

337-39

### DIRECTIONS

In cases of high head pressure, excessive scale, or heavy slimes growths, clean system completely with Lester SCALEX before treating with Lester SLIMICIDE.

In other cases and for regular treatment, add 2 ounces of Lester SLIMICIDE for each 100 gallons of water in the system. Treatment should be added near pump suction. A minimum 2 ounce dosage should be used even in systems with less than 100 gallons water.

A treatment with Lester SLIMICIDE once a month is usually sufficient to control growth of slime in a cooling tower. Repeat treatment if necessary. The frequency of dosage required in any system can only be determined by experience, as the amount and type of micro-organisms and other variables such as temperature, pH, sunlight, etc., will be different in each system. Overdosage will not harm the system, and is preferred to underdosage.

## SLIMICIDE

**For controlling algae and slime in cooling water systems. Foam controlled.**

ACTIVE INGREDIENTS: **CAUTION:** Keep out of the reach of children  
N-alkyl (60% C<sub>14</sub>, 30% C<sub>16</sub>, 5% C<sub>12</sub>, 5% C<sub>18</sub>) dimethyl benzyl ammonium chlorides, Bis (Tri-N-butyltin) oxide..... 4.7%

INERT INGREDIENTS:  
Isopropyl alcohol and water..... 95.3%

NET CONTENTS: 1 GALLON
