SUPPLEMENTAL LABELING
EPA REG. NO. 352-342

LANNATE® METHOMYL INSECTICIDE
FOR USE ON TOMATO

Du Pont "Lannate" Methomyl Insecticide is recommended for use on tomato for control of tomato pinworm.

HOW TO USE

Apply 1/2 to 1 lb. "Lannate" per acre in ground equipment as a spray in sufficient water to obtain thorough coverage. Apply at 5- to 7-day intervals or as needed.

For effective control of this insect, proper spray timing and good coverage is essential. Best control is obtained when spray schedules are initiated on small insects. In general, use the lower rates for shorter intervals between treatments and the higher rates for longer intervals.

NOTE: Do not apply 1/2 lb. per acre within 1 day of harvest. Do not apply over 1/2 lb. per acre within 2 days of harvest.

IMPORTANT

BEFORE USING "LANNATE", READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.
