NET WT 17 OZ (1 LB 1 OZ) 481 g

FEATURES, CLAIMS, AND USES

Contains dual-synergized pyrethrins and propoxur - a formulation that is very effective and gives fast kill when sprayed directly on hornets and wasps. Contains no extremely flammable solvents or propellants.

The spray reaches up to 15 ft (4½ m) horizontally and 12 ft (3½ m) vertically. This allows hitting insects and nests up to 18 ft (5½ m) above the ground when the container is held above the head.

For use around homes, apartments, porches, garages, sheds, patios, autos, trucks, vans, mowers, implements, and other similar household locations.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION May be harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing spray mist and vapors. Avoid contact with skin and clothing. Do not get in eyes. After handling, wash thoroughly with soap and water.

PRACTICAL TREATMENT (FIRST AID)

GENERAL QUICKLY follow directions below AND call a Poison Control Center (or physician or emergency department). Always get quick medical attention for ANY ill effects which continue (or show up later).

IF IN EYES Flush eyes with plenty of water while removing any contact lenses, then hold eyelids open and continue flushing with plenty of water.

IF ON SKIN, CLOTHING, ETC. Remove any contaminated clothing, shoes, jewelry, etc. (clean them thoroughly before wearing), and wash affected skin with soap and water.

IF INHALED If ill, IMMEDIATELY get victim fresh air and medical attention. Keep them breathing, apply artificial respiration if necessary.

IF SWALLOWED Do NOT induce vomiting unless directed by medical personnel. Immediately (for conscious victim) rinse mouth with water, spit out, then drink a glassful or more of water. Get IMMEDIATE medical attention.

NOTE TO PHYSICIAN Propoxur is a cholinesterase inhibitor. Treat symptomatically. Atropine administered by injection only, is an antidote.

PHYSICAL/CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or flames. Do not puncture or incinerate container. Exposure to temperatures above 130°F (54°C) may cause bursting. Do not use on surfaces that can be harmed by solvents.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL FOR OUTDOOR USE ONLY do not use in indoor living areas. Do not contaminate drinking water, foods/drinks/feeds, or surfaces that they may contact. Remove animals (including birds) from area to be sprayed. Do not contaminate fish ponds. Do not get spray on solvent-sensitive materials, plastics, or vegetation.

To spray, remove protective cap, hold container upright, aim spray opening toward area to be sprayed, and press firmly on spray button. Spray until surface is thoroughly moistened with insecticide. Spray directly on insects whenever possible. Allow about 24 hours for those insects which were not directly hit by the spray to leave the area. If they should return to the treated area, spray again.

TO KILL HORNETS AND WASPS Application should be made in the late evening when insects are at rest. Make sure wind is not toward you. Do not stand under nests or insects. Spray liberally on visible nests and other hiding and breeding places under eaves, on attic rafters around chimneys or poles on large bushes and trees, in openings in the ground, and in other holes/cracks/crevices which may harbor these insects.

To help prevent their entry into buildings, vehicles, and equipment, spray around places where they may enter, such as on door and window frames, on screens, along sills and ledges, into holes/cracks/crevices in walls, roofs, and foundations, and around openings where plumbing and other utilities enter buildings.

TO KILL CRAWLING INSECTS (such as Ants, Brown Dog Ticks, Clover Mites, Crickets, Earwigs, Fleas, Millipedes, and Sow Bugs) Thoroughly spray infested areas, hiding places, and points of entry into buildings, including around doors and windows, on screens, on patio and porch floors, around openings where plumbing and other utilities enter buildings, into other holes/cracks/crevices in building foundations/walls/roofs, around the base and on trunks of mature trees and large shrubs near buildings, on and into known trails and nests, in and around waste containers, in moist areas, and in other places where these insects are seen or suspected. For Ants, also spray their trails, hills, and nests.

STORAGE AND DISPOSAL

GENERAL Do not contaminate other materials including water/food/feed. During transport, use storage and disposal. If damaged or leaking, soak up and wrap any waste, then dispose of as below.

STORAGE Keep in a cool, dry, locked area inaccessible to children and away from sources of heat and ignition (including flames, sparks, hot surfaces, and sunlight). Containers heated above 130°F (54°C) may burst.

DISPOSAL Refasten protective cap on container, securely wrap in several layers of newspaper, and discard in trash. Do not incinerate or puncture.
