LANNATE® INSECTICIDE FOR USE ON MELONS, CUCUMBER AND SQUASH

Du Pont "Lannate" Insecticide is recommended for use on melons, cucumber and summer squash for control of flea beetle, tobacco budworm and beet armyworm.

HOW TO USE

Apply 1/2 to 1 lb. "Lannate" per acre in sufficient water to obtain thorough coverage (aerial 5 to 15 gals. per acre). Treat when worms first appear and repeat at 5- to 7-day intervals or as needed. Best results are obtained when spray schedules are initiated on small insects.

Note: "Lannate" sprays are toxic to bees and should not be applied when bees are actively visiting the area. Do not apply 1/2 lb. within 1 day of harvest. Do not apply over 1/2 lb. within 3 days of harvest.

IMPORTANT

BEFORE USING "LANNATE", READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.
