

DIRECTIONS

For general disinfectant use:—Dilute Staphicide 1 to 160 with water) 4 oz. per 5 gallons of water). Apply by mopping, sponging, wiping or spraying until surfaces to be disinfected are thoroughly wet.

For combination cleaning and disinfecting use:—Use 1 to 3 ounces per gallon of water, depending on the degree of soils to be removed. Apply by mopping, sponging or wiping. Allow solution to remain in contact with surface 3 to 5 minutes and agitate with a brush, rag or mop. Wipe, mop or squeegee dirty solution from surface. After removal of dirty solution, if surface is left streaked, rinse with clear water. Some areas, such as those mopped frequently need not be rinsed after each cleaning.

For laundry rinse:—After laundry is cleaned and rinsed clear with water, add Staphicide at the rate of one gallon concentrate per 350 pounds of dry weight laundry in 100 gallons of water. Agitate laundry in rinse solution for at least 3 minutes, centrifuge out excess Staphicide rinse solution and let dry in the usual manner.

CAUTION: Concentrated solution harmful if swallowed. If spilled on skin or eyes, wash well with water. Apply an emollient.

Staphicide

CAUTION: Keep out of the reach of children

MINTED CLEANER AND DISINFECTANT

Cleans, Deodorizes, Disinfects and Santizes in one operation

Phenol Coefficient 8.0 against E. Typhosa, 10.0 against Staph. Aureus

Active Ingredients: Isopropanol, sodium orthobenzylparachlorophenate*, sodium decylbenzenesulfonate.

Inert Ingredients: Water, Essential Oils, Not over 75.6%.

*Sodium salt of Santophen I, Monsanto Chemical Co.
