DIRECTIONS FOR USE

For use in the home, and non-food and food areas of food processing plants, schools, warehouses, office buildings, theatres, garages, hotels, motels, kennels, and hospitals.

STORAGE AND DISPOSAL

Store in a cool, dry place. Do not store in a hot or cold place. Do not store in a place where the temperature is below 32°F or above 100°F. Do not store in a place where the humidity is above 75%. Do not store in a place where the product is exposed to direct sunlight. Do not store in a place where the product is exposed to rain or other weather conditions. Do not store in a place where the product is exposed to fire or other heat sources. Do not store in a place where the product is exposed to electrical equipment. Do not store in a place where the product is exposed to other chemicals. Do not store in a place where the product is exposed to other insects. Do not store in a place where the product is exposed to other animals. Do not store in a place where the product is exposed to other people. Do not store in a place where the product is exposed to other children. Do not store in a place where the product is exposed to other pets. Do not store in a place where the product is exposed to other birds. Do not store in a place where the product is exposed to other reptiles. Do not store in a place where the product is exposed to other amphibians. Do not store in a place where the product is exposed to other fish. Do not store in a place where the product is exposed to other aquatic animals. Do not store in a place where the product is exposed to other marine animals. Do not store in a place where the product is exposed to other insects. Do not store in a place where the product is exposed to other animals. Do not store in a place where the product is exposed to other people. Do not store in a place where the product is exposed to other children. Do not store in a place where the product is exposed to other pets. Do not store in a place where the product is exposed to other birds. Do not store in a place where the product is exposed to other reptiles. Do not store in a place where the product is exposed to other amphibians. Do not store in a place where the product is exposed to other fish. Do not store in a place where the product is exposed to other aquatic animals. Do not store in a place where the product is exposed to other marine animals.

NOTE: When used in hospitals, patients should be removed to another treatment center at least 2 hours after treatment. Do not use in hospitals, schools, or other public places.

Space Spray to Kill Flies, Mosquitoes, Small Flying Moths and Gnats: Shake well and spray in the room and surrounding area with the equipment. Apply a thin mist of compressed air spray in a 10-foot diameter that gives small particles size of 10 microns up wards toward upper corners of room and ceiling. Apply at the rate of 1 to 2 fluid ounces per 1,000 cubic feet of space to be treated. Use in room and leave closed for 15 to 30 minutes. Ventilate thoroughly. Do not re-occupy room until dead insects are removed. Repeat as necessary.

Contact or Surface Spray to Kill Cockroaches, Ants and Crickets: Apply with a spray that will give rise to wet droplets. For roaches, spray into cracks and crevices and openings along baseboards and other insect harborage. Use one gallon of spray per 1,000 sq. ft. of surface to be treated. For ants, spray trails and a point of entry into building. Spray ants directly with a spraying application. In all cases, contact as many insects as possible with the spray. Repeat application as necessary for control.

To Kill Carpet Beetles: Direct spray at many insects as possible. Spray with interior and exterior. Do not spray directly on the top and bottom of rug and carpet. Rug should be sprayed thoroughly. Also treat shelves, closets, areas under furniture, and wherever the insects are seen or suspected. Repeat as necessary.

To Kill Bedbugs: Spray mattresses through a bed cover and around seams and folds. Spray bedstead rails, head and foot boards and wall, floor and ceiling. A bed cover today before the insecticide is applied.

To Kill Eggs of Forms of Confused Flour Beetles, Sawtoothed Grain Beetles, Lesser Grain Weevils and Rice Weevils: Find and destroy infested grains and products. Remove other items from pantry. Soak the shelves to be treated in the name of the insecticide. Place clean paper on the shelves and return packages after the shelves have dried. Repeat as necessary.

To Kill Fleas: Remove and destroy animal bedding and wash bedding with Dettol. Use Dettol on the animal's body. A flea comb should be used to remove fleas from the animal's body. Repeat as necessary.

NOT INTENDED FOR HOUSEHOLD USE OR RESALE

DIRECTIONS FOR USE:

For use on the following pests only. Do not use on plants or animals.

INDOORS: To Kill Flies, Mosquitoes, Small Flying Moths and Gnats: Spray directly on the insects. For mosquitoes, spray the water in the container with the water. For flies, spray the area where they are breeding.

To Kill Cockroaches, Ants and Crickets: Spray in many insect positions with the spray. In addition, spray along the perimeter of the room, especially in the cracks and crevices. Repeat as necessary.

To Kill Carpet Beetles: Directly spray on areas where possible. Spray both interior and exterior of hostess furniture. Both top and bottom of rugs and carpets should be sprayed thoroughly. Also treat the closets, areas under furniture and wherever these insects are seen. Repeat as necessary.

To Kill Exposed Forms of Confused Flour Beetles, Saw-toothed Grain Beetles, Lesser Grain Borers and Rice Weevils: Find and destroy infested package goods. Remove all other items from pantry. Spray the shelves to a height of the infested insects. Repeat as necessary.

To Kill Scorpions, Earwigs, Firebrats and Spiders: Contact all insects possible with the spray. Also, thoroughly spray all parts of the room suspected of harboring these pests. Special attention should be given to cracks, crevices, under furniture, under sinks, behind shower and toilet stalls.

OUTDOORS: To Kill Flies, Mosquitoes, Gnats and Small Flying Moths: Spray areas infested with these pest flying insects. Follow precautions listed above. Hold container 18-24 inches from shrubs, bushes and grassy areas. Spray these areas with a slow sweeping motion in the direction of the 3-second per cubic yard of space while moving away from treated areas. To reduce annoyance from these pests, treat open porches and patios in a similar manner. Spray only when the insects are flying. Allow spray to dissipate before occupying the treated area. Repeat as necessary.

To Protect Ornamental Plants: For the below listed insects infesting roses, azalea, cherry, amaryllis, wisteria, grape, hibiscus, plum, holly, dusty miller, and purple loosestrife. Also for the insects specified below on evergreens, small ornamental deciduous trees, shrubs and vines. Caution should be taken when spraying near the growths. In some varieties may exhibit phytotoxicity. Do not spray ornamentals while flowering.

When sprayed directly on insects, this spray will kill aphids, the Japanese beetle, plant bugs, white flies, scumhorn, armyworm, larvae, Mexican bean beetle larvae, cucumber beetles, leafhoppers, leafhoppers and mealy worms.

Contact Insecticide Spray For Indoor and Outdoor Use

ACTIVE INGREDIENTS:

cyfluthrin (synthetic pyrethroid)	100.00%
pyrethrin (natural pyrethroid)	0.00%
Other inert ingredients	99.99%
Total	100.00%

Precautionary statements, first aid, and other information are on the label.
