards, moist places, openings around sinks, drains and pipes, behind bookcases, cabinets and other storage areas, hitting as many bugs as possible. Repeat as needed.

Ants: Spray trails, hills, around window frames and openings around pipes and baseboards where ants crawl, hitting as many as possible.

Spiders, Centipedes, Sow Bugs: Spray webs and the places where these pests crawl. Hit as many as possible. Repeat as needed.

Carpet Beetles: Hit these bugs directly with spray on sections of floor, baseboards, shelves and carpets. Repeat spraying at frequent intervals.
