LANNATE® METHOMYL INSECTICIDE FOR THE CONTROL OF ALFALFA CATERPILLAR ON GREEN PEAS

Du Pont "Lannate" Methomyl Insecticide is recommended for use on green peas for the control of alfalfa caterpillar.

HOW TO USE

Apply 1/4 to 1 lb. "Lannate" per acre (aerial application) using sufficient water (5 to 15 gals.) to obtain thorough coverage. Make the first application when insects appear in damaging numbers. Make one or two repeat applications as required.

Note: Peas may be harvested 1 day after last application. Do not graze or feed treated pea vines to livestock within 5 days of last application nor pea vine hay within 14 days of last application.

Pilot should not assist in the mixing and loading operation.

IMPORTANT

BEFORE USING "LANNATE", READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.
