EPA Reg. No. 352-317

SUPPLEMENTAL LABELING
(EPA Reg. No. 352-317)

SINBAR® HERBICIDE
FOR SELECTIVE WEED CONTROL
BY AERIAL APPLICATION ON ALFALFA

DIRECTIONS FOR USE

It is a violation of federal law to use this product
in a manner inconsistent with its labeling.

Du Pont Sinbar® Herbicide is recommended for control of weeds in established
alfalfa.

HOW TO USE

Apply 1/2 to 1 1/2 pounds Sinbar® per acre in 5 to 10 gallons water by air or
a minimum of 20 gallons water per acre for fixed-boom power sprayer.

Treat only stands established for 1 year or more. Make a single application
in the fall after plants become dormant or in the spring before new growth
starts. For semidormant and nondormant varieties, apply in the fall or winter
after last cutting or in the spring before new growth starts.

Note: Do not apply to seedling alfalfa, alfalfa-grass mixtures, or other
mixed stands. Do not apply on snow-covered or frozen ground as crop injury
may result. Do not apply to stands lacking good vigor due to winter kill,
insect or disease injury, or other causes.

Do not use in California south of Interstate 80.

IMPORTANT

BEFOR USING SINBAR® READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND
ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this
product which may not appear on the package label. Follow the instructions
carefully.

This labeling must be in the possession of the user at the time of pesticide
application.
