STERICIDE[®] SANITIZER

DISINFECTANT • DEODORIZER
LIQUID QUATERNARY AMMONIUM SANITIZER

BENEFITS

- Rapid Sanitizing Action
- Controls Odors at the Source
- Non-Corrosive
- Economical: 1 Gallon Makes 512 Gallons of Sanitizing Solution
- No Rinse Required up to 200 ppm

DESCRIPTION

STERICIDE SANITIZER is a synergistic combination of two quaternary ammonium sanitizing and deodorizing agents. It will sanitize food processing equipment, tanker interiors and refrigerator boxes. STERICIDE SANITIZER is not a maskant; it controls odors at their source by attacking the odor causing organisms. STERICIDE SANITIZER should not be used with soap or anionic synthetic detergents. When used at 200 ppm active quaternary, a potable water rinse is not necessary unless required by the local health board. STERICIDE SANITIZER is virtually odorless and tasteless.

PROPERTIES

Appearance	Pale yellow liquid
Odor	None
Foam	Moderate
pH @ 1/2 ounce per gallon (200 ppm Quat.)	7.7
Phenol coefficient*	
S. Typhosa	75
S. Aureus	115
E. Coli	36

*Official A.O.A.C. Method

GENERAL USE DIRECTIONS

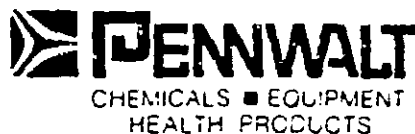

The maximum allowable concentration of quaternary ammonium salts permitted for this product without a terminal potable water rinse is 200 ppm active ingredient. For sanitizing cleaned food processing equipment use 1 ounce STERICIDE SANITIZER per 4 gallons of water. At this concentration, 200 ppm quaternary, no potable water rinse is necessary, after thorough draining of the sanitizing solution, unless required by the local health board. Apply STERICIDE SANITIZER solution by brush, immersion or non-atomizing spray.

COMPLIANCE

STERICIDE SANITIZER is registered with the EPA and is authorized by the U.S. Department of Agriculture for use as a sanitizer in federally inspected meat, poultry, rabbit and egg processing establishments.

SAFETY DATA

STERICIDE SANITIZER contains quaternary ammonium compounds. See product label for precautionary information.
