Mr. Bernard Berkeley
Hysan Corporation
4309 South Morgan Street
Chicago, IL 60609

Dear Mr. Berkeley:

Subject: CHERRY KOPK INSECT KILLER
EPA Registration No. 334-311
Your Submission Dated May 11, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is not acceptable for the reasons given below.

Your labeling will be acceptable provided you do the following:

- Your labeling makes reference to areas that are clearly designated as U.S. Department of Agriculture (USDA) meat and poultry processing plants. Before we can give your product further consideration for conditional registration, you must either:
 - a. File a separate application with USDA to obtain approval in such processing plants, in which case the label wording should be changed to reflect USDA acceptance, or
 - b. Qualify your site designation to exclude USDA meat and poultry processing plants.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS
CAUTION Avoid inhalation of spray mist. Avoid contact with eyes or skin. May be harmful if swallowed.

STATEMENT OF PRACTICAL TREATMENT
IF IN EYES Flush eyes immediately with water. Remove any contact lenses, then hold eyelids open and flush eyes thoroughly with water. If irritation persists, get medical attention.

PHYSICAL/CHEMICAL HAZARDS
Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F (54°C) may cause bursting.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INSTRUCTIONS

BEFORE USING FIRST read entire label carefully. Remove pets and birds and cover fish aquariums in area to be treated. Do not use on edible crops. Before each use SHAKE CONTAINER THOROUGHLY, then remove protective cap. Do not spray on or toward persons or pets. Keeping spray button at least 3 ft (1 m) from all surfaces and vegetation, aim toward target area and push button firmly to release spray. Whenever possible, spray directly on insects.

IN FOOD-TYPE AREAS Do not get insecticide in or on edible or drinkable materials. Remove or completely cover all foods, beverages, feeds and their packaging materials during treatment or their preparation, processing, storage or serving areas. After treatment and before use, all food contact surfaces (including utensils, containers and other equipment) in treated areas must be washed with soap or detergent and rinsed with potable water. In food processing plants, treat edible products areas only when the facility is not in operation.

AFTER USING Retasten protective cap on container when not in use and store as directed below. Repeat treatment if insects return or as necessary to maintain control.

TO CONTROL PESTS

FLYING INSECTS (Flies, Gnats, Mosquitoes, small flying Moths, and Wasps) Close all doors and windows. Spray up into the air with a sweeping motion. About 4 to 5 seconds of spraying treats 1,000 cubic feet (28 m³). No need to hit flying insects directly; the insecticidal mist in the air will kill them. Keep room closed for 15 minutes. Ventilate area thoroughly before reentry. Sweep up and destroy dead and dying insects.

CRAWLING INSECTS (Crickets, Roaches, Silverfish and Waterbugs) Spray hiding places behind baseboards and under floorboards, in moist places and openings around sinks, drains and pipes behind bookcases and catwets, and in other storage areas.

ANTS Spray trails, hills around window and door frames, and openings around pipes and baseboards where ants crawl.

CENTIPEDES, SOWBUGS and SPIDERS Thoroughly spray all parts of the room suspected of harboring these pests. Special attention should be paid to cracks, crevices and hidden surfaces under sinks and behind stoves and refrigerators.

CARPET BEETLES Spray both interior and exterior of upholstered furniture. Both top and bottom of rugs and carpets should be sprayed thoroughly. Also treat shelves, closets, areas under furniture and wherever these insects are seen or suspected. Repeat spraying at frequent intervals.

BEDBUGS Spray on and in cracks around baseboards, moldings and floorboards. Spray mattresses, particularly around seams and tufts. Take beds apart and spray into all joints. Repeat spraying at frequent intervals.

FLEAS Remove and destroy pet's old bedding. Spray sleeping quarters of pets around baseboards, window frames and door frames, in wall cracks and on floor areas of floors. Do not spray animals. Put fresh bedding in pet's quarters after spray has dried. Also treat dogs and cats with a registered flea and tick control product before allowing them to enter treated area.

STORAGE AND DISPOSAL

GENERAL Do not contaminate other materials, including water, food or feed during transport, use, storage or disposal. If damaged or leaking, soak up and wrap waste, then dispose of as below.

STORAGE Keep in a cool, dry, locked area, inaccessible to children and away from flames, sparks, sunlight or other sources of heat or ignition. Containers heated above 130°F (54°C) may burst.

DISPOSAL Retasten protective cap on container, then securely wrap in several layers of newspaper and discard in trash. Do not incinerate or puncture.
